* No product lines were found during the excavation of the UST due to the fact the buildings were removed prior to the USTs. Based on a review of available maps and drawings, the product lines were less than 15 feet in length at each of the locations. Thus, no additional sampling was required.

The reports are complete and all request "No further action". As required by the Tech. Regs., all UST's sampled after January 18, 1998 have the required GPS data locations included within the report. Complete electronic data deliverables are being generated and will be provide to the NJDEP at a later date. We are currently installing a Y2K laboratory information management system to be able to meet this requirement. If the information provided in this enclosure is inadequate or you require further information with regard to these documents please contact me at (732) 532-6224.

Sincerely,

Charles Appleby
