Re: November 18, 2011 Letter - Site CW-1/FTMM-22, Lime Pit Bldg 2700, Meyer Center
Fort Monmouth
PI G000000032

Dear Ms. Green:

As indicated in the Department's correspondence of March 7, 2012, additional comments were to be provided pending completion of the Department's internal review. As such, the following comments are offered:

CW-1 was a former wastewater treatment lime pit, decommissioned in 2001, that served Building 2700 on the Charles Wood Area section of Fort Monmouth. Liquid waste was discharged to the pit for subsequent neutralization with acid.

The letter report is acceptable. A Remedial Action Selection Report to address remaining exceedences of TCE concentrations in the soil and ground water is forthcoming.

The Department previously agreed the elevated levels of antimony, arsenic and lead found in this area reflect naturally occurring background conditions, and therefore no further action for metals in ground water at this area of concern was warranted.

Please contact this office if you have any questions.

Sincerely,

Linda S. Range
Bureau of Case Management
