Cc: Joseph Fallon [JFallon@njeda.com]

Gentlemen,

As per my notes, I requested permission from both you gentlemen on March 2, 2017 (Army staff meeting) to relocate batteries from buildings 210, 1150, and 1152 to building 699. More specifically, the garage bays at building 699. Per my notes, both of you approved my request at said meeting. The email below was sent to Kevin Courtney the next day informing him of the Army's approval to store lead-acid batteries at building 699. At this point in time, only batteries from building 210 have been relocated. I am currently taking actions to ship the unbroken lead-acid batteries to a local recycler. I will keep you informed as to these actions.

The pallet of electronic waste (i.e. computers, monitors, and printers) was placed inside building 699 by myself so time last week. I do apologize for the late notice. The recycler slated to take the unbroken batteries is also taking the electronic waste. I hope this information sheds some light on the actions taken and the approvals given.

As always, thank you for your ongoing support.

R/

Joe Fallon

Subject: PICK-UP AND STORAGE OF LEAD-ACID BATTERIES

Kevin,

I secured permission from John Occhipinti and Bill Colvin to store lead-acid batteries (palletized) in the garage bays of building 699. Please collect lead-acid batteries found at building 210, 1150 and 1152 during periods of down time. At your convenience, I'd be happy to show you where said batteries are located.

Thank you.

Joe
