Dear Mr. Colvin,

The New Jersey Department of Environmental Protection (Department) has completed review of the referenced submittal, received December 30, 2016, prepared by the Department of the Army's Office of Assistant Chief of Staff for Installation Management in response to the Department's December 6, 2016 correspondence. A ground water investigation via sampling of temporary wells located within 10' downgradient of each of the two former UST excavations is acceptable. As proposed, analytical parameters will include volatile organic and semi-volatile organic compounds plus tentatively identified compounds as per Table 2-1 of N.J.A.C. 7:26E.

Please contact this office if you have any questions.

Sincerely,

Linda S. Range
