Re Work Plan for FTMM-57 Building 108 UST Gasoline Release
Fort Monmouth
Oceanport, Monmouth County
Preferred ID: G000000032

Dear Mr. Colvin:

The New Jersey Department of Environmental Protection (Department) has completed review of the Work Plan for FTMM-57 Building 108 UST Gasoline Release (Workplan). Based on the review the Department approves the workplan and offers the following comments.

The Department approves the proposed soil sampling (2 soil borings) to further delineate the current concentrations of benzene. These two soil borings will also be used to delineate the PAH contamination in this area. Please note that recently the Department's soils standards for several PAH compounds have changed. Please re-examine previous PAH contaminant levels as they relate to the recent changes. If PAH levels are below the newly revised standards, the Department will not require further PAH investigation at this location.

Thank you and please feel free to contact me if you have any questions.

Sincerely,

A.J. Joshi
