Site Remediation Program**

Report Certifications for RCRA GPRA 2020, CERCLA, and Federal Facility Sites

These certifications are to be used for reports submitted for RCRA GPRA 2020, CERCLA, and Federal Facility Sites. The Department has developed guidance for report certifications for RCRA GPRA 2020, CERCLA, and Federal Facility Sites under traditional oversight. The "Person Responsible for Conducting the Remediation Information and Certification" is required to be submitted with each report. For those sites that are required or opt to use a Licensed Site Remediation Professional (LSRP) the report must also be certified by the LSRP using the "Licensed Site Remediation Professional Information and Statement". For additional guidance regarding the requirement for LSRPs at RCRA GPRA 2020, CERCLA and Federal Facility Sites see http://www.nj.gov/dep/srp/srra/training/matrix/quick_ref/rcra_cercla_fed_facility_sites.pdf.

**SUBJECT: Parcel 76 Work Plan Addendum and Response to NJDEP's August 31, 2015
Comments on the February 2015 *Underground Storage Tanks Within ECP Parcel
76, Fort Monmouth, New Jersey*
PI G000000032**

Dear Ms. Range:

Fort Monmouth and Parsons have reviewed the New Jersey Department of Environmental Protection (NJDEP) comments on the subject submittal for ECP Parcel 76, as documented in your letter dated August 31, 2015. We appreciate this opportunity to work with you on Parcel 76. Responses to your comments are provided below, for your review and concurrence or further comments.

A. USTs Requiring No Additional Action

A1. COMMENT: *Underground storage tanks within the parcel previously granted a designation of no further action (NFA) include the following:*

USTs 261 and 261B – NFAed May 30, 2013

UST 270-54 – NFAed February 24, 2000

UST 271-55 – NFAed January 10, 2003

A1. RESPONSE: Agreed.

A2: COMMENT: *Following review of the referenced information, it is agreed no further action is necessary for the following #2 fuel USTs within the parcel:*

UST 262-46

UST 263-47

UST 264-48

UST 265-49

UST 266-50

UST 267-51

UST 268-52

UST 269-53

UST 539

UST 540

UST 541 – Incident #10-04-13-1710-23

UST 542 – Incident #10-04-28-1333-57
UST 544

A2: RESPONSE: Agreed.

B. USTs Requiring Additional Remedial Efforts

B1. COMMENT: *USTs 538 and 543 - Based upon the excavation locations in comparison to the distance and hydraulic gradient direction of the nearest monitor wells, characterization of the ground water quality at USTs 538 and 543 remains outstanding, as no monitor wells are placed in a location to acceptably characterize or monitor ground water in either of the areas. No ground water samples were collected either within the footprints of the excavations, or within 10' hydraulically downgradient of the UST excavations, as required. A ground water investigation at each is required; either monitor wells or well points may be used for analyses of the ground water quality.*

B1. RESPONSE: As described in the attached *Parcel 76 Work Plan Addendum*, additional groundwater sampling is proposed at USTs 538 and 543. A total of 2 groundwater samples will be collected from temporary well locations downgradient of these former USTs.

We look forward to your review of these responses and approval or additional comments. The technical Point of Contact (POC) for this matter is Kent Friesen at (732) 383-7201 or by email at kent.friesen@parsons.com. Should you have any questions or require additional information, please contact me by phone at (732) 380-7064 or by email at william.r.colvin18.civ@mail.mil.

Sincerely,

William R. Colvin, PMP, CHMM, PG
BRAC Environmental Coordinator
