Re: *Request for No Further Action Determination for Soil at the Portion of FTMM-54 Within the FTMM-18 Area*  
Fort Monmouth  
Monmouth County  
PI# G000000032

Dear Mr. Colvin,

The New Jersey Department of Environmental Protection (Department) has completed review of the submittal, *Request for No Further Action for Soil at the Portion of FTMM-54 Within the FTMM-18 Area*, received May 22, 2017, prepared by the Department of the Army Office of Assistant Chief of Staff for Installation Management to request determination of no further action for FTMM-54 within the FTMM-18 area.

Naphthalene above the Residential Direct Contact Soil Remediation Standard is found at 6-6.5' at a single location within the former fuel distribution piping excavation, which is located within the footprint of the FTMM-18 landfill. The Department agrees implementation of the engineering and institutional controls approved for the FTMM-18 landfill will also satisfactorily address the referenced naphthalene contamination. The requested determination of no further action necessary for FTMM-54 within the FTMM-18 area, however, cannot be made until the engineering controls and deed notice are in place.

Please contact Linda Range at (609) 984-6606 if you have any questions.

Sincerely,

Linda S. Range
