Bill,

Yes that is correct.

Hi AJ:

Just so I'm clear - NFA is required at both 1123B and 1123C?

Thanks,

Bill

Kent,

Based on the attached email from Linda and our discussion on February 4th, I believe the UST 1123B and 1123C seem to be resolved. I tried to review what Linda left me and could not find anything until this email! I hope this clarifies this issue. Please let me know if you need anything from me. Thank you.

Hi Linda,
Attached is the revised figure as requested. Please let me know if you need anything else.

Have a great Monday!
Cris

Sorry to bother you again Cris. We're good for UST 1123C, but the figure indicates the excavation for tank 1123B extended east only to sample 1123B PX3, with TPHC of 9832 ppm. The figure doesn't include 1123B PX6.

thanks

Linda,

Attached is the figure you requested per your email below showing the sample locations for the two UHOTS at parcel 51.

If you need anything else please let me know.

Cris

Subject: Request for figure - ECP rpt

Hello Cris,

Hope you enjoyed your time off!

I'm emailing as I'm missing one item on a particular issue in the ECP workplan for one of the parcels and it seems too minor to put into the comment letter I'll be generating once the review is finally complete.

Appendix D - Parcel 51 – Section 2.4 - Page D-5 explains additional soils were excavated, resulting in removal of the elevated levels of TPH soil first noted, which I can now see represented by further review of Table 1. However, the figure confirming those location is not included. Our older files are archived offsite. Would you therefore please send me (email if that's easiest) the figure from the original report indicating each sample location so I can confirm the locations/removal of affected soil? (Or let me know who I should be contacting!)

Thank you for your time.
