Re: FTMM-63, Building 2603 Former Underground Storage Tank
Memorandum of Record dated November 16, 2011
Fort Monmouth
PI G000000032

Dear Ms. Green:

The New Jersey Department of Environmental Protection (Department) has completed review of the referenced submittal.

Site FTMM-63 is a sewage lift station. In 1998, a diesel fuel oil underground storage tank (UST) was removed from the site; approximately 225 yards of contaminated soil were subsequently removed and properly disposed of. Although a designation of No Further Action was granted on January 10, 2003, additional sampling was more recently performed. It was determined on March 7, 2012 no additional action was required for ground water. It is also agreed no additional action is necessary for soil. The designation of No Further Action granted on January 10, 2003 for the former underground storage tank at Building 2603 remains appropriate.

Please contact this office if you have any questions.

Sincerely,

Linda S. Range
Bureau of Case Management
