U.S.	United States
USC	United States Code
UST	Underground Storage Tank
UXO	Unexploded Ordnance
VAT	Vinyl Asbestos Tile
VI	Vapor Intrusion
VO	Volatile Organic
VOC	Volatile Organic Compound

CERTIFICATION

All information/documentation provided accurately reflects the environmental condition of the Property. This Environmental Condition of Property (ECP) Report Update is in general accordance with the U.S. Department of Defense (DOD) requirements for completion of an ECP Report.

Mr. James E. Briggs
Acting Chief, Consolidated Branch
BRAC Division

3/3/2016
Date

The undersigned certifies the contents of this report are in general accordance with DOD policies for completion of an ECP.

Joseph F. Pearson
BRAC Technical Support
CALIBRE Systems, Inc.

3/3/2016
Date

EXECUTIVE SUMMARY

CALIBRE Systems, Inc., under contract to the Army, has prepared this Environmental Condition of Property (ECP) Report Update for the Fort Monmouth Phase 2 Parcels, hereinafter referred to as the "Property". The Property is located within the Main Post of Fort Monmouth in Oceanport and Eatontown Boroughs, Monmouth County, New Jersey. The Property encompasses approximately 578 acres and excludes Parcel B and the Patterson Clinic parcel, which were previously transferred. The marina and the two credit union parcels are included in this ECP Report Update but will transfer under separate deeds. The Army currently owns the land and buildings on the Property. The purpose of this ECP Report Update is to update the *U.S. Army 2005 BRAC Environmental Condition of Property Report, Fort Monmouth, Monmouth County New Jersey, January 29, 2007*. This Update evaluates the current conditions relative to the original ECP and recommends changes in property category for parts of the Phase 2 Property.

This ECP Report Update was prepared in accordance with 42 USC §9620(h)(4), Army Regulation 200-1 (December 27, 2007), the Department of Defense (DOD) *Base Redevelopment and Realignment Manual* (DOD 4165.77-M) and is in general conformance with the American Society for Testing and Materials (ASTM) Designation D 6008-96 (2014), *Standard Practice for Conducting Environmental Baseline Surveys*.

For purposes of planning the redevelopment and supporting the transfer of the property at Fort Monmouth, the Army and the Fort Monmouth Economic Revitalization Authority (FMERA) established plans to transfer certain property initially (Phase 1 Property) and then a second portion of the property (Phase 2 Property) at a later date. The Phase 1 Property included the Main Post Parcel B and Charles Wood Area Parcels C, C1, F, Howard Commons and the Golf Course less certain areas that were not ready for transfer ("carve outs"). Charles Wood Area Parcel E was transferred to FMERA separately from the Phase 1 Property transfer.

The primary mission of Fort Monmouth was to provide command, administrative and logistical support for Headquarters, United States Army Communications-Electronics Command (CECOM). CECOM is a major subordinate command of the United States Army Materiel Command and was the host activity. Fort Monmouth served as the center for the development of the Army's Command and Control, Communications, Computers, Intelligence, Sensors and Reconnaissance (C4ISR) systems.

In 2005, the United States Congress approved the Base Realignment and Closure (BRAC) Commission's recommendation to close Fort Monmouth by September 2011. The installation closed on September 15, 2011.

RECOGNIZED ENVIRONMENTAL CONDITIONS

The original ECP identified various Recognized Environmental Conditions (RECs) associated with the Property. These were summarized in the report and are presented in Appendix A. This ECP Update includes the following newly identified RECs as a result of this ECP Report Update:

- Parcel 96 - Building 565. This is the site of a former dry cleaning facility. Soil and groundwater are contaminated with perchloroethylene (PCE).

- Parcel 102. Site of former skeet range has potential for release of lead and polynuclear aromatic hydrocarbons (PAHs).

- Parcel 105. Site of former firing range has potential for release of lead.

- Polychlorinated biphenyls (PCBs) were identified as present at Buildings 1002, 1208 and 1209 in concrete surrounding former PCB transformers. The Army is currently remediating PCBs at those buildings.

The following environmental condition was identified which also warrants mention:

There is a potential that multiple former heating oil tanks still remain on the Property. This potential was evaluated and described in the *Final Addendum 1 Environmental Condition of Property Report, Unregulated Heating Oil Tanks (UHOT) Investigation Report, Fort Monmouth Oceanport, Monmouth County, New Jersey dated June 2014.* There is no indication of release from these unregulated heating oil tanks (UHOTs) so no action is planned by the Army.

Other conditions relevant to the Property include:

- Additional lead-based paint (LBP) surveys were conducted in select residential buildings in 2011 and 2014. The findings of the 2011 survey indicated that LBP was present but did not pose a risk based on its condition. The coated surfaces containing lead above actionable levels did not meet the definition of LBP free housing. However, the painted surfaces observed were found to be in good condition and met the definition of Lead Hazard Free, as defined by New Jersey Administrative Code (N.J.A.C.) 5:17-3.2(c). The September 2014 survey again found that the painted surfaces in each of the buildings tested exceeded actionable levels and did not meet the definition of LBP free housing and some locations indicated a LBP hazard. An update to the LBP survey was performed in July and August 2015 and a summary of the results are provided in Table 2. No LBP surveys have been conducted at non-residential buildings on the Property but, based on their age, it is assumed that these buildings contain LBP.

- A pre-transfer inspection for friable potential asbestos-containing material (PACM) was conducted in February and March 2015 in non-residential buildings not previously inspected for asbestos-containing material (ACM) and in buildings previously inspected. Friable PACM was identified in 29 of the 65 buildings undergoing initial inspection. Of the 127 buildings that were re-inspected, 53 buildings contained friable PACM. Additional follow-on inspections were performed in July and August 2015 to collect samples of potentially friable ACM and evaluate non-friable ACM in all buildings. The

ACM identified during asbestos surveys generally included floor tile, mastic, linoleum, ceiling tile, pipe fittings, pipe runs, transite panel board, various types of insulation, joint compound, flex connectors and debris. The inspection results are provided in Table 3. *See: Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015.*

- Mold and/or water staining were observed in 118 of the 192 buildings that were inspected or re-inspected for friable PACM in 2015. *See: Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015.*

Table ES-1 provides a Project Environmental Overview of conditions at the Property. This table provides a brief description of environmental conditions that were evaluated during the ECP Update process. Detailed information associated with this overview is provided in the remaining portion of the document in the designated section number identified.

Table ES-1. Project Environmental Overview

No.	Category	Comment	Affect CERFA Category?	Section No.
STORAGE				
1	Hazardous Substance UST Storage	None	No	NA
2	Exterior Hazardous Substance Storage	None	No	2.3.3.2
3	Interior Hazardous Substance Storage	None	No	NA
4	Petroleum UST Storage	Associated primarily with residential heating	No	3.3
5	AST Exterior Petroleum Storage	Associated primarily with emergency generators and active lift stations	No	3.3
6	Interior Petroleum Substance Storage	None	No	3.3
7	Radiological Material Storage	None	No	2.3.3.10
RELEASES				
8	Hazardous Substance Releases	At various parcels, see changed category from initial ECP	No	1.2 and 2.3.3.9
9	Petroleum Releases	At various USTs	No	3.3
10	Radiological Material Release	None	No	2.3.3.10
11	Surrounding Properties	No impacts to the Property	No	4.0
OTHER PROPERTY CONDITIONS				
12	Munitions and Explosives	None	No	7.2.3
13	Asbestos Containing Materials	ACM surveys conducted in 2015	No	7.2.2
14	Lead-Based Paint	Housing constructed prior to 1941 and contains lead based paint	No	7.2.1
15	Mold / Water Staining	Observed in numerous buildings	No	7.2.7
16	PCB Equipment	None	No	2.3.3.9
17	Radon	None	No	7.2.6
18	100-Year Floodplain	Portions of the Property are within	No	2.6
19	Historical Land Use	None	No	3.1
20	Coastal Zone Management	Portions of the Property are within	No	2.8
21	Wetlands	Limited areas contain wetlands	No	2.7

No.	Category	Comment	Affect CERFA Category?	Section No.
22	Biological Resources	None impacted	No	2.9
23	Cultural and Historic Resources	None impacted	No	2.10
24	Other Special Resources	None	No	NA
ADJACENT PROPERTIES				
25	Petroleum Release	Numerous fuel oil releases have occurred from residential UHOTs	No	5.0
26	Hazardous Substance Release	None	No	5.0

In accordance with ASTM Designation D5746-98 (2010), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, it is recommended that the various parcels at the Property be classified as follows. These recommended classifications do not include categorizing the parcels based on *de minimis* conditions that generally do not present material risk of harm to the public or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Note that Table ES-2 has been updated for the additional environmental activities undertaken since the original ECP.

TABLE ES-2
FORT MONMOUTH PHASE 2 PROPERTY
ENVIRONMENTAL CONDITION OF PROPERTY CATEGORIES

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
36	1	Buildings 200, 1212-1215 and 1227 UST-170-69 UST-200-2	Administrative and government tenant activities	Batteries associated with the UPS were present in association with computer/mission activities throughout the area. No release or disposal of hazardous substances or petroleum products has occurred and there has been no migration of such substances from adjacent areas. 1996 – UST-200-2 (fuel oil) removed. NFA approved January 10, 2003. 1998 – UST-170-69 (fuel oil) removed. NFA approved February 24, 2000.
36	1	Buildings 1150 and 1152 FTMM-09 (M-9 PCB Transformer, Building 1150)	Vail Hall / Communications and Supporting Administrative Offices	Transformers near Buildings 1150 and 1152 were tested and classified as Non-PCB Class Equipment in 1989-1990. NJDEP concurred with NFA on November 7, 1994.
36	1	Buildings 1206-1211	Mallette Hall / CECOM Labs	This area was used for administrative and government tenant activities. No release or disposal of hazardous substances or petroleum products has occurred and there has been no migration of such substances from adjacent areas.
37	2	FTMM-10 (M-10 Asbestos Storage Area) Building 1220 – Boiler Plant	Boiler Plant and M-10 Asbestos Storage Area	A 1980 Installation Assessment identified the M-10 site as an asbestos storage area adjacent to Building 1220. PA was conducted. No evidence of asbestos found. 1994 – NJDEP concurred with NFA on November 7, 1994. Numerous USTs were removed from the Boiler Plant (Building 1220).
38	7	Former Outdoor Firing Range (1940-1955 Pistol Range)	Former Outdoor Small Arms Firing Range	This parcel is included in the Fort Monmouth MMRP. The area has been a maintained grass-covered area for over 40 years. Due to the historic use of this site as a small arms firing range, the original ECP identified metals contamination in soil as a potential REC and recommended further evaluation. 2008 SI – 25 surface soil samples were collected from 24 borings in the former berm area and analyzed for TAL metals. No metals were reported above NJDEP RDCSCC/NRDCSCC and no COCs were identified for surface soil. SI recommended NFA. NJDEP did not concur with NFA on October 28, 2008 due to probable reworking of parcel soils and required a groundwater investigation for lead. Additional soil and groundwater investigation will be conducted.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
39	3 revised from 7	Building 1150	Vail Hall	This parcel is the area between Building 1150 and Mill Creek. Floor drains and a sump pump were present in the basement for high water table intrusion and discharged to Mill Creek via a basin behind the building. Building 1150 housed a large UPS room in the basement for communications backup and previous activities included film developing. 2008 – SI conducted. One surface soil sample was collected from the Building 1150 outfall. Detected analytes were below NJDEP NRDCSCC and no COCs were identified. NFA was recommended for soil. Current evaluation of the 2008 SI soil results indicates they are below current RDCSRS and NFA concurrence has been requested. Parcel 39 has been revised from ECP Category 7 to Category 3 because contaminant concentrations do not require a removal or remedial action.
40	5	FTMM-02	Former Landfill	Parcel 40 was investigated under the IRP as Site FTMM-02 and is the location of the former M-2 Landfill. The 8.1-acre landfill operated from 1964 until 1968 and was used for the disposal of domestic and industrial wastes. Various SI and RI studies were conducted over the years. Chlorobenzene, arsenic and lead were detected above NJDEP GWQC. NJDEP approved a remedial design which specified the use of Enzyme Enhanced Bioremediation to accelerate remediation of shallow groundwater. A CEA for site groundwater was included in the RAWP submittal. Subsequent RAs included injection of ORC® into shallow groundwater through the end of FY 2008. The cleanup strategy included continued compliance monitoring of groundwater and surface water as a key component of natural attenuation. Quarterly groundwater monitoring was conducted from 1997 through 2011. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which 16 monitoring wells were sampled for VOCs and pesticides. Benzene and chlorobenzene exceeded NJDEP GWQS in one monitoring well, M2MW03. A CERCLA compliant RI/FS is being prepared to document the anticipated presumptive remedy of landfill cover with continued MNA for ground water.
41	5	FTMM-59	Building 1122 Unknown Discharge	Parcel 41 was investigated under the IRP as Site FTMM-59. A Groundwater CEA was submitted to the NJDEP. VOCs present in groundwater at concentrations above NJDEP GWQS were remediated via enhanced bioremediation (HRC® injection) through FY08. Long

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				term monitoring of groundwater and surface water continues on a quarterly basis. Quarterly groundwater monitoring was conducted from 2007 through 2011. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which seven monitoring wells were sampled for TCL VOCs. No VOCs were detected above NJDEP GWQS. Discontinuance of groundwater sampling for 1122MW01 through 1122MW06 was recommended. One additional sampling round was recommended for 1122MW07 as a confirmatory sample for the absence of VOCs. NJDEP approved the recommendation on July 3, 2014. A CERCLA compliant RI/FS is underway to determine final remedy and will include sampling to define SVOCs, PAHs and lead in surface soil adjacent to Chemical Storage Shed and Paint Booth.
42	2	UST-1122-171	Former UST	Parcel 42 had a former UST that serviced Building 1122. 1994 – Fuel oil UST removed, contaminated soil over excavated. This UST site was incorporated into the IRP and remediation is ongoing. See FTMM-59 (Parcel 41).
43	7	1122	Do-It-Yourself Auto Repair and Craft Shop	This parcel encompasses Building 1122 (do-it-yourself auto repairs) and Building 1124 (car wash). Building 1122 is a hazardous waste generator and numerous areas of patched asphalt and old concrete pads have been noted. An oil/water separator (with vessel) and floor drains confirmed to be connected to sanitary system per 1993 floor plans. Two USTs were removed in the early 1990s. Related soil and groundwater contamination is being addressed under FTMM-59 (Parcel 41).
44	5	FTMM-03, 04, 05, 06 and 08	Former Landfills	The original ECP included the Former Skeet Range in Parcel 44. This site has been designated as a new parcel in this ECP Report Update. See Parcel 102. Parcel 44 includes IRP Sites FTMM-03, 04, 05, 06 and 08. The IRP sites are former landfills (M-3, M-4, M-5 and M-8) and a Burning Area (M-6). The investigation of the M-6 Burning Area was incorporated into field activities for the M-3 landfill. Various investigations have been performed at each of the landfills as well as groundwater investigations. On-going groundwater monitoring is occurring at some of the landfills. All landfills are in the process of having a CERCLA compliant RI/FS completed to document the presumptive remedy of capping. The sites are considered Category 5 as some level of groundwater remediation has been initiated at each site.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
45	2	UST-697-194 UST-697-195 UST-697-196	Former USTs	Parcel 45 had former USTs that serviced Building 697. 1990 – Three waste oil USTs removed. – Closure approved by NJDEP on January 10, 2003.
46	4	FTMM-07	M-7 Burning Area, Former Incinerator	This parcel was investigated under the IRP as Site FTMM-07 (M-7 Burning Area). The M-7 burning area was a former incinerator located within Building 697. The incinerator was used until 1990 for burning classified documents. Three USTs were removed in 1990. The incinerator was dismantled in 1993; NJDEP concurred with NFA on November 7, 1994. NJDEP concurred with NFA for the USTs on January 10, 2003.
47	3	FTMM-19	M-19 AOC 3 Former MP Sanitary Treatment Plant	The original ECP included the Former Pistol Range (1935-1940) in Parcel 47. This site has been designated as a new parcel in this ECP Report Update. See Parcel 105. 1975 – STP closed. 1981 – STP decommissioned and demolished. 1990 – NJDEP identified STP as an AOC. 1995 – SI conducted. Two soil samples and one sediment sample collected. No COCs exceeded NJDEP DCSCC or sediment criteria. 1996 – NFA concurred with by NJDEP on April 4, 1996.
48	5	FTMM-18	Former Training Area Former M-18 Landfill	The period of operation of the M-18 Landfill is unknown; however, the site has reportedly been in use as a military training area since 1919. Possible sources of contamination in or adjacent to the M-18 Landfill include spills from diesel and gasoline generators used to support field exercises, and from a riot control agent used in this area for troop protective mask training. This landfill has undergone various investigations and some initial groundwater remediation. The site is currently having a CERCLA compliant RI/FS completed to support the final remedy. Site is in the RI/FS phase. Preferred alternative is presumptive remedy of a landfill cover, engineering controls and institutional controls. Estimated 30-year landfill operations and maintenance. Proposed Plan/ Decision Document will follow and remedy will be implemented. Site is considered Category 5 since some level of groundwater remediation has been initiated.
49	7	145, 283, 288, 291, 292, 293, 295	Former Squier Laboratory Complex, Museum, Battery Test Facility	Building 283 was used for administrative space at the time of installation closure. Previous use included the Squier Laboratory – primary research and development laboratory until 1954 (when laboratory operations were transferred to Building 2700). Former repair/experimental work within this parcel included photographic

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				equipment, a battery test facility (which was destroyed by fire in the 1980s and subsequently rebuilt), climatic testing lab, plastics research and development. Numerous former buildings existed in this parcel that were associated with Squier Laboratory operations in the 1950s. Seven fuel oil USTs at Buildings 283, 288, 291, 292, 293 and 295 were removed in 1994 and 1997. NJDEP approved the tank closures in 2000. Building 283 soil and groundwater contamination associated with a former gasoline UST has been addressed under IRP Site FTMM-61 (Parcel 50). 2008 SI – Evaluated soil, groundwater and sediment. Analytical results for soil samples exceeded NJDEP NRDCSCC for B/Ns (PAHs) and Aroclor 1260. Aroclor 1260 and seven B/Ns identified as COCs in soil. SI recommended further delineation to determine if the PAHs were associated with asphalt paved surfaces. Benzene and bromodichloromethane in groundwater slightly exceeded NJDEP GWQC and were COCs in groundwater. They have been incorporated into the existing M-18 groundwater CEA. Parcel 49 remains an ECP Category 7 parcel because of the additional soil investigation required.
50	7 revised from 2	FTMM-54, Building 296 FTMM-55, Building 290 FTMM-61, Building 283	Former Fuel Distribution Facility, Former USTs	Three sites within this parcel are included in the IRP. FTMM-54 is a former abandoned fuel distribution facility that was removed during a renovation project at Building 296. Benzene and lead were present in groundwater above criteria and were addressed through MNA, which included quarterly groundwater monitoring. FTMM-55 is the site of a former UST system which was located at Building 290. Petroleum-contaminated soil was removed; lead and arsenic detections in groundwater were being addressed through MNA (including quarterly groundwater monitoring), while a request for a NFA determination was under review by the NJDEP. FTMM-61 is a former 3,000 gallon UST site at which petroleum-contaminated soil was removed and petroleum-related contaminants were present in groundwater. In-situ bioremediation (ORC® injection) was conducted through FY08 to address groundwater and groundwater LTM is ongoing. Within this parcel, 15 USTs that were removed had evidence of petroleum release during closure and were properly addressed via removal of contaminated soil. NFA approval letters were received for all 15 USTs. Contaminated groundwater is addressed through the FTMM

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				IRP as summarized above. The identification of VOCs in the groundwater in excess of criteria indicates vapor intrusion is a potential REC in this area. The 2008 SI identified two soil exceedances (PAH, PCB) in Parcel 50. These sampling points were part of the investigation of Parcel 49 and were not resolved. CERCLA compliant RI/FSs are underway to support site closures. Parcel 50 has been revised from ECP Category 2 to Category 7 due to the PCB and PAH soil exceedances from the Parcel 49 SI which require additional evaluation.
51	2	FTMM-11 (M-11 Elevated Water Tank) 750 Area Buildings 787, 788, 789 500 Area 600 Area 1100 Former Barracks	Motor Pool, Administrative, Barracks, Former USTs	1980 – Installation Assessment identified M-11 site as a potential AOC. PA conducted. No visible staining, stressed soil or vegetation or visible debris (i.e., paint chips) observed. 1994 – NJDEP approved NFA on November 7, 1994. 2008 – SI conducted (geophysical survey, soil and groundwater sampling) in 750 Area, 1100 Area (northern portion) and in portions of the 600 Area. Eleven suspected USTs identified. SI recommended NFA for soil and further evaluation of groundwater. NJDEP did not concur with NFA and required additional UST documentation in correspondence dated October 28, 2008. 2008-2011 – UHOTs were investigated in Parcels 14, 28, 51, 76, and 79. A total of 25 UHOTs were identified, removed and remediated in these parcels. A small parcel associated with the RCI investigation has been carved out from Parcel 51 – see new Parcel 98.
52	2	FTMM-53, Building 699	Gasoline Service Station	FTMM-53 is a former gasoline service station operated by AAFES. 1984 – Tank tightness test identified two leaking USTs. 1989 – Leak reported to NJDEP (Incident Number 89-10-19-1329). Estimated gasoline loss was 11,000 gallons. Leak identified in product piping. Faulty piping replaced. 1990 – 17 monitoring wells, 3 recovery wells and a product recovery system installed. A total of 6,733 gallons of product recovered. 1992-2007 – Twelve USTs, associated piping and limited impacted soils removed. 1997-2011 – Quarterly groundwater monitoring conducted. USTs replaced with two 10,000-gallon gasoline ASTs. 2000 – Enzyme-enhanced bioremediation of soil implemented. 2001 – Groundwater pump-and-treat system and soil vapor extraction/air sparge system installed and operating. 2007 – VI at Building 699 evaluated. 2011 – ASTs taken out of service at installation closure. 2012 – Additional VI evaluation at Building 699 conducted. 2013 – Baseline groundwater monitoring conducted.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				2014 – First quarter groundwater monitoring conducted. RI/FS to support site closure is currently underway. Note: PCE and TCE were detected in sub-slab soil gas samples during VI investigations at Building 699 and in site groundwater in 2010. The source appears to be the former dry cleaning facility at adjacent Building 700 (former Building 565). The chlorinated solvent detections at FTMM-53 are being addressed under FTMM-68, Building 700 Former Solvent UST.
53	2 revised from 4 (PAH and pesticides not CERCLA release)	700 Area	Former Housing	Extensive soil sampling and numerous UST removals were conducted as part of the Army's RCI and EUL programs. 2003 – Geophysical survey conducted. 2004 – Five historic USTs removed. SI conducted (49 Geoprobe® borings, 147 soil samples). RI conducted (16 soil samples, soil excavation, post-excavation sampling). 2005 – RAR recommending NFA submitted. 2007 – NJDEP did not concur with NFA and required a groundwater investigation and deed notification. The Army has determined that there were low levels of PAHs found that were due to anthropogenic conditions and not an actual release and that there were low levels of pesticides found due to the use of properly applied pesticides. Based on these facts, the Army has closed the site out at the SI stage. The NJDEP has not concurred with NFA at this parcel.
54	1	700 Area 800 Area	Athletic Field (Bldgs 817-820), Recreation/Picnic Shelters (Bldgs 815, 830), Non-Commissioned Officer Club (Bldg 702), Locker Room/Former Photo Lab/ Former Dental Clinic (Bldg 814), Sewage Lift Station (Bldg 752) Gas Meter House (Bldg 562), Cable Vault (Bldg 792) and Chlorinator Building (Bldg 793)	This parcel included a sewage lift station (Bldg 752) at which antifreeze was stored for an emergency generator, former dental clinic and photoprocessing facility utilized as a locker room (Bldg 814) and Lane Hall (Bldg 702) which was utilized for social events and food service. No release or disposal of hazardous substances or petroleum products has occurred.
55	2/5	FTMM-47, Building 1002	M47 - Former PCB Transformer	The credit union and former base post office were located in this parcel along with Building 1002. As part of the IRP, site FTMM-47 was established to address PCBs at various locations. A former PCB transformer was located within Building 1002 and was sampled in 1993 and analysis indicated a concentration of 8,400 mg/kg PCB in the concrete at the base of the transformer. To support the current

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				status of this potential PCB issue, chip samples from the current pad were collected and indicated concentrations from 0.1 to 0.75 mg/kg. In addition, soil samples were collected from beneath the pad and indicated PCBs above NJDEP criteria. The Army is currently remediating the PCBs in this area. This small area of Parcel 55 is considered a Category 5 property.
56	2 revised from 4	800 Area RCI Project	Former Housing	Extensive soil sampling and numerous UST removals were conducted as part of the RCI and EUL programs. 2003 – Geophysical survey conducted. Twelve historic USTs removed, contaminated soil excavated as required. SI conducted (75 Geoprobe® samples, 160 soil samples). 2003-2005 – RI/RA conducted. In RI, six rounds of delineation sampling conducted (85 soil samples). In RA, three rounds of soil excavation and post-excavation sampling conducted. 2005 – RAR recommending NFA submitted. 2007 – NJDEP did not concur with NFA and required a groundwater investigation associated with former USTs in the area). The Army has designated the areas as remediated under the RCI/EUL program as Category 4 (see new Parcels 99, 100 and 101). Based on the investigations to date, the ECP Category for Parcel 56, excluding the Category 4 areas, has been changed from Category 4 to Category 2.
57	7 for northern half; 1 revised from 7 for southern half	NA	Former Coal Storage and Railroad Unloading Area	Former coal storage and unloading area along former railroad in south central portion of Main Post. The original ECP identified the coal storage area as a REC. 2008 SI – 15 surface soil samples, 18 subsurface soil samples and six groundwater samples were collected to assess the former coal storage area. Seven VOs and 19 metals were reported in soils below the NJDEP NRDCSCC. Four of 17 B/Ns (PAHs) in surface soil samples exceeded NJDEP NRDCSCC and MPBCs and were COCs in soil (benzo[a]anthracene, benzo[a]pyrene, benzo[b]fluoranthene and benzo[k]fluoranthene). The SI recommended additional soil sampling in paved areas to determine if the PAHs in soil were attributable to the asphalt surfaces. Of the 10 metals detected in groundwater that exceeded the NJDEP GWQC, five were naturally-occurring and were not considered COCs. Five non-native metals (beryllium, cadmium, cobalt, lead and nickel) were reported above the NJDEP GWQC and MPBCs and were COCs in groundwater. The SI recommended further evaluation of metals in groundwater. On October 28, 2008, the NJDEP concurred with the recommendation for additional soil and groundwater sampling and

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				requested a RI of groundwater and analysis of soil samples for PCBs. The Army is in the process of completing a SI to further evaluate the soil and groundwater in this area. The portion of Parcel 57 near the former coal storage area remains an ECP Category 7. The Army has received NJDEP's concurrence on the change of the remainder of the parcel from a Category 7 to a Category 1. The preliminary results from the SI indicate that the area potentially impacted by PAHs extends into the area recently changed to Category 1, so those areas are considered Category 7.
58	2	UST-800-127 UST-801-129	Former USTs	Parcel 58 had former fuel oil USTs that serviced Buildings 800 and 801. 1995 – UST-801-129 removed, contaminated soil over excavated. 2002 – Closure report submitted. 2003 – Closure approved by NJDEP on January 10, 2003. 1998 – UST-800-127 removed, contaminated soil over excavated. One SVOC exceeded NJDEP GWQC in groundwater sample. 2000 – Monitoring well installed and sampled for four consecutive quarters. No detections above NJDEP GWQC in 2001 samples. 2001 – Closure report requesting NFA submitted. 2003 – Closure approved by NJDEP on January 10, 2003.
59	2	UST-804-130	Former UST	Parcel 59 had a former fuel oil UST that serviced former Building 804. 1995 – UST removed. 2002 – Closure report submitted. 2003 – Closure approved by NJDEP on January 10, 2003.
60	1	1077, 1078	Bachelor Officer Quarters	Residential housing area southwest of Patterson Army Health Clinic. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas.
61	1 revised from 7	Portion of former Clinic parcel	Portion of former Patterson Clinic parcel east of Guardrail Avenue	The original ECP categorized the portion of Parcel 61 located on the east side of Guardrail Avenue as an ECP Category 7. In a letter dated July 23, 2012, the Army submitted documentation to NJDEP requesting concurrence with its ECP Category 1 determination for this area. NJDEP concurred with the category determination on August 8, 2012.
63	2	UST-810-131	Former UST	Parcel 63 had a former fuel oil UST that serviced Building 810. 1998 – UST removed. 2000 – Closure report submitted. Closure approved by NJDEP on August 29, 2000.
64	5	FTMM-64, Building 812	Former Gasoline Distribution Area	Building 812 was a former gasoline station with USTs. The USTs were remotely filled from a railroad siding and the underground piping to fill the tanks started approximately 400 feet to the north of the UST. A RIR/RAWP was submitted to NJDEP and approved in 2003. The RIR identified eight VOCs in groundwater that exceeded

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				NJDEP GWQS. The RAWP proposed natural attenuation using HRC® injections to accelerate contaminant degradation. Groundwater remediation was implemented via enhanced bioremediation ((HRC®/ORC® injection) through FY08. Quarterly groundwater monitoring was conducted from 2003 through 2011. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which eight monitoring wells were sampled for TCL VOCs and lead. VOCs were below detection limits in the samples and a lead concentration of 7.5 µg/L in one well (812MW04) exceeded the NJDEP GWQS but was below background. Annual groundwater monitoring of 812MW04 for VOCs and discontinuation of metals analysis was recommended. NJDEP concurred with the recommendation on July 3, 2014. A CERCLA compliant RI/FS is being prepared to provide appropriate closure documentation.
65	2	FTMM-66, Building 886 AST, 250,000-gallon UST-886-140	Former Fuel Oil Storage Area	1970s – Fuel oil AST removed. 1998 – Fuel oil UST removed, contaminated soil over excavated. Extensive subsurface fuel contamination identified. 2002 – UST closure report submitted. 2003 – UST closure approved on January 10, 2003. 2002-2003 – RI conducted in two phases to delineate petroleum in soil and groundwater. A total of 4,000 tons of fuel-impacted soil excavated. 2003 – Product recovery system, five monitoring wells and eight recovery wells installed. 2003-2011 – Quarterly groundwater monitoring conducted. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which 13 monitoring wells were sampled for TCL VOCs, TCL SVOCs and lead. No analytes were detected in exceedance of their NJDEP GWQS. Discontinuance of groundwater sampling was recommended. NJDEP disagreed with the recommendation on July 3, 2014 and required continued groundwater monitoring of three wells for SVOCs and TICs. Groundwater monitoring is ongoing. A CERCLA compliant RI/FS is currently underway to support final property close out.
66	1	900 Area	Warehouses, Instructional Buildings, Heat Plant and Utility Building	This parcel included general storage (Buildings 908, 975 and 976) and the police station (Building 977). Building 901 was used in an administrative capacity and formerly housed radar training. Chemicals utilized in this operation included alcohols and Freon 113. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				The 2007 ECP included Building 978 Electrical Substation in Parcel 66. Sampling during the 2008 SI revealed a PCB exceedance in soil that required further investigation. The PCB site has been assigned a new parcel number (Parcel 97) and is identified an ECP Category 7 parcel herein.
67	2	UST-949-203	Former UST	Parcel 67 had a former diesel UST located on the northwestern side of Building 976. 1998 – UST removed, contaminated soil over excavated. 1999 – Groundwater sampled. TCE exceeded NJDEP GWQC. 2000 – One monitoring well installed. 2000-2001 – Four sampling events conducted. No NJDEP GWQC exceedances in groundwater. 2001 – Closure report submitted. 2003 – Closure approved by NJDEP on January 10, 2003.
68	2	900 Building Area Former USTs	Former Fuel Oil Storage Area	This parcel includes 12 former USTs. Petroleum discharges were identified at five of the USTs and associated petroleum-contaminated soil was remediated. NFA approval letters were received in 2000 (UST-909-147, UST-914-152, UST-977-204, and UST-979-205) and 2003 (UST-905-145). Lead acid batteries associated with an emergency generator are present at Building 979.
69	7	900	Former Vehicle Repair/ Motor Pool	Building 900 was a former vehicle repair/motor pool facility where solvent-based parts cleaners were used as part of routine vehicle maintenance activities. The building was used for general storage since 1996. 2008 SI – Included surface/subsurface soil, groundwater and sediment sampling to assess the potential impact of former building operations. No COCs were identified in soil at concentrations greater than the NJDEP NRDCSCC or IGWSCC; NFA was recommended for soil. PCE was detected slightly above the NJDEP GWQC in one groundwater sample. Further evaluation of groundwater was recommended. Six B/Ns and seven metals were detected in sediment at concentrations greater than the NJDEP Parcel 69 remains an ECP Category 7 parcel because of the additional soil and groundwater investigation required.
70	7	551	Classroom, Former (early 1950s) Photo processing	Former industrial processes included the use of carbon tetrachloride, benzol, acids, and photographic chemicals in an adjacent Quonset hut in the early 1950s. This facility was used for administrative and classroom activities at installation closure. 2008 SI – Three surface soil and four sediment samples were collected to assess the presence/absence of contamination from potential releases related to former photo processing activities in Building 551. Of the eight B/Ns, 17 metals and one arsenic detected in the soil samples, arsenic was

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				the only constituent reported above the NJDEP NRDCSCC. Due to natural and anthropogenic influences, arsenic was not considered a COC in soil. Six B/Ns and 17 metals were detected in sediment samples at concentrations below the NJDEP M/ESSG-ER-L. No COCs were identified in sediment. The SI recommended NFA for soil and sediment at Parcel 70. The NJDEP concurred with NFA for both media on October 28, 2008. NJDEP letter dated August 20, 2012 required additional work. PCB above residential standard in P70-SS1 and additional information on arsenic requested. Additional delineation for PCBs and potentially PAH is required.
71	5	FTMM-12 FTMM-14	Former Landfills	This parcel was investigated under the FTMM IRP as FTMM-12 (M-12 Landfill) and FTMM-14 (M-14 Landfill). Various investigations and remedial actions for groundwater were initiated. Currently both landfills are undergoing a CERCLA compliant RI/FS to support a final remedy at the sites.
72	1 (certain areas revised from 1 to 2 based on petroleum releases)	200 Area, 300 Area specifically Residential/Garage Units: Russel Avenue – Bldgs 211-216, 218-223, 229, 230/Bldgs 301-310, 312-314 Allen Avenue – Bldgs 224-228/ Bldgs 315-319 Gosselin Avenue – Bldgs 233-256, 258/Bldgs 331-336 Carty Avenue – Bldgs 261-269/ Bldgs 320-326	Residential Housing	This parcel includes residential housing along Gosselin Avenue, Sherrill Avenue, Allen Avenue and Signal Avenue, parade grounds, administrative offices in Building 286 (Russell Hall), former hospital in Building 209 and electronic research facilities in the northeastern portion of the parcel. With the exception of petroleum releases from UHOTs discussed below, no release or disposal of hazardous substances or petroleum products has occurred on the majority of the parcel, and there has been no migration of such substances from adjacent areas. Petroleum releases have occurred at former UHOTs associated with Buildings 211, 220, 225, 226, 233, 234, 237, 241, 243, 244/246, 251, 253, 254, 255, 256 and 261. The tanks have been removed and contaminated soil remediated. 2010 – One UHOT was located at 1-3 Allen Avenue. Tank was not removed due to proximity of garage structure and electrical/stormwater discharge lines. Upon inspection in June 2015, tank was empty but has not been properly closed.
73	2	UST-286-60	Former UST	Parcel 73 had a former fuel oil UST that serviced Building 286. 1998 – UST and 3 CY of contaminated soil removed. 1999 – Closure report submitted. 2000 – Closure approved by NJDEP on February 24, 2000.
74	2	205-208, 275, 282, 287	Former Fuel Oil USTs	Parcel 74 includes the fire house and existing housing southeast of Hildreth Avenue. 1993-2003 – Ten fuel oil USTs removed and

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				contaminated soil excavated. 2000 – Closure approved for six USTs on August 29, 2000 and October 23, 2000. 2003 – Closure approved for two USTs on January 10, 2003. Closure approvals NA for UST-204-4 and UST-287-61. Residential UHOTs do not require regulatory concurrence for closure.
75	3	FTMM-20	M-20 Pre-1941 Main Post Sanitary Treatment Plant	1941 – STP operation assumed discontinued. 1995 – IRP SI conducted (one sediment sample). Metals (arsenic, cadmium, chromium, zinc) slight exceeded NJDEP criteria. 2000 - RI completed. Additional sediment samples collected. Metals concentrations correlated with background levels. 2004 – RI report recommending NFA submitted. 2010 – BEE conducted. Two surface water and two sediment samples collected from Parkers Creek. COPECs included 12 metals in sediment samples. No COPECs found in surface water samples. BEE concluded low potential for ecological impact from COPECs. 2012 - NJDEP approved No Additional Ecological Assessment on August 27, 2012. 2015 – NJDEP concurred with NFA for the site on April 30, 2015.
76	2	200 Area 300 Area	Former Barracks	2007 – Geophysical survey conducted. Seven suspect USTs identified. 2007-2008 – Environmental sampling conducted (66 soil samples, 6 groundwater sample). 2008 – SI recommended NFA. 2008 – NJDEP did not concur with NFA on October 28, 2008 and required additional UST documentation. Army is currently evaluating this documentation.
77	2	UST-210-8	Former UST	Parcel 77 had a former fuel oil UST that serviced Building 210. 1994 – UST and 10 CY of contaminated soil removed. 1996 – Closure report submitted on February 26, 1996.
78	5	FTMM-15	M-15 Water Tank	This parcel was included in the Fort Monmouth IRP as Site FTMM-15 (M-15 Water Tank). 1995 – IRP SI conducted. Two pesticides (4,4'-DDE and 4,4'-DDT) and three metals (cadmium, lead and zinc) in soil exceeded NJDEP DCSCC. 1999 – RA conducted. Contaminated soil removed. 2010 – BEE conducted. Three surface water and four sediment samples in Parkers Creek evaluated for COPECs (pesticides and metals). BEE concluded low potential for ecological impact from COPECs. NJDEP concurred with Army's determination of No Additional Ecological Assessment on August 27, 2012. Army is preparing a post-RAR recommending NFA for site FTMM-15.
79	2	142, 494, Building 74 Former Tank Farm	Bulk Fuel Oil Storage Facility	This parcel included a facility that was a former aboveground bulk fuel storage tank farm consisting of two 210,000 gallon tanks and a tank truck unloading rack associated with Building 74. The tanks

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				were of steel construction and stored No. 2 heating oil. The tanks were originally installed to provide Fort Monmouth with a 30-day backup supply of fuel oil. Earthen dikes provided secondary containment for each storage tank. The total capacity for each containment area was approximately 250,000 gallons. 1995 – Fuel was removed from ASTs and product lines. ASTs were cleaned and dismantled. Scrap metal was recycled. 1997 – Product lines and piping were removed and approximately 750 CY of contaminated soil were excavated. Fifty-seven post-excavation soil samples were collected from piping excavations with no exceedances of RDCSCC (10,000 mg/kg TPHC). Site remediation was completed on April 16, 1997. 1998-1999 – Three rounds of groundwater sampling were conducted from five locations at Building 74 with no exceedances of groundwater criteria. No additional actions were recommended for the site. 2000 – Closure report submitted to NJDEP on August 3, 2000. NJDEP concurred with NFA on August 29, 2000.
80	7	Former Buildings 105 and 106	Former Photo processing	2008 SI – Nine soil samples and three groundwater samples were collected to determine the impact of historic building operations in the area of former Buildings 105 and 106. Seven VOs, 14 B/Ns and 19 metals were detected in soil below NJDEP NRDCSCC and IGWSCC. No COCs were identified in soil and NFA was recommended. Of the 18 metals reported in groundwater samples, aluminum, beryllium, iron and manganese exceeded GWQC. These metals were considered related to glauconitic sands and were not considered COCs. Beryllium was identified as a groundwater COC. The SI recommended NFA for soil and further evaluation of beryllium in groundwater. On October 28, 2008, NJDEP requested additional information regarding the basis for selection of soil sample locations and a groundwater RI for beryllium. Parcel 80 remains an ECP Category 7 parcel because of the additional groundwater investigation required.
81	5 revised from 4	FTMM-16, Building 498	Former Pesticide Storage Area	Pesticides were stored and mixed in Building 498 during the 1940s and 1950s. Prior to installation closure, Building 498 was used for miscellaneous storage. 1993 – SI conducted. Five pesticides exceeding NJDEP RDCSCC were detected in surface soil samples; no pesticide exceedances of NJDEP GWQS in groundwater samples. 1997-1999 – Pesticide-contaminated soil was excavated in three phases. 2010 – BEE conducted. Evaluated surface water and sediment

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				(Oceanport Creek). COPECs included hexachlorobutadiene and 12 metals in sediment. BEE concluded low potential for ecological effects from COPECs and recommended No Additional Ecological Assessment. NJDEP approved the BEE on August 27, 2012. 2011 – Monitoring wells installed. No contaminant impact to groundwater. Army submitted RAR recommending land use controls for soil exceedances above NJDEP RDCSRS. 2012 – NJDEP requested boundary delineation of contaminant exceedances on March 7, 2012. Additional delineation of soil to NJDEP RDCSRS conducted. The Army provided a submittal using compliance averaging to support an unrestricted use remedy at the site. Additional work to support the compliance averaging is continuing. Based upon the ongoing work, the ECP Category for Parcel 81 has been changed from Category 4 to Category 5.
82	5 revised from 4	400 RCI Area	Remediated Soil Contamination in 400 Area	PCB-contaminated soil was excavated to below NJDEP cleanup criteria and disposed offsite in 2005 as part of the Army's RCI and EUL programs. 2004 – Geophysical survey conducted. SI conducted (17 borings, 45 soil samples). RI conducted (seven rounds of delineation sampling, 70 soil samples). RA conducted (two rounds of excavation and post-excavation sampling). 2005 – RAR requesting NFA submitted. 2007 – NJDEP disapproved NFA and required a groundwater investigation and deed notification. The ECP Category for Parcel 82 has been changed from Category 4 to Category 5 due to the ongoing nature of the remedial actions required.
83	7 (part unaffected revised from 7 to 2)	109	Former Vehicle Maintenance Former Photoprocessing, Former Maintenance Shops (Carpentry, Plumbing, Heating, HVAC, Electrical); Former Coal Storage	2008 SI – Data gaps investigated during the SI included potential historic industrial and vehicle-related activities and the former coal storage area. The SI included 31 surface and 33 subsurface soil samples and 15 groundwater samples. Nine VOs, 25 B/Ns and 21 metals were detected in soil samples. Four of the 25 B/Ns reported exceeded NJDEP NRDCSCC and MPBC. Arsenic and lead exceeded the NJDEP NRDCSCC and MPBC. Arsenic was not considered a COC due to naturally-occurring and anthropogenic influences. Lead and four B/Ns (benzo[a]anthracene, benzo[a]pyrene, benzo[b]-fluoranthene and dibenz[a,h]anthracene) were COCs in soil. The SI recommended resampling of COCs in soil to determine if the PAHs detected were attributable to paved asphalt surfaces. No COCs were identified in groundwater and the SI recommended NFA for

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				groundwater. On October 28, 2008, the NJDEP concurred with NFA for groundwater. On July 10, 2012 NJDEP requested additional sampling and delineation of B/Ns, PCE and metals in soil. Parcel 83 remains an ECP Category 7 parcel because of the additional soil investigation required. The remaining areas within Parcel 83 were re-categorized to a Category 2 as there were potential petroleum released from former USTs.
84	5	FTMM-56, Former Building 80	Former #2 Fuel Oil USTs	This parcel was investigated under the FTMM IRP as Site FTMM-56 (Building 80). Two UST closures were conducted under the Fort Monmouth UST Management Program. A former #2 fuel oil UST and 56 CY of petroleum-contaminated soil were removed in 1998. Gasoline-related constituents and one pesticide were detected at concentrations above the NJDEP GWQC. In 2000, a UST adjacent to Buildings 80/166 was removed and approximately 24 CY of potentially contaminated soil was excavated. The DPW conducted an RI, including quarterly groundwater monitoring, from 1997 to 2001 to define the areal extent of the potential pollutants and evaluate adverse impacts to groundwater. Two pesticides and two metals were identified as potential COCs. Based on the assessment of their migration potential in the 2005 RIR, NFA was recommended for the pesticides and metals in groundwater. Quarterly groundwater monitoring was conducted from 1997 through 2011. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which six monitoring wells were sampled for lead. Lead was not detected above NJDEP GWQS. Lead and pesticide analyses were recommended for one additional sampling round for 80MW05 and 80MW02, respectively. Pesticides analysis was recommended due to historical chlordane exceedances. On July 3, 2014, NJDEP concurred with the recommendation for pesticide analysis but required sampling of 80MW05 for TAL Metals. A CERCLA compliant RI/FS is underway to support final remedy selection.
85	2	UST-116-9	Former UST	Parcel 85 had a former fuel oil UST that serviced Building 116. 1994 – UST removed, contaminated soil over excavated. 2000 – Closure report submitted. Closure approved by NJDEP on October 23, 2000.
86	2	UST-117-72	Former UST	Parcel 86 had a former fuel oil UST that serviced Building 117. 1994 – UST and 10 CY of contaminated soil removed. 1998 – Closure report documenting NFA completed. Report forwarded to NJDEP.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
87	2	UST-64-4 UST-65-5 UST-161-14 UST-161-68 UST-173-19	Former USTs	Parcel 87 had five former USTs that serviced former Building 64 (fuel oil), former Building 65 (fuel oil), former Building 161 (fuel oil, waste oil) and Building 173 (fuel oil). 1990-1996 – USTs and contaminated soil removed. Closure reports submitted. Closures approved by NJDEP on October 23, 2000 (UST-64-4), August 29, 2000 (UST-65-5), January 10, 2003 (UST-173-19).
88	4	FTMM-17, Former Building 65	M-17 Former Pesticide Storage Area	Early 1980s – Pesticide operations at Building 65 discontinued. 1990 – SI conducted (eight soil borings, 16 soil samples, one groundwater sample). Chlordane reported in two soil samples. Chlordane was consistent with termite control practices in the 1980s. No chlordane detection in groundwater sample. 1994 – NJDEP concurred with NFA on November 7, 1994.
89	2	UST-64-3 UST-485-57	Former USTs	Parcel 89 had two fuel oil USTs that serviced former Buildings 64 and 485. 1995 – UST-64-3 removed. 2000 – Closure report submitted. Closure approved by NJDEP on August 29, 2000. 1995 – UST-485-57 removed. Contaminated soil over excavated following demolition of Building 485. Groundwater sampled. 2000 – Closure report submitted. Closure approved by NJDEP on August 29, 2000.
90	5	FTMM-57 (Former Building 108 USTs)	Five Former #2 Fuel Oil USTs	Five USTs located north of Building 488 (which is north of former Building 108) were removed in 1993. TPHC was detected in 29 pre-excavation soil samples collected in 1992-1993. Benzene at levels that exceeded the proposed NJDEP IGWSCC was reported in two of 18 post-excavation samples. One UST located immediately adjacent to former Building 108 was removed in 1994. TPHC was detected in five of the eight pre-excavation soil samples below NJDEP Soil Cleanup Criteria. DPW conducted a RI, including quarterly groundwater monitoring from 1997 to 2001 (18 quarters) and a Geoprobe® investigation in 2001 to define the areal extent of the potential pollutants and evaluate adverse impacts to groundwater. Arsenic was identified as a COC in groundwater. A supplemental soil sampling in 2001 did not find a localized source for the arsenic. Computer modeling indicated little potential for significant COC impact into Oceanport Creek. Quarterly groundwater monitoring was conducted from 2007 through 2011. Groundwater monitoring resumed in August 2013 with a Baseline Sampling Event in which four monitoring wells were sampled for TCL VOCs, pesticides and TAL Metals. No VOCs or pesticides were detected above their NJDEP GWQS. Two additional rounds of groundwater sampling for lead from 108MW04 and

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				discontinuance of groundwater sampling for the remainder of the site monitoring wells was recommended. NJDEP concurred with the recommendation on July 3, 2014. A CERCLA compliant RI/FS is underway.
91	2	UST-280-25	Former UST	Parcel 91 had a former fuel oil UST that serviced Building 280. 1993 – UST removed, contaminated soil over excavated. 2000 – Closure report submitted. Closure approved by NJDEP on October 23, 2000.
92	2	UST-484-56	Former UST	Parcel 92 had a former fuel oil UST that serviced Building 484. 1995 – UST removed, 13 CY of contaminated soil over excavated. 1998 – Closure report submitted. 2000 – Closure approved by NJDEP on August 29, 2000.
93	2	UST-482-54	Former UST	Parcel 93 had a former fuel oil UST that serviced Building 482. 1994 – UST removed, contaminated soil over excavated. 2002 – Closure report submitted. 2003 – Closure approved by NJDEP on January 10, 2003.
94	2	UST-164-15 UST-277-24	Former USTs	Parcel 94 had two former fuel oil USTs that serviced former Buildings 164 and 277. 1997 – USTs removed, contaminated soil overexcavated. 2002 – Closure reports submitted. 2003 – Closures approved by NJDEP on January 10, 2003.
95	4	PCB Transformer Leak near Buildings 454 and 456	Pole-Mounted PCB Transformer Leak	1992 – Two pole-mounted transformers leaked 75 gallons of PCB-contaminated transformer oil onto the ground. Leaking transformers properly disposed with 50 CY of PCB-contaminated soil. Two rounds of confirmatory soil samples collected. Army submitted report detailing NFA determination on February 12, 2015. NJDEP concurred with NFA on April 29, 2015.
96	5 revised from a 2	FTMM-68, Building 700 Solvent UST	Former Dry Cleaning Facility	2010 – PCE was detected at 1.7 and 2.3 µg/L in two monitoring wells at adjacent site FTMM-53. The wells are hydraulically downgradient of the contamination source (former solvent UST) at FTMM-68; migration to the wells may have been influenced by the operating pump and treat system at FTMM-53. 2011 – A 500-gallon UST was removed. The tank was heavily corroded with several holes at the end of the tank. Approximately 450 gallons of contaminated water were removed and drummed from the UST prior to removal. Six post-excavation soil samples were collected and analyzed for VOCs plus TICs (VOC+10). PCE was detected in two of the samples at concentrations that exceeded the NJDEP RDCSCC. Two monitoring wells were installed to depths of 15 and 23 feet below ground surface; however, no groundwater samples were collected. 2012 – VI survey conducted in Building 700. Ambient air, indoor air and sub-slab soil-gas samples were collected. PCE was detected in one sub-slab

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
				soil-gas sample below the residential and non-residential soil gas screening levels for PCE. Chloromethane was detected in ambient air/indoor air samples but was below the residential and non-residential indoor air screening levels for chloromethane. Survey concluded the VI pathway for PCE and other targeted chlorinated VOCs at Building 700 was incomplete. 2013 – Groundwater sampling was initiated as part of the August 2013 Baseline Sampling Event. PCE, TCE, cis-1,2-dichloroethene and vinyl chloride exceeded NJDEP GWQS in groundwater samples. 2013 – An RI/FS work plan was submitted to NJDEP. 2014 – A RI/FS is underway. FTMM-68 was located within Parcel 51 (ECP Category 2) in the original ECP. For purposes of this ECP Update, the site has been designated as new Parcel 96. Based on the ongoing chlorinated solvent remediation, the ECP Category has been changed from Category 2 to Category 5.
97	5 revised from a 1	978	Electrical Substation	This facility is an electrical substation constructed in 1954. It is located adjacent to Building 978 and serves as the delivery point for metering electrical power to the Main Post. The substation consists of three transformers that contain non-PCB oil. Based on the period of operation, it is likely that previous operations included the use of PCB-containing equipment. 2008 SI – Ten surface soil samples were collected at the electrical substation for PCB analysis. No PCBs exceeded the NJDEP NRDCSCC; however, Aroclor 1260 exceeded the NJDEP RDCSCC in one sample. The SI requested NFA. On October 28, 2008, NJDEP requested a deed notice with institutional controls for this area. On August 1, 2012, in response the NJDEP's July 10, 2012 letter, the Army submitted a proposed sampling plan to resample and fully delineate the Aroclor 1260 exceedance. NJDEP approved the Army's proposed sampling plan on September 10, 2012. The original ECP included the Building 978 electrical substation in Parcel 66, an ECP Category 1 area. For purposes of this ECP Update, because additional investigation was required and action is being taken, Building 978 is identified as an ECP Category 5 area in new Parcel 97.
98	5 revised from a 2	Parcel 51 (700 Area) Carve Out	Former Pesticide Application Area	See the Parcel 53 parcel summary. The potential PCB contamination in Parcel 98 will be evaluated as part of the 700 Area remediation effort. This parcel is considered a Category 5 carve out in the 700 Area.

ECP Parcel Number	ECP Category	Building Numbers/ Site Name	Description	Parcel Summary
99-101	4	Parcel 56 Areas of Concern	Former Pesticide Application Area	See the Parcel 56 parcel summary. A NFA request for these areas was submitted to NJDEP on June 12, 2015 and subsequently concurred with by NJDEP on November 9, 2015. These parcels are considered Category 4.
102	7 revised from 5	Former Skeet Range	Former Recreational Range	The original ECP included the Former Skeet Range in Parcel 44 along with several former landfills. Current mapping overlays the skeet range over portions of Landfills M-3, M-5 and M-8. The skeet range was operational from 1940 to approximately 1955. Munitions use was limited to small arms ammunition based on the range type and clay pigeons were assumed to be used as targets. Clay targets are known to accumulate approximately 300 feet from the firing arc on a skeet range and lead shot approximately 600 feet from the firing arc. Because no evaluation of the Former Skeet Range has been conducted, the Former Skeet Range has been designated as new Parcel 102 and is classified as an ECP Category 7 parcel.
103, 104	7	Parcel 83 Carve Outs	Motor Pool and Industrial Areas	As part of the SI 2008 soil samples were collected to evaluate potential releases from industrial operations and former motor pool areas. PAHs were detected at the locations of these two carve outs and are required to be further evaluated with the other additional investigations planned for Parcel 83.
105	7 revised from 3	Former Pistol Range (1935-1940)	Former Small Arms Range	The site was a small arms range used from 1935 to 1940. Range structures and the backstop berm were assumed to have been removed/demolished in 1940 for construction of the STP. The soil in this area has been extensively reworked since 1940. The 2006 HRR concluded that no investigations of the Former Pistol Range have been conducted within the berm area. The Army plans an investigation to assess potential lead impacts. Because no evaluation of the Former Pistol Range has been conducted, it has been designated as new Parcel 105 and is classified as an ECP Category 7 parcel.
106	5	Building 1208 PCB Transformer	Elevated PCB concentration in historic concrete chip sample from transformer in Building 1208.	Requires additional concrete chip sampling to evaluate current potential PCB impact and, therefore, is an ECP Category 7.
107	5	Building 1209 PCB Transformer	Elevated PCB concentration in historic concrete chip sample from transformer in Building 1209.	Requires additional concrete chip sampling to evaluate current potential PCB impact and, therefore, is an ECP Category 7.

1.0 INTRODUCTION

CALIBRE Systems, Inc. was authorized to prepare an Environmental Condition of Property Report Update for the Fort Monmouth Phase 2 Parcels, hereinafter referred to as the "Property". The Phase 2 Parcels encompass approximately 578 acres of land and are located within the Main Post of Fort Monmouth in Oceanport and Eatontown Boroughs, Monmouth County, New Jersey. The Property excludes Parcel B and the Patterson Clinic parcel, which were previously transferred. The marina parcel and two credit union parcels are included in this ECP Report Update and will transfer under separate deeds. In support of the ECP Report Update, a visual reconnaissance was conducted on August 19, 2014. The purpose of the visit was to perform a site reconnaissance and obtain information indicating the environmental condition of the Property and to determine any change in conditions from the original ECP prepared in January 2007, in preparation for a scheduled disposal of the Phase 2 Parcels to FMERA.

1.1 PURPOSE OF ENVIRONMENTAL CONDITION OF PROPERTY REPORT

The primary purposes of the ECP Report Update were to evaluate the environmental condition of the Property and to determine if conditions have changed from the original ECP or if new information was available to update the previous property category.

According to §4.6.1 of ASTM Designation D 6008-96 (2014) *Standard Practice for Conducting Environmental Baseline Surveys*, "users and environmental professionals may use information in prior Environmental Baseline Surveys (EBSs) provided such information was generated as a result of procedures that meet or exceed the requirements of this practice or accurately state the limitations of the information presented." The original ECP (January 2007) was reviewed and found to meet the requirements set forth in §4.6.1 of ASTM D 6008-96 (2014) and the narrative discussion and findings of that report are incorporated by reference into this ECP Report Update as if contained here in its entirety.

1.2 SCOPE OF SERVICES

The ECP Report Update scope of services for the Property includes the following activities:

- Conduct a visual inspection of the Property and any buildings, structures, equipment, pipe, pipeline or other improvements on the Property and a physical inspection of adjacent properties to determine the current conditions.
- Detailed review of the prior ECP (*U.S. Army 2005 BRAC Environmental Condition of Property Report, Fort Monmouth, Monmouth County New Jersey, Final, January 29, 2007*) and the subsequent Site Investigation (SI) (*U.S. Army BRAC 2005 Site Investigation Report, Fort Monmouth Final, July 21, 2008*).
- Review of reasonably available standard Federal, state and local government records pertaining to the Property, including available maps.

- Interviews with current personnel involved in operations on the Property.
- Identification of sources of contamination on the Property and on adjacent properties which could migrate to the Property during Army ownership.
- Identification of ongoing response action or actions that have been taken at or adjacent to the Property.

This ECP Report Update adheres to Army Regulation 200-1 (December 13, 2007), DOD 4165.77-M (March 1, 2006) and follows ASTM Designation D 6008-96 (2014), *Standard Practice for Conducting Environmental Baseline Surveys* as a guideline when not inconsistent with Army regulations and other applicable Army guidance.

This ECP Report Update covers the Phase 2 Parcels, approximately 578 acres of the Fort Monmouth Main Post located in the Townships of Oceanport and Eatontown, Monmouth County, New Jersey, excluding Parcel B and the Patterson Clinic parcel, which have been transferred. The marina parcel and two credit union parcels are included in this ECP Report Update and will transfer under separate deeds. This ECP Report Update recommends re-classification of various parts of the Property into one of seven DOD Environmental ECP categories as defined by the ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*.

- Parcel 50

Parcel 50 was initially classified as ECP Category Type 2 based on the release of petroleum products from numerous underground storage tank (UST) systems within the parcel. Parcel 50 is contiguous with and lies within Parcel 49, an ECP Category Type 7 area. A subsurface investigation of Parcel 49 during the 2008 SI identified two sampling locations in Parcel 50 with PCB and PAH exceedances in soil that were not subsequently delineated. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 50 has been reclassified as an ECP Category Type 7 parcel because it requires additional evaluation.

- Parcel 53

Parcel 53 was initially classified as ECP Category Type 4 based on the identification of heptachlor- and PAH-contaminated soil that exceeded New Jersey Department of Environmental Protection (NJDEP) Non-Residential Direct Contact Soil Cleanup Criteria (NRDCSCC). Historically, approximately 30 barracks buildings heated with fuel oil stored in individual UHOTs occupied the 700 Area of Parcel 53 and the southwestern margin of Parcel 51. The status of the USTs was unknown after the buildings were demolished in the 1960s. These issues were subsequently evaluated and reported in the *Final Remedial Action Report for the 800, 700, and 400 Areas, U.S. Army Installation Fort Monmouth, Fort Monmouth, New Jersey, October 2005*. Five historic USTs were subsequently identified and removed in 2004. There was evidence of petroleum releases from two of the USTs and the contaminated soil was removed.

The Army has determined that there were low levels of PAHs found that were due to anthropogenic conditions and not an actual release and also that there were low levels of pesticides found due to the use of properly applied pesticides. Based on these facts the Army has closed the site out at the SI stage. The NJDEP has not concurred with no further action (NFA) at this parcel. Based on this evaluation the property classification is changed from an ECP Category Type 4 to an ECP Category Type 2 parcel.

- Parcel 56 / Parcels 99, 100 and 101 Areas of Concern

Parcel 56 was originally classified as ECP Category Type 4 based on the installation's remediation of PAHs, 4,4'-dichlorodiphenyltrichloroethane (4,4'-DDT) and arsenic in soil at concentrations exceeding the NJDEP Residential Direct Contact Soil Cleanup Criteria (RDCSCC). Historically, approximately 60 barracks buildings occupied the 800 Area of Parcel 56. The buildings were heated with fuel oil that was stored in individual UHOTs at the buildings. The status of the UHOTs was unknown when the buildings were demolished in the 1960s. These issues were subsequently evaluated and remediation implemented and reported in the *Final Remedial Action Report for the 800, 700, and 400 Areas, U.S. Army Installation Fort Monmouth, Fort Monmouth, New Jersey, October 2005*. Twelve historic USTs were identified and removed from Parcel 56 in 2003. There was evidence of petroleum releases from five of the tanks and the contaminated soil was removed. NJDEP still requires groundwater evaluation at two of the UST locations.

During the SI, PAHs, PCBs, 4,4'-DDT and arsenic were identified as constituents of concern (COCs) in soil at Parcel 56. The remedial investigation (RI) and remedial action (RA) phases included delineation and excavation/disposal of the contaminated soil that exceeded the NJDEP RDCSCC. The three areas of concern (AOCs) which have been designated herein as new ECP Parcels 99, 100 and 101 were remediated to residential standards and NJDEP concurred with NFA for these areas on November 9, 2015.

Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcels 99, 100 and 101 are currently considered Category 4 as remediation has been completed to NJDEP criteria. The remainder of Parcel 56 has been re-categorized from ECP Category Type 4 to ECP Category Type 2 based on the historical petroleum product releases that also occurred on the parcel.

- Parcel 57

Parcel 57 was originally classified as ECP Category Type 7 based on the former industrial usage of the property and the need to further evaluate certain areas of the parcel and close out certain environmental issues. Parcel 57 was identified as a former coal storage and fuel unloading area along the former railroad in the vicinity of Buildings 800, 801 and 1007. The primary issues associated with Parcel 57 were the former coal storage area and the fuel unloading area. The potential for releases from these areas was subsequently evaluated and

reported in the *U.S. Army BRAC 2005 Site Investigation Report Fort Monmouth, Final July 21, 2008*. That evaluation indicated that potential releases in soil and groundwater were limited to the former industrial area located on the northeastern side of Lane Avenue. A Supplemental Phase II SI is underway in this portion of Parcel 57 to characterize potential PCB contamination in surface and sub-surface soil attributable to historical site activities and to evaluate PAHs in surface soil in excess of regulatory criteria for the evaluation of future risk. *See: Final Environmental Condition of Property Supplemental Phase II Site Investigation Work Plan for Parcels 28, 38, 39, 49, 57, 61 and 69 for Remedial Investigation / Feasibility Study / Decision Documents, Rev. 0, February 2015.*

Industrial activities were not historically associated with the portion of Parcel 57 located northeast of Communications Avenue and southwest of Lane Avenue. The land was historically undeveloped. Currently, this area is comprised of four administrative/general purpose buildings, minor landscaping and parking areas. There are no existing or former aboveground storage tanks (ASTs) or USTs associated with these buildings or located on this portion of Parcel 57.

The original ECP classified Parcel 57 as ECP Category Type 7. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, a portion of Parcel 57 has been re-categorized as an ECP Category Type 1 area because no release or disposal of hazardous substances or petroleum products or their derivatives has occurred (including no migration of these substances from adjacent properties). Army correspondence requesting concurrence with the re-categorization of a portion of Parcel 57 to ECP Category Type 1 was submitted to NJDEP on June 26, 2015. Concurrence was received from NJDEP on August 5, 2015. Preliminary data from the SI being conducted at Parcel 57 indicates that some of the area re-categorized to a Category 1 should remain as a Category 7. This ECP Update has adjusted the Category 7 portion of Parcel 57 to reflect this updated information.

- Parcel 72

Parcel 72 was initially classified as ECP Category Type 1 based on the absence of releases or disposal of hazardous substances or petroleum products and no migration of such substances from adjacent areas. Based on a review of installation records during this ECP Report Update process, it was recognized that petroleum releases had occurred from numerous UHOTs associated with the residential housing units in Parcel 72. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 72 has been reclassified as an ECP Category Type 1/2 parcel because the release or disposal of petroleum products or their derivatives has occurred.

- Parcel 81

Parcel 81 was initially classified as ECP Category Type 4 based on the completion of RAs in 1999 to remove pesticide-contaminated soil. The contaminated soil was remediated to NRDCSCC and some pesticides remained at levels above residential but below non-residential

levels. In 2012, NJDEP required a deed notice and additional delineation to define the boundary of the cleanup that was below residential cleanup levels. The delineation was performed and a report submitted to NJDEP. The deed notice has not yet been submitted. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 81 has been reclassified as an ECP Category Type 5 parcel because release, disposal, or migration, or some combination thereof, of hazardous substances has occurred and removal or remedial actions, or both are underway, but all required actions have not yet been taken.

- Parcel 82

The 400 Area in Parcel 79 is approximately 80 acres in size and encompasses open mowed fields extending east of Oceanport Avenue, north of Hazen Drive and south of Riverside Avenue. Parcel 82, located within the 400 Area and part of the Residential Communities Initiative (RCI) program, includes an area of remediated PCB soil.

SI, RI and RA activities were conducted in 2004 in the 400 Area. *See: Remedial Action Report for the 800, 700 and 400 Areas, U.S. Army Installation Fort Monmouth, Fort Monmouth, New Jersey (October 2005).* The primary objective of these activities was the characterization of environmental conditions and the performance of RAs including the removal and disposal of all soil with concentrations above NJDEP criteria. A secondary objective was to identify, locate and remove historic USTs and/or buried construction debris.

The SI conducted in 2003 consisted of 17 borings advanced in a grid on 50-foot centers. A total of 45 soil samples were collected. Five borings (400-B6, 400-B7, 400-B10, 400-B14 and 400-B15) had concentrations of SVOCs and/or PCBs above the NJDEP NRDCSCC. The contaminated areas did not correlate with the anomalies identified during the geophysical survey. The Army considered that the potential source of the SVOCs was the breakdown of petroleum-based products historically used as carriers during normal application of pesticides to landscaped areas. The COCs identified in soil in the 400 Area were benzo(a)pyrene and PCBs.

The RI and RA phases were conducted in 2004. Seven rounds of delineation sampling were performed during the RI with a total of 70 samples collected. Subsequent to delineation sampling, two rounds of excavation and post-excavation sampling were conducted. Total excavation depths ranged from 1 to 2.5 feet below ground surface. All areas where delineation samples indicated concentrations greater than the NRDCSCC were excavated during the RA. The remedial action report (RAR) recommended NFA for semi-volatile organic compound (SVOC) and PCB contamination in the 400 Area. In correspondence dated September 5, 2007, NJDEP did not concur with NFA and required a groundwater investigation due to the known releases and a deed notification for any soil remaining that was not remediated to NJDEP RDCSCC.

The five AOCs are contained within Parcel 82. The original ECP classified Parcel 82 as ECP Category Type 4. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 82 has been re-categorized as an ECP Category Type 5 area because release,

disposal, or migration, or some combination thereof, of hazardous substances has occurred and removal or remedial actions, or both are underway, but all required actions have not yet been taken.

- Parcels 83, 103 and 104

Parcel 83 was originally classified as ECP Category Type 7 based on the former industrial usage of the property and the need to further evaluate certain areas of the parcel and close out certain environmental issues. The primary issues associated with Parcel 83 were potential historic releases from former motor vehicle maintenance and repair facilities, previous shop activities, a former coal storage area and a former electrical transformer storage area. The potential for releases from these areas was subsequently evaluated and reported in the *U.S. Army BRAC 2005 Site Investigation Report Fort Monmouth, Final July 21, 2008*. That evaluation indicated that potential releases in soil were limited to the former coal storage area, Buildings 279 and 281 and the former motor pool near Buildings 159 and 161. No COCs were identified in groundwater and on October 28, 2008 the NJDEP concurred with NFA for groundwater. This portion of Parcel 83 is located along the northeastern installation boundary adjoining the New York and Long Branch Railroad and remains an ECP Category Type 7 area that requires further investigation.

New Parcels 103 and 104 were the result of surface soil samples collected during the 2008 SI (P83-SB12-A, P83-SB13-A and P83-SB4-A). They exceeded the NRDCSCC for benzo(a)pyrene. No additional delineation was conducted for these exceedances during the 2008 SI. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcels 103 and 104 have been classified as ECP Category Type 7 areas because they require additional evaluation.

Former industrial facilities and operations were absent in the portion of Parcel 83 located west, south and southeast of the industrial areas. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, this portion of Parcel 83 has been re-categorized from ECP Category Type 7 to ECP Category Type 2 based on the release of petroleum products or their derivatives in this area.

- Parcel 96

Parcel 96 is a newly-designated parcel that incorporates Installation Restoration Program (IRP) Site FTMM-68 Building 700 Solvent UST. FTMM-68 was identified after the original ECP when chlorinated solvents were detected in groundwater at an adjacent site, FTMM-53 Building 699 Gasoline Storage. The chlorinated solvents were thought to be associated with former Building 565, a dry cleaning facility that was contiguous with FTMM-53. There were no historical environmental data for FTMM-68.

A 500-gallon solvent UST located adjacent to Building 700 was removed in 2011. The tank was heavily corroded and leaking. Impacted soil and approximately 450 gallons of impacted water were removed and drummed. Two of the closure soil samples exceeded the NJDEP RDCSCC for PCE. These issues were subsequently evaluated and reported in the *Final Vapor Intrusion Site Investigation Report Main Post and Charles Wood Area (January 2013), Draft Long-Term Monitoring Groundwater Work Plan for Remedial Investigation / Feasibility Study / Decision Documents (March 2013), Final August 2013 Baseline Groundwater Sampling Report (August 2013), Final Remedial Investigation / Feasibility Study Work Plan for Sites FTMM-22, FTMM-53, FTMM-59, and FTMM-68 (September 2013) and Draft Final Groundwater Sampling Report First Quarter 2014, FTMM-22, FTMM-53 and FTMM-68 (August 2014).*

The original ECP classified the area now occupied by Parcel 96 as a portion of Parcel 51, which was designated as ECP Category Type 2. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 96 has been classified as an ECP Category Type 5 parcel because release, disposal, or migration, or some combination thereof, of hazardous substances has occurred and removal or remedial actions, or both are underway, but all required actions have not yet been taken.

- Parcel 97

Parcel 97 is a newly-designated parcel that incorporates the Building 978 Electrical Substation. The original ECP included the Building 978 Electrical Substation in Parcel 66, which was identified as an ECP Category Type 1 parcel. The electrical substation was subsequently evaluated and reported in the *U.S. Army BRAC 2005 Site Investigation Report Fort Monmouth Final July 21, 2008*. Aroclor 1260 was found to exceed NJDEP RDCSCC in one soil sample. On August 1, 2012 Fort Monmouth submitted a sampling plan to characterize the soil exceedance. NJDEP approved the plan on September 10, 2012. Based on the additional evaluation, a removal action was initiated to address PCB contamination. Work is still proceeding on this action. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 97 has been classified as an ECP Category Type 5 because it remedial work is on-going.

- Parcel 98

Parcel 98 is a newly-designated parcel located in the southwestern corner of Parcel 51 near Buildings 787, 788 and 789. This portion of Parcel 51 was included in the Army's Enhanced Use Lease (EUL) program investigation of the 700 Area of Parcel 53. The primary objective of the EUL investigation was to characterize environmental conditions and perform remedial actions including the removal and disposal of all contaminated soil with concentrations above NJDEP NRDCSCC. A secondary objective was to identify, locate and remove historic USTs and/or buried construction debris. *See: Remedial Action Report for the 800, 700 and 400 Areas, U.S. Army Installation Fort Monmouth, Fort Monmouth, New Jersey (October 2005).*

Parcel 98 was identified based on an exceedance of PCBs near Buildings 787 and 789. An investigation of the PCBs will be performed.

The original ECP classified the area now occupied by Parcel 98 as ECP Category Type 2. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 98 has been re-categorized as an ECP Category Type 5 parcel because release, disposal, or migration, or some combination thereof, of hazardous substances has occurred and removal or remedial actions, or both are underway, but all required actions have not yet been taken.

- Parcel 102

Parcel 102 is a newly-designated parcel that incorporates the Former Skeet Range. The original ECP included the skeet range in Parcel 44 with several former landfills and identified Parcel 44 as an ECP Category Type 5 parcel. Munitions associated with the Former Skeet Range are assumed to be small arms ammunition. Because clay targets are assumed to have been used at the range, PAHs associated with the targets are also expected. No investigations of the Former Skeet Range have been conducted. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcel 102 has been classified as an ECP Category Type 7 parcel because it is unevaluated.

- Parcel 105

Parcel 105 is a newly-designated parcel that incorporates the Former Pistol Range (1935-1940 Pistol Range). The former range was used from approximately 1935 through 1940 and was identified through research during the 2006 Historical Records Review (HRR). The range structures and backstop berm were assumed to have been removed/demolished in 1940 for construction of the Sanitary Treatment Plant. Munitions associated with the Former Pistol Range were assumed to be small arms ammunition mainly comprised of lead. The HRR concluded no investigation of the former range had been conducted within the berm area and recommended further evaluation. The original ECP included this site; however, it was not considered a REC based on the extensive reworking of site soil since 1940 and the extensive sampling that had been conducted in the former range area. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities,* Parcel 105 has been classified as an ECP Category Type 7 parcel because it is unevaluated.

- Parcels 106 and 107

Parcels 106 and 107 are newly-designated parcels that include former transformers located within Buildings 1208 and 1209, respectively. During the 2008 SI, elevated PCB concentrations were detected in concrete chip samples collected from oil-stained areas at the transformers. Additional concrete chip sampling and soil sampling beneath the concrete was

performed to evaluate the current potential PCB impacts. Based on the additional evaluation, a removal action was initiated to address PCB contamination. Work is still proceeding on this action. Based on ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities*, Parcels 106 and 107 have been classified as ECP Category Type 5 parcels because additional remedial work is still proceeding.

* * *

The property classification categories are as follows:

- ECP Area Type 1: An area or parcel of real property where no release or disposal of hazardous substances or petroleum products or their derivatives has occurred (including no migration of these substances from adjacent properties).
- ECP Area Type 2: Where only the release or disposal of petroleum products or their derivatives has occurred.
- ECP Area Type 3: An area or parcel of real property where release, disposal or migration, or some combination thereof, of hazardous substances has occurred, but at concentrations that do not require a removal or remedial action.
- ECP Area Type 4: An area or parcel of real property where release, disposal or migration, or some combination thereof, of hazardous substances has occurred, and all remedial actions necessary to protect human health and the environment have been taken.
- ECP Area Type 5: An area or parcel of real property where release, disposal or migration, or some combination thereof, of hazardous substances has occurred, and removal or remedial actions, or both, are underway, but all required actions have not yet been taken.
- ECP Area Type 6: An area or parcel of real property where release, disposal or migration, or some combination thereof, of hazardous substances has occurred, but required response actions have not yet been initiated.
- ECP Area Type 7: An area or parcel of real property that is unevaluated or requires additional evaluation.

1.3 ASSUMPTIONS AND LIMITATIONS

The information obtained from individuals interviewed and prior environmental reports was considered to be accurate unless reasonable inquiries indicated otherwise. Conditions observed were considered representative of similar areas that were not accessible unless otherwise indicated. This ECP Report Update presents a summary of reasonably ascertainable information on the environmental conditions of, and concerns relative to, the land, facilities and real property assets at the Property. Its findings are based on a thorough review of reasonably ascertainable documents, a visual reconnaissance of the Property on August 19, 2014 and interviews with personnel knowledgeable about the Property and its history. Existing

environmental investigations and reports and historical documents were reviewed in support of this ECP Report Update. Information obtained from these other sources is reflected within this report by reference.

The Property buildings and structures were visually inspected during the site reconnaissance. However, a 100% visual reconnaissance of every single interior space within each building (i.e., attics, crawl spaces, etc.) was not practical due to accessibility restrictions. No sampling or analysis of any media was conducted during this survey.

2.0 PROPERTY DESCRIPTION

2.1 PROPERTY LOCATION

Fort Monmouth is located in the central-eastern portion of New Jersey, approximately 45 miles south of New York City, 70 miles northeast of Philadelphia and 40 miles north of Trenton. The Atlantic Ocean is located approximately 2.5 miles to the east. Fort Monmouth consists of the Main Post, Charles Wood Area and Evans Area. The Main Post encompasses an area of approximately 637 acres and is bounded by State Highway 35 to the west, Parkers Creek and Lafetra Creek to the north, New Jersey Transit Railroad to the east and residential neighborhoods to the south. The Charles Wood Area is comprised of approximately 489 acres and is located one mile west of the Main Post. The Evans Area consisted of approximately 219 acres and was transferred under the BRAC 1993 Program. The Main Post and Charles Wood Area are included in BRAC 2005. The majority of the Charles Wood Area was previously transferred. The Facility Location Map is provided on Figure 1.

The area of Fort Monmouth addressed in this ECP Report Update is the portion of the Main Post located east of DeRum Avenue (extended), excluding Parcel B and the Patterson Clinic parcel. The marina parcel and the two credit union parcels are included in this ECP Report Update and will be transferred under separate deeds. The Property encompasses approximately 578 acres and the property transfer includes 107 ECP parcels. The ECP parcels for the Property are shown on Figure 2.

2.2 PREVIOUS ECP AREA TYPE CATEGORIZATION

In accordance with ASTM Designation D 5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities,* the original ECP provided the baseline property categorizations in Appendix A of that document, and are attached herein as Appendix A.

2.3 PHYSICAL DESCRIPTION

2.3.1 SITE AND VICINITY CHARACTERISTICS

The Main Post is nearly level except for short, steep slopes along streams and waterways. The topographic gradient slopes gently to the east, within the drainage network of local tributaries to the Shrewsbury River. Elevations at the Main Post range from about 6 feet mean sea level (MSL) at stream edges to 30 feet MSL near the center of the Main Post. The highest elevation is at Landfill M-8 (FTMM-18) located on Parkers Creek. Geothermal well fields throughout Fort Monmouth provide heating and cooling for several buildings on the installation. The wells are approximately 400 feet deep. There are approximately 315 buildings and structures located on the Property.

Fort Monmouth is primarily suburban in character, being surrounded by the communities of Shrewsbury to the north, Oceanport to the east and Eatontown to the south. The New Jersey Garden State Parkway forms the western boundary. Agricultural areas are found in the region,

while recreational developments are along the ocean shore. The areas surrounding Fort Monmouth are characterized by a mixture of residential, commercial and light industrial uses. Land uses in the surrounding municipalities are compatible with those along the inside perimeter of the Main Post. The Adjacent Land Use Map is provided on Figure 3.

2.3.2 GEOLOGY, HYDROGEOLOGY AND SOIL

Geology, hydrogeology and soil information is presented in the original ECP and those descriptions remain representative.

2.3.3 OTHER FACILITIES AND SITE FEATURES

Other facilities and site features are presented in the original ECP and those descriptions remain representative.

2.3.3.1 BULK STORAGE TANKS

UNDERGROUND STORAGE TANKS

There were no non-petroleum USTs identified on the Property during the original ECP. There are currently no non-petroleum USTs on the Property.

ABOVEGROUND STORAGE TANKS

In 1999, the chemicals stored in Building 280 included compressed gas cylinders, including bulk storage (154 pounds) of oxygen. There are currently no non-petroleum ASTs on the Property.

2.3.3.2 SITE WASTE AND WASTEWATER

Site waste and wastewater operations are discussed in the original ECP. There are no changes to those descriptions. Most of the Property is in caretaker status. There are a limited number of tenants using the facilities at the installation. Site wastewater is currently collected and discharged to the local publicly-owned treatment works.

There are two 90-day satellite accumulation points (SAPs) in use on the Property. One is located on the east side of Building 279 and the second is located in a paved, fenced enclosure at Building 476. Clamshell-type secondary containment units are used for temporary storage at the SAPs.

2.3.3.3 STAINED SOIL, STAINED PAVEMENT OR STRESSED VEGETATION

No stained or discolored soil or distressed vegetation was observed during the site reconnaissance.

2.3.3.4 LIQUID DISCHARGES

No visible evidence of liquid discharges, suspected to represent an environmental concern was observed during the site reconnaissance.

2.3.3.5 POOLS OF LIQUID

No visible evidence of significant standing water or pools containing liquids likely to be hazardous substances or petroleum products were observed during the site reconnaissance.

2.3.3.6 PITS, PONDS OR LAGOONS

No evidence of any pits, ponds or lagoons was observed during the site reconnaissance.

2.3.3.7 WELLS

There are approximately 270 monitoring wells located on the Property. These wells were/are used for monitoring of various environmental remediation sites either previously located on the Property or adjacent to the Property. There are also wells associated with several geothermal well fields located on the Property.

2.3.3.8 ON-SITE FILL

Based on our observations, it does not appear that a significant amount of fill has been imported onto the Property.

2.3.3.9 POLYCHLORINATED BIPHENYLS

PCB-Class oils are defined by the Toxic Substances Control Act (TSCA) as oils containing 500 parts per million (ppm) PCBs or greater. PCB-contaminated oils are defined by TSCA as oils containing between 50 ppm and 499 ppm of PCBs. Non-PCB oils are defined by TSCA as oils containing less than 50 ppm PCBs. Electrical oil having PCB concentrations at or less than 49 ppm is considered a Class D recyclable material in the State of New Jersey.

The Main Post has approximately 348 oil-filled pieces of electrical equipment of which 185 units are pole-mounted and 127 are pad-mounted. Electrical substations are located at Buildings 288, 978 and 1231. Following a program at Fort Monmouth to test electrical equipment for PCB oil and replace PCB oil when found, there are no remaining PCB-class pieces of equipment (containing oils with greater than 50 ppm PCBs) on the Property. The substation adjacent to Building 288 was constructed after the use of PCB-containing electrical equipment was discontinued.

New and used non-PCB transformers are currently stored in secondary containment and within a fenced enclosure at Building 12.

Building 978 Electrical Substation

This facility is an electrical substation constructed in 1954. It is located adjacent to Building 978 and is the delivery point for metering electrical power to the Main Post. The substation consists of three transformers that contain non-PCB oil. Based on the period of operation, it is likely that previous operations included the use of PCB-containing equipment.

Soil samples were collected from the substation transformer yard during the 2008 SI to determine if historic use of potential PCB-containing equipment had resulted in the release of PCBs to the environment. Ten surface soil samples were collected for PCB analysis from nine hand-auger borings in the transformer yard. PCBs were not detected in these samples above the NJDEP NRDCSCC of 2 mg/kg. Aroclor 1260 was detected in one soil sample at 0.84 mg/kg, exceeding the NJDEP RDCSCC of 0.49 mg/kg. The SI recommended NFA because PCBs were not identified above the NRDCSCC in soil at the substation. In correspondence dated October 28, 2008, the NJDEP required a deed notice and engineering controls because PCBs were detected above the RDCSCC. The Army has proceeded with the additional sampling and has initiated remedial actions at this site to address PCB contamination.

Former PCB Transformer Sites – FTMM-47

Former PCB transformer locations on Fort Monmouth were investigated as IRP Site FTMM-47. The transformers with signs of visible oil staining were located at Buildings 292, 686, 718, 1002, 1004, 1208, 1209 and 1220. The transformers were situated on soil, concrete or both. Soil and concrete chip samples were collected for PCB analysis under the 1995 SI. PCB results for all soil samples were below the NJDEP Direct Contact Soil Cleanup Criteria (DCSCC). Elevated PCB concentrations were detected in concrete samples collected from Buildings 1002, 1208 and 1209. The SI indicated that the PCB source areas would be addressed when the transformers were replaced or removed from service. To support transfer additional sampling was performed and a removal action initiated to address PCB contamination.

Pole-Mounted PCB Transformer Leak (ECP Parcel 95(4)HR)

There was a recorded spill of 75 gallons of PCB-contaminated transformer oil near Buildings 454 and 456 on December 11, 1992. Three pole-mounted 50 kilovolt-ampere transformers were knocked to the ground as a result of a storm in 1992 and the contents of two of the transformers leaked onto the ground. The transformers were properly disposed of along with 50 cubic yards (CY) of PCB-contaminated soil. Final post-excavation samples were non-detect for PCBs and showed levels of total petroleum hydrocarbon (TPH) below the NJDEP standard. An additional 20 surface soil samples were collected from the perimeter of the excavation and analyzed for TPH. None of these samples contained TPH in excess of the NJDEP soil standard. NJDEP concurred with NFA on April 29, 2015.

Buildings 1150 and 1152 Former PCB Transformer Site – FTMM-09

The 1980 Installation Assessment listed Site M-9 where Buildings 1150 and 1152 are located on the Main Post as “PCB (Transformer)” but did not provide any additional

information. In the 1995 SI, it was reported that these transformers had been tested and that there was no evidence that this site has ever had transformers that contained PCBs at concentrations greater than 50 ppm. No further sampling was recommended at the site. NJDEP concurred with NFA on November 7, 1994.

Former Transformer Storage Area Behind Building 167

Transformers were previously stored in an area behind Building 167 in the early to mid-1990s (personal communication, Joe Fallon, Fort Monmouth, Directorate of Public Works (DPW), August 2006). The transformers were either new or in workable condition and classified as Non-PCB. All transformers were removed from the area in the mid-1990s but no environmental sampling was conducted. The original ECP considered the site as a REC. Fort Monmouth personnel currently have no record of former transformer storage at Building 167.

Former PCB Transformer Storage Facility, Building 623

Building 623 formerly served as the central storage area for out-of-service transformers, capacitors, switches and other types of electrical equipment which contained PCB, PCB-contaminated oils and non-PCB oils. Secondary containment consisted of an 8-inch high concrete dike that lined the perimeter of the building. The facility was closed based on its location and age. An Army contractor completed removal of the PCB-contaminated concrete from the building in 1992. The building was demolished in 1993, prior to construction of Building 600 which is partially located over the footprint of Building 623. The post-demolition soil samples collected at Building 623 verified that no PCBs were released to the environment. A SI report was completed and determined that no further action was necessary *See: Site Investigation Report for Former Building 623 PCB Storage Facility, Parsons, September 2015.*

2.3.3.10 RADIOACTIVE COMMODITIES

The presence of Radiological Materials (RAM) at the Property was predominantly limited to certain areas and functions of the installation. Historically, laboratory research and development in the areas of radio and electronics use of vacuum tubes and radium dials, the use of ionizing radiation-producing machines and military support equipment such as night vision goggles that contained radioactive commodities were among the most common uses of RAM.

Facilities, buildings and rooms that contained or once contained equipment that produced x-rays via alternating current or direct current sources of energy are not sources of radioactive contamination. This equipment, which included medical and dental diagnostic x-ray machines, x-ray security inspection machines, x-ray diffraction, electron microscopes, x-ray fluorescence equipment and some high voltage electron tubes only produced ionizing radiation when energized. Operation of x-ray generating equipment of the type utilized at Fort Monmouth did not produce radioactive materials or result in any residual radioactive contamination. Much of the past activities were performed as part of the Signal Corps Laboratories, first housed in the Squier Building (Building 283) and then in the Myers Center (Building 2700), Charles Wood Area.

During the Historical Site Assessment (HSA), equipment containing RAM was noted throughout Fort Monmouth, particularly as used in chemical and explosives detectors operated by personnel working in security entrance areas, postal facilities, emergency responders and shipping areas. Electron capture detectors containing Ni-63 were used in the Environmental Laboratory at Building 173 to analyze samples for pesticides and PCBs. All of these types of equipment involved the use of sealed sources rather than research-type materials. Sealed sources are not generally sources of radiological contamination.

Nine buildings or building complexes on the Property were identified as areas where RAM was used, stored or potentially disposed. During the HSA, historical information was reviewed to determine if there was sufficient data to declare buildings as "Impacted" or "Non-Impacted", in accordance with Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM) methodology. According to MARSSIM, areas are divided into risk categories defined as follows:

- Impacted (MARSSIM Class 1 and 2) – Areas with moderate to high probabilities of potential contamination.
- Impacted (MARSSIM Class 3) – Areas with very low potential for contamination but with insufficient information to justify a non-impacted classification.
- Non-Impacted (No Survey Needed) – Areas with no potential for residual contamination.

A summary of the buildings or areas where RAM was used, stored or potentially disposed at the Property is provided in Table 2-3 – Building/Areas with RAM Use/Storage History.

Table 2-3
Fort Monmouth Phase 2 Property
Building/Areas with RAM Use/Storage History

Building Number	Classification	Building/Area Name and Use	Former Tenant and Condition
116	Non-Impacted	Warehouse/Shipping & Receiving	Used by Base Contractor for Garrison Supply, contained secure radiological storage areas.
173	Non-Impacted	Environmental Laboratory	Electron Capture Detectors were used for environmental sample analysis in designated room.
205	Non-Impacted	Wackenhut/Alutiiq Security Office	Three explosives detectors were stored in Room 136.
275	Impacted, MARSSIM Class 3	Museum	Several display items contained radioactive materials.
282	Non-Impacted	Main Post Fire Department	Once used explosive detectors containing sources, were removed.
283	Impacted, MARSSIM Class 3	Squier Building (Administrative)	Housed Signal Laboratories before they were moved to 2700, Charles Wood Area; renovated to administrative space.
292	Impacted, MARSSIM Class 3	Museum Storage	Several items in storage contained radioactive materials.
451	Non-Impacted	Postal Facility	Once used explosive detectors containing sources were removed.

Building Number	Classification	Building/Area Name and Use	Former Tenant and Condition
602	Non-Impacted	High Security Fabrication & Testing	Once used explosive detectors containing sources were removed.

The HSA identified Buildings 275, 283 and 292 as Impacted Areas and as such these areas were subject to a radiological final status survey. *See: Final Status Survey Report (FSSR), Fort Monmouth, U.S. Army Corps of Engineers dated August 15, 2012.* The FSSR concluded that based on the historical research and the final status survey field observations and supporting analytical data, all buildings surveyed were considered suitable for unrestricted use in accordance with Subpart E to 10 Code of Federal Regulations (CFR) 20, Radiological Criteria for License Termination. There was no evidence of any release of radiological materials at these buildings.

The Nuclear Regulatory Commission released the facilities at Fort Monmouth for unrestricted use in correspondence dated October 10, 2012.

2.3.4 SITE HYDROLOGY AND GEOLOGY

Site hydrology and geology were presented in the original ECP and those descriptions remain representative.

2.3.4.1 SURFACE WATER CHARACTERISTICS

Surface water features and characteristics were presented in the original ECP and those descriptions remain representative.

2.4 PROPERTY UTILITIES

The Property is served by the following utilities: water, sanitary sewer, electric and natural gas. Descriptions of the Fort Monmouth utilities are provided in the original ECP.

2.5 WATER SUPPLY WELLS, DRY WELLS AND SEPTIC SYSTEMS

No water supply wells or septic systems were identified on the Property in the original ECP.

2.6 FLOODPLAINS

A review of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map of Monmouth County, New Jersey indicates portions of the Property are located within the 100-year flood zone. The 100-year floodplain occurs mainly along Oceanport Creek and Parkers Creek in the eastern portion of the Main Post. Portions of the extreme southeastern Main Post are subject to flooding during high tides combined with heavy rains.

Following Hurricane Sandy in October 2012, FEMA published a preliminary Flood Insurance Study effective January 31, 2014 which included revised Floodway Data Tables and revised Flood Profiles for the Boroughs of Eatontown and Oceanport, Monmouth County, New Jersey. *See: Flood Insurance Study Number 34025CV001B.*

2.7 WETLANDS

Wetland information is presented in the original ECP and those descriptions remain representative.

2.8 COASTAL ZONE

Portions of the Property are located within the Coastal Zone Management Area. The *Coastal Zone Management Act Consistency Determination for Fort Monmouth, New Jersey Proposed Implementation of BRAC 2005 dated April 2009* is included in Appendix B.

2.9 BIOLOGICAL RESOURCES

Biological resources are discussed in the original ECP. There have been no changes to the Property since that time that would affect the description of biological resources.

2.10 CULTURAL AND HISTORIC RESOURCES

Cultural and historic resources are discussed in the original ECP. There have been no changes to the Property since that time that would affect the description of these resources.

3.0 PROPERTY HISTORY

3.1 HISTORY OF OWNERSHIP

The original Fort Monmouth Army camp established for signal troop training in 1917 was located in Little Silver, New Jersey. The Army leased 468 acres from Mr. Van Keuren on May 16, 1917. The land was farmed with potato crops for at least four years prior to this time. The majority of the Main Post was previously developed as the Monmouth Park Race Track, dating from 1870 to 1893. The one-mile horse racing track was located in the vicinity of Patterson Army Health Clinic near the intersection of Broad Street and Park Avenue. A larger Monmouth Park was constructed and opened on July 4, 1890. The oval track was centered on the present day Greeley Field. Grandstands and a luxury hotel along Parkers Creek were part of the associated land uses. The entire facility encompassed 640 acres of land, the majority of which later became part of the Main Post. Vacated buildings and structures fell into ruin and the hotel burned to the ground in 1915. The majority of the Main Post property was purchased from Bungalow Sites Company in 1919 and Monmouth Park Villa Site Company in 1921.

3.2 PAST USES AND OPERATIONS

The Main Post of Fort Monmouth was established on June 17, 1917 as Camp Little Silver. The name of the Camp was changed after three months to Camp Alfred Vail. The initial mission of the Camp was to train Signal Corps operators for service in World War I. In the first 19 months of the Camp's existence, 129 semi-permanent structures were built, a tent camp was established on the site of a former swamp and a parade ground was established on the site of a former marsh. A radio laboratory and an airfield were developed in 1918. After the war, Camp Vail was designated as the site of the Signal Corps School, the only training area for Signal Corpsmen in the country. All but four World War I structures were demolished by 1924.

In 1925, the facility became a permanent post and its name was changed to Fort Monmouth. The primary mission of Fort Monmouth continued to be Signal Corps training and electronics research. In 1934, laboratory operations were consolidated in a new facility, Squier Laboratory (Building 283). Research on radios and radar continued here until the early 1950s. During World War II, the pace of training increased tremendously at Fort Monmouth. The expanded laboratory effort was accomplished by starting new laboratories at other post facilities. Squier Laboratory continued to be the principal laboratory on the Main Post until 1954. In 1955 and 1956, 72 World War II wooden structures were demolished to make room for permanent structures. These new buildings were used for residential, administrative, commercial and recreational purposes. A small number of additional administrative buildings were completed during the 1970s, 1980s and 1990s. During World War II, the Camp was used for training Signal Corpsmen. Antenna shelters were constructed on 26.5 acres of land and used by the Signal Corps Laboratory for research and development purposes.

3.3 USE, STORAGE, DISPOSAL AND RELEASE OF PETROLEUM

3.3.1 UNDERGROUND AND ABOVEGROUND STORAGE TANKS

Current Underground and Aboveground Storage Tanks

There are no USTs and 23 ASTs on the Property. The majority of the ASTs are in service in association with emergency generators and active lift stations. One AST located at Building 273, the former government fueling facility, stores gasoline for lawn maintenance equipment. Three ASTs that store used oil are located at Building 484. Although two of the ASTs are drained, all three are considered active tanks. The used oil AST currently in use is pumped out on as as-needed basis and has been pumped twice since installation closure. Two diesel ASTs from Buildings 1203 and 2603 (Charles Wood Area) were recently relocated to Building 166 so that the fuel that remained in the tanks after installation closure could be used. There is no evidence of leaks or spills from these ASTs. Table 1 includes a summary of the current USTs/ASTs on the Property.

There is a potential that multiple former heating oil tanks still remain on the Property. This potential was evaluated and described in *Addendum 1 Environmental Condition of Property Report, Unregulated Heating Oil Tanks (UHOT) Investigation Report, Fort Monmouth Oceanport, Monmouth County, New Jersey dated May 2014*. There is currently no indication of release from these UHOTs so no current action is planned by the Army.

Former Underground and Aboveground Storage Tanks

A total of 22 former ASTs were present on the Property and have been removed. ASTs that have been emptied and taken out of service but remain on the Property include two ASTs at Building 273, one AST at Building 450 and three ASTs at Building 699. Two ASTs owned by Monmouth County are located at Buildings 750 and 753. The ASTs are empty and have been taken out of service.

A total of 320 of the 374 former USTs were UHOTs that have been removed from the Main Post. One UHOT at 1-3 Allen Avenue was left in place due to its proximity to a garage structure. The tank was empty but had not been properly closed.

Table 1 includes a summary of the former USTs/ASTs on the Property and the status of the tanks.

3.3.2 NON-UST/AST STORAGE, RELEASE, OR DISPOSAL OF PETROLEUM PRODUCTS

There is no evidence that non-UST/AST petroleum products in excess of 55 gallons were stored for one year or more on the Property.

3.4 REVIEW OF PREVIOUS ENVIRONMENTAL REPORTS

A thorough review of environmental documentation was performed for the original ECP and was documented in that report. The new documentation reviewed with information relevant to this ECP Report Update included the following:

- *U.S. Army BRAC 2005 Site Investigation Report Fort Monmouth, Final, July 2008*
- *Final Environmental Assessment of the Implementation of Base Realignment and Closure at Fort Monmouth, New Jersey, March 2009*
- *Lead-Based Paint Survey, U.S. Army Garrison Fort Monmouth New Jersey, September 6, 2011*
- *M-16 Pesticide Storage Area (FTMM-16) Remedial Action Report, Fort Monmouth, New Jersey, November 2011*
- *Final Baseline Ecological Evaluation Report, Fort Monmouth Main Post and Charles Wood Area, Fort Monmouth, Fort Monmouth New Jersey, May 2012*
- *Final Status Survey Report, Fort Monmouth, Eatontown, New Jersey, Final, August 15, 2012*
- *Vapor Intrusion Site Investigation Report, Main Post and Charles Wood Area, OACSIM, U.S. Army Fort Monmouth, Oceanport, New Jersey, Final, January 2013*
- *Long-Term Monitoring Groundwater Work Plan for Remedial Investigation/Feasibility Study/Decision Documents, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, March 2013*
- *Final Landfill Feasibility Study Work Plan for Remedial Investigation/Feasibility Study/Decision Documents, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, July 2013*
- *Final Remedial Investigation/Feasibility Study Work Plan for Sites FTMM-22, FTMM-53, FTMM-59, and FTMM-68, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, September 2013*
- *Final Remedial Investigation/Feasibility Study Report for Site FTMM-66, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, September 2013*
- *Draft Remedial Investigation/Feasibility Study Report for Site FTMM-03, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, October 2013*

- *Spill Prevention, Control and Countermeasures Plan (SPCCP) Installation Spill Contingency Plan (ISCP) and RCRA Contingency Plan (RCP), Fort Monmouth, New Jersey, December 1992, Revised November 2013*

- *Federal Emergency Management Agency Flood Insurance Study, Monmouth County, New Jersey (all jurisdictions), Volume 1 of 3, Preliminary effective January 31, 2014*

- *Final August 2013 Baseline Groundwater Sampling Report, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, March 2014*

- *Asbestos Survey and Assessment, U.S. Army Fort Monmouth Building 450, Tinton Falls, New Jersey, Final Report, April 7, 2014*

- *M-16 Pesticide Storage Area (FTMM-16), Final Remedial Action Report & Deed Notice, Fort Monmouth, New Jersey, April 2014*

- *Final Addendum 1, Environmental Condition of Property Report, Unregulated Heating Oil Tank (UHOT) Investigation Report, Fort Monmouth, Oceanport. Monmouth County, New Jersey, Rev. No. 0, May 2014*

- *Draft Remedial Investigation/Feasibility Study Report for Site FTMM-05, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, May 2014*

- *Draft Final Remedial Investigation/Feasibility Study Report for Site FTMM-12, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, June 2014*

- *Draft Final Remedial Investigation/Feasibility Study Report for Site FTMM-14, Fort Monmouth, Oceanport, Monmouth County, New Jersey, Rev. No. 0, June 2014*

[1] Note: There are similar ACM inspection reports for Buildings 234 through 256 and Building 258. The reports are dated August 29, 2014, September 3, 2014 and September 5, 2014.

4.0 ADJACENT PROPERTIES

There are no significant changes to land use adjacent to the Property since the 2007 ECP that would present an unacceptable risk to human health and the environment.

5.0 REVIEW OF REGULATORY INFORMATION

A component of the ECP is a review of reasonably ascertainable federal, state and local government records for the Property and surrounding properties where there has been a release or potential release of any hazardous substance or petroleum product which is likely to cause or contribute to a release or threatened release of any hazardous substance or petroleum product on federal real property. A regulatory database summary was acquired from Environmental Data Resources, Inc. (EDR) on July 29, 2014. It consolidates standard federal, state, local and tribal environmental record sources based on the ASTM D 6008-96 (2014) recommended minimum search distances from the Property.

There were no significant findings from the EDR report that indicate a potential impact to the Property. An update of that records search is not warranted at this time due to the fact that properties directly adjacent to the Main Post, where possible impacts could have occurred, were closed out at the time and the areas have remained in essentially the same use over time. The regulatory information for sites further away from the Main Post are not expected to impact the Main Post area.

Table 5-1 lists the surrounding properties with regulatory incidents that occurred after the original ECP. These properties are located within applicable search distances from the Property boundary. The majority of the listed properties are residential and the sources of contamination were primarily releases from UHOTs. NJDEP has closed all but one of the sites. The Army does not consider that contaminants from these sites have adversely impacted the Property based on their distances/directions from the Property, incomplete hydraulic pathways to the Property, limited contaminant sources and remedial actions taken. The full EDR report is included in Appendix C.

Table 5-1
FTMM Phase 2 Property
Summary of Environmental Conditions on Surrounding Properties

Address	Property	Concern
100 Horseneck Point Road	Residence	Unregulated UHOT, confirmed contamination. Incident date 6/20/2013. Remedial Action (RA) report received 8/22/2013. NFA-A (Unrestricted Use) approved 9/13/2013. Site closed.
100 Rivers Edge Drive	Residence	UHOT, confirmed contamination. Incident date 4/3/2013. RA report received 9/18/2013. NFA-A (Unrestricted Use) approved 10/11/2013. Site closed.
61 Riverside Drive	Residence	Spill from 275-gal UST (Hurricane Sandy Oil Spill Program). Incident date 10/30/2012. Incident status: terminated.
81 Silverside Avenue	Residence	UHOT, contamination confirmed. Incident date 10/16/2012. RA report received 5/22/2013. NFA-A (Unrestricted Use) approved 6/20/2013. Site closed.
21 Broad Street	Residence	UHOT, confirmed contamination. Incident date 10/2/2012. RA report received 3/28/2013. NFA-A (Unrestricted Use) approved 4/8/2013. Site closed.
66 Riverside Drive	Residence	Release, Incident date 8/7/2012. Incident type: Wetlands/ Stream Encroachment. Incident status: terminated.

Address	Property	Concern
23 Locust Avenue	Residence	UHOT, confirmed contamination. RA report received 5/7/2012. NFA-A (Unrestricted Use) approved 5/17/2012. Site closed.
9 Center Street	Residence	UHOT, confirmed contamination. Incident date 6/15/2011. RA report received 8/18/2011. NFA-A (Unrestricted Use) approved 8/25/2011. Site closed.
240 Silverside Avenue	Residence	UHOT, confirmed contamination. Incident date 5/23/2011. RA report received 12/14/2011. NFA-A (Unrestricted Use) approved on 1/10/2012. Site closed.
35 Avon Avenue	Residence	UHOT, confirmed contamination. Incident date 12/22/2010. RA report received 3/28/2012. NFA-A (Unrestricted Use) approved 4/9/2012. Site closed.
477 Driveway	Residence	UHOT, confirmed contamination. Incident date 11/16/2011. RA report received 8/2/2012. NFA-A (Unrestricted Use) approved on 8/21/2012. Site closed.
38 Pemberton Avenue	Residence	UHOT, confirmed contamination. Incident date 2/28/2011. RA report received 4/9/2012. NFA-A (Unrestricted Use) approved 5/11/2012. Site closed.
193 Rodman Court	Residence	UHOT, confirmed contamination. Incident date 10/12/2010. RA report received 9/20/2012. NFA-A (Unrestricted Use) approved 10/9/2012. Site closed.
1 Lake Drive	Residence	UHOT, confirmed contamination. Incident date 10/4/2010. RA report received 5/23/2011. NFA-A (Unrestricted Use) approved 4/17/2012. Site closed.
105 Clinton Avenue	Commercial	UHOT, confirmed contamination. Incident date 7/2/2010. RA report received 6/15/2010. NFA-A (Unrestricted Use) approved 7/12/2010. Site closed.
153 Rodman Court	Residence	UHOT, confirmed contamination. Incident date 4/9/2009. RA report received NFA-A (Unrestricted Use) approved 5/11/2011. Site closed.
23 Bungalow Place	Residence	UHOT, confirmed contamination. Incident date 1/15/2009. RA report received 2/23/2010. NFA-A (Unrestricted Use) approved 3/23/2010. Site closed.
45 Main Street	Commercial	Spill, confirmed contamination. MOA date 1/6/2009, SI report received 4/4/2012. Status-active
177 Rodman Court	Residence	UHOT, confirmed contamination. Incident date 8/1/2008. RA report received 9/23/2011. NFA-A (Unrestricted Use) approved 12/2/2011. Site closed.

Additionally, a former Getty service station located at 157 Broad Street, Eatontown is approximately 1/8th mile south of the Property and upgradient of the M-2 Landfill. As of 2004, this facility was identified as an active State Hazardous Waste Site with onsite sources of contamination. A waste oil UST was removed in 1990. Four gasoline USTs were removed in 1999. The remaining three gasoline USTs were removed four or five years ago (personal communication, Mr. Frank Accorsi, August 19, 2014). The former service station has discontinued fueling operations but is currently operating as a vehicle maintenance facility.

During the site reconnaissance on August 19, 2014, Mr. Accorsi indicated that soil had recently been excavated from beneath the former dispenser location at the Getty site. A soil pile was covered with plastic and staged on the southwest side of the property building. Numerous monitoring wells were observed in the asphalt parking area. Based on this facility's proximity and upgradient location in relation to the Property and documented sources of contamination,

there is potential for site contaminants to migrate towards the Property. However, there is no current information that indicates the Property has been impacted.

6.0 INTERVIEWS

6.1 INTERVIEW WITH WANDA GREEN, FORT MONMOUTH BASE ENVIRONMENTAL COORDINATOR

Ms. Wanda Green was the Base Environmental Coordinator for Fort Monmouth during the site inspection and initial development of the ECP Report Update. Ms. Green provided CALIBRE Systems, Inc. with copies of supplemental findings, assessments and regulatory correspondence that have been prepared for the Property since the original ECP. Ms. Green confirmed that certain environmental conditions on the Property have changed significantly since the original ECP, as reflected in this ECP Report Update.

7.0 ENVIRONMENTAL CONDITION OVERVIEW

7.1 DISCUSSION AND IDENTIFICATION OF RECOGNIZED ENVIRONMENTAL CONDITIONS

This ECP Report Update identified new RECs as follows:

- Parcel 96 - Building 565. This is the site of a former dry cleaning facility. Soil and groundwater contaminated with PCE.
- Parcel 102. Site of former skeet range has potential for release of lead and PAHs.
- Parcel 105. Site of former firing range has potential for release of lead.
- PCBs were identified as present at Buildings 1002, 1208 and 1209 in concrete surrounding former PCB transformers. The Army is currently remediating PCBs at those buildings.

7.2 DISCUSSION AND IDENTIFICATION OF OTHER PROPERTY CONDITIONS

7.2.1 LEAD-BASED PAINT

LBP is a hazard in residential buildings that were constructed prior to 1978. Lead accumulates in the body and can cause significant health problems in small children when ingested. Most facilities and buildings at Fort Monmouth were constructed before the DOD ban on the use of LBP paint in 1978 and are likely to contain one or more coats of such paint. In addition, some facilities constructed immediately after the ban may also contain LBP because inventories of such paints that were in the supply network were likely to have been used up at these facilities.

The first LBP risk assessment of residential buildings at Fort Monmouth was conducted in 1996 and is discussed in the original ECP. Additional LBP surveys were conducted in select residential buildings in 2011 and 2014. *See: Lead-Based Paint Survey, U.S. Army Garrison Fort Monmouth, New Jersey, September 6, 2011* and *Lead-Based Paint Inspection, Twenty-two (22) Housing Units, Fort Monmouth, New Jersey, September 11, 2014.* The findings of the 2011 survey indicated that LBP was present but did not pose a risk based on its condition. The coated surfaces containing lead above actionable levels did not meet the definition of LBP free housing. However, the painted surfaces observed were found to be in good condition and met the definition of Lead Hazard Free, as defined by N.J.A.C. 5:17-3.2(c). The 2014 survey again found that the painted surfaces in each of the buildings tested exceeded actionable levels and did not meet the definition of LBP free housing and some locations indicated a LBP hazard. The housing units were again evaluated for LBP hazards in July and August of 2015 (*Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015).* The results from this evaluation were similar to the findings of the 2014 survey in that

LBP is present in the housing units and that some areas indicate a LBP hazard. A summary of the findings is presented in Table 2.

All of the residential units on the Property contain LBP. No LBP survey work has been conducted at the non-residential buildings at the Property but based on their age it is assumed that these buildings contain LBP.

7.2.2 ASBESTOS-CONTAINING MATERIAL

Four phases of asbestos surveys were completed for Fort Monmouth through 2002. The majority of the surveys were conducted from 1989 to 1992 and from 1997 to 2002. The ACM survey data are discussed in the original ECP and the ACM identified generally included floor tile, mastic, linoleum, ceiling tile, pipe fittings, pipe runs, transite panel board, various types of insulation, joint compound, flex connectors and debris.

As part of the property transfer process, re-inspection of residential buildings was conducted in July 2014. The 25 residential buildings located along Gosselin Avenue were renovated approximately 10 years ago and the known ACM was removed during the renovation. The buildings were re-inspected on July 14-17, 2014 to identify remaining suspect friable ACM. No friable ACM was identified in any of the buildings. An additional ACM survey was conducted in February/March 2015 to evaluate non-residential buildings on the Property that had not been previously inspected or were previously identified as containing friable ACM. Verification ACM sampling was performed in July and August of 2015 on previously inspected buildings. In addition all buildings were re-inspected to determine the presence of non-friable ACM. A summary of the most recent ACM surveys performed in 2015 is provided in Table 3. *See: Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015, Final Asbestos Survey and Assessment, U.S. Army Fort Monmouth, Building 450, Tinton Falls, New Jersey, April 7, 2014 and individual inspection reports for 25 residential buildings (Buildings 233 through 256 and Building 258) dated August 29, 2014, September 3, 2014 and September 5, 2014.* A summary of the ACM surveys performed in 2014 is provided in Table 4.

7.2.3 MUNITIONS AND EXPLOSIVES OF CONCERN

Based on a review of existing records and available information, there is no evidence that Munitions and Explosives of Concern (MEC) are present on the Property. The 2006 Historical Records Review identified three munitions sites on the Property: Former Pistol Range (1935-1940 Pistol Range), Former Outdoor Firing Range (1940-1955 Pistol Range) and the Former Trap and Skeet Range. Munitions associated with the ranges are assumed to be small arms ammunition only; therefore, no MEC and limited munitions constituents are anticipated.

The term “MEC” means military munitions that may pose unique explosives safety risks, including (A) unexploded ordnance (UXO), as defined in 10 U.S.C. § 101(e)(5); (B) discarded military munitions (DMM), as defined in 10 U.S.C. § 2710(e)(2); or (C) munitions constituents (e.g., TNT, RDX), as defined in 10 U.S.C. § 2710(e)(3), present in high enough concentrations to pose an explosive hazard.

7.2.4 PCB EQUIPMENT

See Section 2.3.3.9.

7.2.5 RADIOLOGICAL MATERIALS

See Section 2.3.3.10.

7.2.6 RADON

Radon surveys were conducted in 1991 by the Directorate of Engineering and Housing's Environmental Office as part of the Army's Radon Reduction Program. The survey was conducted for all of Fort Monmouth. Radon detectors were deployed in all structures designated as priority one buildings (daycare centers, hospitals, schools and living areas). Radon was not detected above the Environmental Protection Agency residential action level of 4 picocuries per liter in any of the buildings on Fort Monmouth. Radon levels at Fort Monmouth do not pose a health risk and no further action was deemed required for radon.

7.2.7 MOLD

The buildings surveyed during the 2015 PACM inspection were also inspected for visible mold and/or evidence of water staining in the buildings. Mold sampling was not performed. Mold and/or water staining were observed in 118 of the 192 buildings that were inspected or re-inspected for friable PACM in 2015. *See: Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015.*

8.0 FINDINGS SINCE PREVIOUS ECP

This section documents the base-wide supplemental investigations and/or findings associated with the Property since the original ECP.

- *U.S. Army BRAC 2005 Site Investigation Report Fort Monmouth, Final, July 2008*. Using the findings of the original ECP, SI sampling recommendations were developed for 15 parcels and two AOCs where no existing data or insufficient data were available to fully evaluate the environmental condition of the parcels. Additional investigations were conducted in 2007 and 2008 in Parcels 38, 39, 43, 49, 50, 51, 52, 57, 61, 69, 70, 76, 79, 80 and 83 and at sanitary sewer systems and electrical substations. The SI findings are incorporated in this ECP Report Update.

- *Addendum 1, U.S. Army BRAC 2005 Environmental Condition of Property Report, Section 5.4 Petroleum and Petroleum Products, Unregulated Heating Oil Tank (UHOT) Investigation Report Fort Monmouth, May 2014.* This addendum summarized the results of the investigation of real property records and other information sources used to identify previously unidentified UHOTs at Fort Monmouth that became available after completion of the original ECP. A total of 320 UHOTs were removed from the Main Post. Of the 221 closure reports submitted, NJDEP issued 158 closure approvals/NFA. Closure reports were not required for 99 of the UHOT removals.

- *Fort Monmouth Main Post and Charles Wood Area Baseline Ecological Evaluation Report, U.S. Army Garrison Fort Monmouth, Fort Monmouth, New Jersey, Final, May 2012*. A facility-wide baseline ecological evaluation (BEE) was conducted in 2010 to assess whether the presence of COCs in sediments, surface water, soil and groundwater had the potential to adversely affect biological receptors. The BEE concluded that the potential for ecological risk due to site contaminants was low at IRP Sites FTMM-2, FTMM-3, FTMM-4, FTMM-5, FTMM-12, FTMM-14, FTMM-15, FTMM-16, FTMM-20 and in Parcel 39 (Building 1150). The potential for ecological risk due to metals in sediment was considered limited at IRP Sites FTMM-8 and FTMM-18 and in Parcels 43, 49 and 69.

- *Final Status Survey Report, Fort Monmouth, Eatontown, New Jersey. Final. August 15, 2012*. The FSSR concluded that based on the historical research, field observations and supporting analytical data, all buildings surveyed at Fort Monmouth were considered suitable for unrestricted use in accordance with Subpart E to 10 CFR 20, *Radiological Criteria for License Termination*. There was no evidence of any release of radiological materials at buildings where RAM was used or stored.

- *Final Environmental Contamination Assessment Report at Fort Monmouth, New Jersey, October 2015*. ACM and LBP inspections were performed in 2015 to support the transfer of the property.

9.0 CONCLUSIONS

CALIBRE Systems, Inc. has prepared this ECP Report Update in conformance with the scope and limitations of Army Regulation 200-1 (27 December 2007), DOD 4165.66-M (March 2, 2006) and ASTM Designation D6008-96 (2014), *Standard Practice for Conducting Environmental Baseline Surveys*. The following components were completed: interviews, government records review, visual inspection of the Property and adjoining properties and the declaration by the environmental professional responsible for the assessment.

This ECP Report Update identified new RECs as follows:

- Parcel 96 - Building 565. This is the site of a former dry cleaning facility. Soil and groundwater contaminated with PCE.
- Parcel 102. Site of former skeet range has potential for release of lead and PAHs.
- Parcel 105. Site of former firing range has potential for release of lead.
- PCBs were identified as present at Buildings 1002, 1208 and 1209 in concrete surrounding former PCB transformers. The Army is currently remediating PCBs at those buildings.

Based on the components of this ECP Report Update and our review of supplemental findings/investigations (refer to Table ES-1), it is the opinion of this ECP Report Update that additional parcels not previously documented in the original ECP be incorporated as new parcels in this ECP Report Update. The new parcels include:

- Parcel 96 – FTMM-68, Building 700 Former Solvent UST (ECP Category 5)
- Parcel 97 – 900 Area Electrical Substation (ECP Category 5)
- Parcel 98 – Category 5 carve out in Parcel 53
- Parcels 99-101 – Category 4 (Parcels within Parcel 56)
- Parcel 102 – Former Skeet Range (ECP Category 7)
- Parcels 103, 104 – Category 7 carve outs in Parcel 83
- Parcel 105 – Former Pistol Range (1935-1940 Pistol Range) (ECP Category 7)
- Parcel 106 – Building 1208 PCB Transformer (ECP Category 5)
- Parcel 107 – Building 1209 PCB Transformer (ECP Category 5)

Based on the components of this ECP Report Update and our review of supplemental findings/investigations (refer to Table ES-1), it is the opinion of this ECP Report Update that Parcel 39 (Building 1150) be re-categorized as an ECP Category Type 3 property which, in accordance with ASTM D5746-98 (2002), *Standard Classification of Environmental Condition of Property Area Types for Defense Base Closure and Realignment Facilities,* is defined as "An area or parcel of real property where release, disposal or migration, or some combination thereof, of hazardous substances has occurred, but at concentrations that do not require a removal or

remedial action." The parcel was originally considered Category Type 7; however, based on the findings of additional investigations undertaken since the original ECP it was determined that while some constituents had been released, they were below applicable criteria and, thus, did not require action. *See: NJDEP letter dated October 28, 2008.*

11.0 DECLARATION OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Property. A copy of my resume is provided in Appendix E.

Plotted 1:1 on Ansi E (34"x44") size paper

Category 1: Areas where no release or disposal of hazardous substances or petroleum products has occurred (including no migration of these substances from adjacent areas).

Category 2: Areas where only release or disposal of petroleum products or their derivatives has occurred.

Category 3: Areas where release, disposal, and/or mitigation of hazardous substances has occurred, but at concentrations that do not require a removal or remedial response.

Category 4: Areas where release, disposal, and/or mitigation of hazardous substances has occurred, and all removal or remedial actions to protect human health and the environment have been taken.

Category 5: Areas where release, disposal, and/or mitigation of hazardous substances has occurred, and removal or remedial actions are underway, but all required remedial actions have not yet been taken.

Category 6: Areas where release, disposal, and/or migration of hazardous substances has occurred, but required response actions have not yet been initiated.

Category 7: Areas that are not evaluated or require additional evaluations.

TABLE 1 – SUMMARY OF PETROLEUM PRODUCT STORAGE, RELEASE, OR DISPOSAL

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Underground Storage Tanks			
Former Building T29A (UST-29-1)	#2 Fuel Oil	Removed 6-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. SRF and SACS submitted to NJDEP on 11-22-91. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Building 49 (UST-49-76)	Leaded Gasoline	Removed 5-18-01. Case open. RI on-going.	Tanks 76 & 77 were discovered during new construction; impacted soil and groundwater encountered during excavation. Gas, fiber optic and water lines limited excavation extent. Location not mapped. RI on-going. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Building 49 (UST-49-77)	Leaded Gasoline	Removed 5-18-01. Case open. RI on-going.	See UST-49-76.
Building T-63 (UST-63-2)	#2 Fuel Oil	Removed 1-1-91. NJDEP closure NA. Case closed.	UST was removed prior to NJDEP requirements for closure reports. No contamination noted; therefore, no closure report was required. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Former Building 64 (UST-64-3)	#2 Fuel Oil	Removed 11-20-95. NJDEP closure approved 8-29-00.	UST removed, soil TPHC concentrations <1000 mg/kg. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 64 (UST-64-4)	#2 Fuel Oil	Removed 10-24-95. NJDEP closure approved 10-23-00.	UST removed and contaminated soil remediated. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Former Building 65 (UST-65-5)	#2 Fuel Oil	Removed 6-16-90. NJDEP closure approved 8-29-00.	Oil observed at the time of excavation and approximately 10 tons of potentially contaminated soil removed. Two rounds of groundwater sampling completed; all detections below GWQC. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building T-80 (UST-80-6)	#2 Fuel Oil	Removed 6-16-94. NJDEP closure approved 8-29-00.	Oil removed from UST on 7-14-93; UST removed on 6-16-94. Groundwater contaminated at levels above NJDEP criteria. Closure report submitted to NJDEP on 06-01-00. NJDEP closure approval letter dated 8-29-00.
Former Building T-104 (UST-104-75)	#2 Fuel Oil	Removed 2-28-98. NJDEP closure approved 1-10-03.	UST removed on 2-28-98, original maximum soil TRPH=1,275 mg/kg. Soil remediation and re-sampling showed remaining soil TRPH to be non-detect. Groundwater sample results below NJDEP GWQC. Closure report requesting NFA submitted to NJDEP on 07-17-01. NJDEP closure approval letter dated 1-10-03.
Building S-106 (UST-106-74)	Waste Oil	Removed 2-20-98. NJDEP closure approved 1-10-03.	Conflicting information on whether UST was ever present at this location. Oil water separator was identified in excavation but no tank encountered. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 108 (UST-108-60)	Gasoline	Removed 4-12-93. Case open. Remediation ongoing.	Noted in database as requiring further soil excavation and assessment. Also needs groundwater monitoring on a quarterly basis. Closure Report submitted May 1994, monitoring ongoing. Currently, remediation ongoing.
Building 108 (UST-108-61)	Gasoline	Removed 4-12-03. Case open. Remediation ongoing.	Noted in database as requiring further soil excavation and assessment. Also needs groundwater monitoring on a quarterly basis. Closure report submitted May 1994, monitoring ongoing. Currently, remediation ongoing.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 108 (UST-108-62)	Gasoline	Removed 4-12-93. Case open. Remediation ongoing.	Noted in database as requiring further soil excavation and assessment. Also needs groundwater monitoring on a quarterly basis. Closure report submitted May 1994, monitoring ongoing. Currently, remediation ongoing.
Building 108 (UST-108-63)	Diesel	Removed 4-12-93. Case open. Remediation ongoing.	Noted in database as requiring further soil excavation and assessment. Also needs groundwater monitoring on a quarterly basis. Closure report submitted May 1994, monitoring ongoing. Currently, remediation ongoing.
Building 108 (UST-108-64)	Kerosene	Removed 4-12-93. Case open. Remediation ongoing.	Noted in database as requiring further soil excavation and assessment. Also needs groundwater monitoring on a quarterly basis. Closure report submitted May 1994, monitoring ongoing. Currently, remediation ongoing.
Former Building 108 (UST-108-7)	#2 Fuel Oil	Removed 7-14-94. Case open. Remediation ongoing.	Closure report submitted to NJDEP requesting NFA on 2-26-96. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Building 114A (UST-114-1)	#2 Fuel Oil	Removed 6-22-94. Case closed.	UST and 3 CY of soil removed on 6-22-94. Closure report submitted to NJDEP requesting NFA on 2/26/96. NJDEP approved NFA in letter dated December 30, 2015.
Building 116 (UST-116-8)	#2 Fuel Oil	Removed 5-20-96. NJDEP closure approved 7-10-98.	Oil removed from UST on 10-21-94; UST removed on 5-20-96. NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 116 (UST-116-9)	#2 Fuel Oil	Removed 4-22-97. NJDEP closure approved 7-10-98.	10-21-94 SAI removed 761 gallons of oil; left 90 gallons of waste in tank. 3-19-98 CA NFA requested in SAS. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 116 (UST-116-10)	#2 Fuel Oil	Removed 4-10-97. NJDEP closure approved 10-23-00.	Oil removed from UST on 10-24-94; UST and contaminated soil removed on 4-10-97; all post-excavation soil and groundwater samples were clean. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 117 (UST-117-11)	#2 Fuel Oil	Removed 4-24-97. NJDEP closure approved 7-10-98.	Oil removed from UST on 12-15-94. UST removed on 4-24-97. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 117 (UST-117-12)	#2 Fuel Oil	Removed 4-29-97. NJDEP closure approved 7-10-98.	Oil removed from UST on 11-14-94. UST removed on 4-29-97. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 117 (UST-117-72)	#2 Fuel Oil	Removed 4-28-94. Case open.	Highest TPHC (Soil) = 4,440 mg/kg. UST and 10 CY of contaminated soil removed in April 1994. Report recommending NFA completed in July 1998. Report forwarded to NJDEP. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Building 142 (UST-142-13)	#2 Fuel Oil	Removed 7-20-94. Case closed.	UST removed on 7-20-94; no release noted. TPHC in soil samples below NJDEP soil cleanup criteria. Closure report requesting NFA submitted to NJDEP on 10-23-97. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Building 142 (UST-142-73)	#2 Fuel Oil	Removed 7-21-94. Case closed.	UST found during removal of 142A. No release noted. TPHC in soil samples below NJDEP soil cleanup criteria. Closure report requesting NFA submitted to NJDEP on 10-23-97. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required..
Former Building 161 (UST-161-14)	#2 Fuel Oil	Removed 3-12-93. Case closed.	Product observed in excavation and vacuumed out during UST removal. Reported to State; highest TPHC=313 mg/kg. Closure report submitted to NJDEP on 2-26-96. Documentation

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Former Building 161 (UST-161-68)	Waste Oil	Removed 3-12-93. Case closed.	Product observed in excavation upon removal. Highest TPHC=318 mg/kg. Closure report submitted to NJDEP on 2-26-96. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Former Building 164 (UST-164-15)	#2 Fuel Oil	Removed 1-21-97. NJDEP closure approved 1-10-03.	UST removed and TPHC-contaminated soil excavated. No TPHC was detected during final round of confirmatory sampling. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 165 (UST-165-16)	#2 Fuel Oil	Removed 7-19-94. NJDEP closure approved 2-24-00.	UST removed on 7-19-94 and groundwater sampling completed. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 166 (UST-166-17)	#2 Fuel Oil	Removed 6-16-94. NJDEP closure approved 8-29-00.	Closure report submitted to NJDEP on 6-01-00. NJDEP closure approval letter dated 8-29-00.
Building 167 (UST-167-18)	#2 Fuel Oil	Removed 6-20-94. Case closed.	No release noted for this UST. Closure report submitted to NJDEP on 2-26-96. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Former Building 170 (UST-170-69)	#2 Fuel Oil	Removed 5-4-98. NJDEP closure approved 2-24-00.	UST removed on 5-4-98; no release noted. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 173 (UST-173-19)	#2 Fuel Oil	Removed 5-22-96. NJDEP closure approved 1-10-03.	UST removed, highest TRPH=1,934.54 mg/kg; soil sample VOAs all below NJDEP RDCSCC. All groundwater results below NJDEP GWQC. Closure report requesting NFA was submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 197 (UST-197-20)	#2 Fuel Oil	Removed 7-5-94. NJDEP closure approved 2-24-00.	UST and contaminated soil removed on 7-5-94. Post-excavation soil and groundwater results were below NJDEP criteria. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
200 Area (1-3 Allen Avenue)	#2 Fuel Oil	Closed in place.	One UHOT was located on 12-9-10 during supplemental UHOT investigations on the Main Post. Tank was left in the ground due to its proximity to a residential garage structure. 2015 – UHOT was inspected and found to be cleaned (no visible product) with no inert backfill material placed in the tank.
Building 200 (UST-200-2)	#2 Fuel Oil	Removed 5-2-96. NJDEP closure approved 1-10-03.	Oil removed from UST on 10-4-94. UST removed on 5-2-96. Closure report submitted to NJDEP on 5-15-02. NJDEP approved closure on 1-10-03.
Former Building 202 (UST-202-21)	#2 Fuel Oil	Removed 10-1-01. NJDEP closure NA. Case closed.	UST removed on 10-1-01. No contamination observed; all TRPH results were ND. Residential UST with no Discharge Investigation and Corrective Action Report (DICAR) and no contamination; no closure report required. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Former Building 202 (UST-202-22)	#2 Fuel Oil	Removed 10-1-01. NJDEP closure NA. Case closed.	UST removed on 10-1-01. No contamination observed; all TRPH results were ND. Residential UST with no DICAR and no contamination; no closure report required. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Former Building 202 (UST-202-a)	#2 Fuel Oil	Removed 5-23-05. NJDEP closure NA. Case closed.	Original USTs uncovered during house demolition. UST removed on 5-23-05 and soil sampled. Evidence of leak; approximately 30 tons of soil removed. Samples collected. Soil samples below criteria. Residential tank, no report required with clean closure. Additional

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Former Building 202 (UST-202-b)	#2 Fuel Oil	Removed 5-23-05. Case closed,	Residential USTs uncovered during house demolition. UST and approximately 30 tons soil removed. Post-excavation soil samples below criteria. Report not required. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Building 205 (UST-205-3)	#2 Fuel Oil	Removed 10-24-93. NJDEP closure approved 8-29-00.	NJDEP letter dated 9-21-95 requested additional soil samples along pipe run. Revised closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 206 (UST-206-4)	#2 Fuel Oil	Removed 10-21-93. Case closed.	Holes observed in UST during removal; approximately 20 CY of contaminated soil removed. Highest TPHC detection=384 mg/kg in confirmatory soil samples. Closure report submitted to NJDEP on 2-26-96. Additional information provided to NJDEP on April 14, 2015. NJDEP concurred on NFA on September 24, 2015.
Building 206 (UST-206-c)	#2 Fuel Oil	Removed 11-30-94. NJDEP closure approved 10-23-00.	UST found on-site. Tank had small holes and site remediated. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 207 (UST-207-211)	#2 Fuel Oil	Removed 11-1-93. NJDEP closure approved 8-29-00.	UST and potentially contaminated soil removed in November 1993. Monitoring well groundwater samples were clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 207 (UST-207-5)	#2 Fuel Oil	Removed 10-29-93. NJDEP closure approved 8-29-00.	UST removed on 10-29-93. Monitoring well groundwater samples were clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 208 (UST-208-6)	#2 Fuel Oil	Removed 10-19-93. NJDEP closure approved 10-10-03.	UST removed on 10-19-93; concentrations of TPHC in confirmatory soil samples below criteria. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 10-10-03.
Building 208 (UST-208-210)	#2 Fuel Oil	Removed 10-19-93. NJDEP closure approved 1-10-03.	Groundwater contamination observed; VOA+15 soil sample taken during removal. Residential UST with DICAR; all soil and groundwater results in compliance with NJDEP standards. No closure report required; letter report to close out DICAR submitted to NJDEP on 2-26-02.
Building 209 (UST-209-7)	#2 Fuel Oil	Removed 1-13-94. NJDEP closure approved 9-21-95.	Highest TPHC=39.3 ppm; no contamination observed. NJDEP closure approval letter dated 9-21-95.
Building 210 (UST-210-8)	#2 Fuel Oil	Removed 1-14-94. Case closed.	UST and 10 CY soil removed at location of highest TPHC detection of 3,440 mg/kg. No detections in groundwater above criteria. Closure report submitted to NJDEP on 2-26-96. Additional information provided to NJDEP on April 14, 2015. NJDEP concurred on NFA on September 24, 2015.
Building 211 (UST-211-9)	#2 Fuel Oil	Removed 11-27-01. NJDEP closure NA. Case closed.	TPH in closure soil samples ND except 3,968 mg/kg below tank. All analytical results in compliance with NJDEP standards. UST exempt from registration and reporting. Residential UST with no DICAR and no contamination above NJDEP criteria; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 212 (UST-212-10)	#2 Fuel Oil	Removed 3-29-01. NJDEP closure NA. Case open.	UST exempt from registration and reporting. 2015 – File review conducted. Fiberglass tank removed in 2001. Closure samples were taken and analyzed; however, no analyses were found in the file. The file was left Case Open probably because the analytical data report could not be located.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 213 (UST-213-11)	#2 Fuel Oil	Removed ~ 4-30-01. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted and supported Case Closed status of tank. TPH in closure soil samples ND.
Building 214 (UST-214-12)	#2 Fuel Oil	Removed 6-13-01. NJDEP closure NA. Case closed.	UST removed on 6-13-01; no contamination observed; all TRPH results were ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 219 (UST-219-13)	#2 Fuel Oil	Removed 6-19-01. NJDEP closure NA. Case closed.	UST removed on 6-19-01; no contamination observed; all TRPH results were ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 220B (UST-220-14)	#2 Fuel Oil	Removed 6-21-01. NJDEP closure NA. Case closed.	Residential UST with no contamination; closure report not required. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples ranged from ND to 3,224 mg/kg. Following excavation, TPH was ND in confirmatory samples.
Building 222 (UST-222-15)	#2 Fuel Oil	Removed 6-25-01. NJDEP closure NA. Case closed.	No contamination observed; all TRPH results were ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of the tank.
Building 223 (UST-223-16)	#2 Fuel Oil	Removed 6-29-01. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH was ND in all closure soil samples.
Building 225 (UST-225-17)	#2 Fuel Oil	Removed 2-14-01. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples ranged from ND to 197 mg/kg and was below NJDEP criteria.
Building 226 (UST-226-18)	#2 Fuel Oil	Removed 4-28-00. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples ranged from ND to 3,915 mg/kg. Low concentrations of ethylbenzene and xylenes detected in one sample at concentrations below NJDEP cleanup criteria (RDCSRS).
Building 227 (UST-227-19)	#2 Fuel Oil	Removed 11-7-00. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples was ND.
Building 228 (UST-228-20)	#2 Fuel Oil	Removed 11-1-00. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples for fiberglass tank was ND. In 2010, an additional investigation uncovered fuel lines and a steel UST. TPH in soil samples collected along the fuel lines ranged from ND to 555 mg/kg. The steel UST was covered with soil and left in the ground.
Building 228	#2 Fuel Oil	2010 – Steel UHOT discovered. Tank was covered with soil and left in the ground.	See UST-228-20.
Building 233 (UST-233-21)	#2 Fuel Oil	Removed 12-23-98. NJDEP approved closure 1-10-03.	UST removed on 12-23-98. TPH in initial soil samples was >7,000 mg/kg. After excavation, TPH was not detected in closure soil samples. UST exempt from registration and reporting. Closure report submitted to NJDEP on 5-15-02. NJDEP approved closure on 1-10-03. 2015 – File review conducted which supported Case Closed.
Building 234 (UST-234-22)	#2 Fuel Oil	Removed 2-5-99. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples was ND to 209 mg/kg.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 235 (UST-235-23)	#2 Fuel Oil	Removed 1-6-99. NJDEP closure NA. Case closed.	UST removed on 1-6-99; no contamination observed (all soil TPHC=ND). Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 236 (UST-236-24)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	No contamination observed (all soil TPHC=ND). Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 237 (UST-237-25)	#2 Fuel Oil	Removed 1-4-99. NJDEP closure approved 1-10-03.	UST removed on 1-4-99; no contamination observed (all soil TPHC=ND) after initial excavation. Closure report submitted to NJDEP on 5-15-02. NJDEP approved closure on 1-10-03. 2015 – File review conducted which supported Case Closed status of tank. Same excavation as Building 239.
Building 238 (UST-238-26)	#2 Fuel Oil	Removed 1-22-99. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. TPH was not detected in closure soil samples. Same excavation as Building 240.
Building 239 (UST-239-27)	#2 Fuel Oil	Removed 1-4-99. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. Same excavation as Building 237.
Building 240 (UST-240-28)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH not detected in closure soil samples. Same excavation as Building 238.
Building 241 (UST-241-29)	#2 Fuel Oil	Removed 9-23-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=329.03 mg/kg. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 242 (UST-242-30)	#2 Fuel Oil	Removed 10-26-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 243 (UST-243-31)	#2 Fuel Oil	Removed 9-28-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=169.26 mg/kg. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 244 (UST-244-32)	#2 Fuel Oil	Removed 10-26-94. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. This is the same tank as 246. NJDEP approved NFA for 246 on 1-10-03.
Building 245 (UST-245-33)	#2 Fuel Oil	Removed 10-6-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 246 (UST-246)	#2 Fuel Oil	Removed 10-20-98. NJDEP closure approved 1-10-03.	Residential UST with DICAR; all soil and groundwater results in compliance with NJDEP standards. No closure report required. Letter report to close out DICAR submitted to NJDEP on 3-05-02. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples ranged from non-detect to 276 mg/kg. NJDEP approved NFA on 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 247 (UST-247-34)	#2 Fuel Oil	Removed 10-7-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 248 (UST-248-35)	#2 Fuel Oil	Removed 10-15-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 249 (UST-249-36)	#2 Fuel Oil	Removed 11-12-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 250 (UST-250-37)	#2 Fuel Oil	Removed 11-16-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. 2015 – File review conducted which supported Case Closed status of tank. TPH non-detect in closure soil samples.
Building 251 (UST-251-38)	#2 Fuel Oil	Removed 11-2-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. Same excavation as Building 253.
Building 252 (UST-252-39)	#2 Fuel Oil	Removed 12-9-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 253 (UST-253-40)	#2 Fuel Oil	Removed 11-2-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=274 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. TPH in closure soil samples ranged from non-detect to 274 mg/kg. Same excavation as Building 251.
Building 254 (UST-254-41)	#2 Fuel Oil	Removed 11-23-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=204.43 mg/kg. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. Same excavation as Building 256.
Building 255 (UST-255-42)	#2 Fuel Oil	Removed 10-28-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=228 mg/kg. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.
Building 256 (UST-256-43)	#2 Fuel Oil	Removed 11-20-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=204.43 mg/kg. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required. 2015 – File review conducted which supported Case Closed status of tank. Same excavation as Building 254.
Building 257 (UST-257-200)	Diesel	Removed 4-8-98. NJDEP closure approved 1-10-03.	Non-residential UST and contaminated soil removed in April 1998. Groundwater investigation completed and all groundwater results below NJDEP GWQC. Closure report requesting NFA submitted to NJDEP 1-02-02. NJDEP approved closure on 1-10-03. 2015 – File review conducted which supported Case Closed status of tank. Tank at sewage pump station.
Building 258 (UST-258-44)	#2 Fuel Oil	Removed 12-8-98. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. 2015 – File review conducted which supported Case Closed status of tank.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 261 (UST-261)	#2 Fuel Oil	Removed 5-5-99. NJDEP closure approved 5-30-13.	Residential UST removed on 5-5-99. Highest TPHC was >3000 ppm. All analytical results in compliance with NJDEP standards. Letter report submitted to NJDEP on 3-5-02. NJDEP closure approval letter dated 5-30-13.
Building 261 (UST-261-45)	#2 Fuel Oil	Removed 5-5-99. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. UST removed on 5-5-99; no contamination observed. Residential UST with no DICAR and no contamination above NJDEP standards; no closure report required.
Building 262 (UST-262-46)	#2 Fuel Oil	Removed 8-11-99. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 263 (UST-263-47)	#2 Fuel Oil	Removed 2-15-00. NJDEP closure NA. Case closed.	UST removed on 2-15-00; no contamination observed. Residential UST with no DICAR. All soil sample results in compliance with NJDEP standards. No closure report required. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 264 (UST-264-48)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Highest TPHC=ND. Residential UST with no DICAR and no contamination; no closure report required. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 265 UST-265-49)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	UST exempt from registration and reporting. Residential UST with no DICAR and no contamination; no closure report required. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 266 (UST-266-50)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	UST exempt from registration and reporting. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 267 (UST-267-51)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	UST exempt from registration and reporting. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 268 (UST-268-52)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	UST exempt from registration and reporting. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 269 (UST-269-53)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	Old UST exempt from registration and reporting; contamination found during plumbing excavation. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Building 270 (UST-270-54)	#2 Fuel Oil	Removed 7-6-94. NJDEP closure approved 2-24-00.	UST and 20 CY of stained soil removed. Highest confirmatory sample result for TPHC=686 mg/kg. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 271 (UST-271-55)	#2 Fuel Oil	Removed 6-9-94. NJDEP closure approved 1-10-03.	UST removed and 100 CY stained soil excavated. Highest confirmatory sample result for TPHC=1,269 mg/kg. 2 Geoprobe® groundwater samples analyzed – in compliance with NJDEP standards. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 273 (UST-273-65)	Diesel	Removed 6-4-08. Case open.	UST Facility Certification Questionnaire submitted to NJDEP on 6-9-08. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Building 273 (UST-273-66)	Gasoline	Removed 6-3-08. Case open.	UST Facility Certification Questionnaire submitted to NJDEP on 6-9-08. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 273 (UST-273-67)	Gasoline	Removed 6-2-08. Case open.	UST Facility Certification Questionnaire submitted to NJDEP on 6-9-08. Documentation requesting NFA submitted on July 30, 2015. NJDEP concurred on NFA on October 13, 2015.
Building 275 (UST-275-56)	#2 Fuel Oil	Removed 7-21-98. NJDEP closure approved 10-23-00.	UST and potentially contaminated soil removed. Highest TPHC=5,331 mg/kg, south wall adjacent to water main and sewer. VOA results were nondetect. Closure report submitted to NJDEP 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 276 (UST-276-23)	#2 Fuel Oil	Removed 6-21-96. NJDEP closure approved 10-23-00.	UST removed on 6-21-96. Closure report submitted to NJDEP 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 277 (UST-277-24)	#2 Fuel Oil	Removed 3-13-97. NJDEP closure approved 1-10-03.	UST removed and holes noted in tank; contaminated soil was removed. Confirmatory soil and groundwater samples were below State criteria. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 280 (UST-280-25)	#2 Fuel Oil	Removed 3-27-97. NJDEP closure approved 10-23-00.	Sheen observed on groundwater; contaminated soil remediated. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 282 (UST-282-57)	#2 Fuel Oil	Removed 10-27-93. NJDEP closure approved 8-29-00.	UST and contaminated soil removed in October/November 1993. Results of post-excavation soil samples and confirmatory groundwater samples were below State criteria. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 283 (UST-283-229)	Gasoline	Removed 8-28-97. NJDEP closure approved 1-10-03.	UST had numerous holes; sheen observed on groundwater. Highest soil TRPH=4,351.68 mg/kg. All soil sample results are less than NJDEP NRDCSCC. Benzene and toluene were above NJDEP GWQC. Three monitoring wells installed in 1999 and 2000. Quarterly groundwater sampling showed concentrations of benzene, ethylbenzene, xylenes, aluminum, iron, and lead above NJDEP GWQC. Continued quarterly sampling recommended to determine need for additional remediation. Closure report submitted to NJDEP 1-2-02. NJDEP closure approval letter received 1-10-03. Groundwater to be addressed uner FTMM-61.
Building 283 (UST-283-58)	#2 Fuel Oil	Removed 5-28-90. NJDEP closure NA. Case closed.	UST removed on 5-28-90; no contamination observed; no samples taken. SRF and SACS submitted to NJDEP on 11-22-91. Additional information provided by the Army on January 30, 2015. NJDEP provided no comment as location of former tank is still unknown.
Building 283 (UST-283-59)	#2 Fuel Oil	Removed 8-11-97. NJDEP closure approved on 2-24-00.	Oil removed from UST on 11-16-94; UST removed on 8-11-97. Site is clean; TPHC <1000 mg/kg. Soil and groundwater assessment completed. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letters dated 2-24-00 and 5-30-13.
Building 286 (UST-286-201)	Gasoline	Removed 5-18-98. NJDEP closure approved 10-23-00.	UST removed on 5-18-98. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 286 (UST-286-60)	#2 Fuel Oil	Removed 6-26-98. NJDEP closure approved 2-24-00.	Minor fill area contamination observed during UST removal; approximately 3 CY of soil removed. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter received 2-24-00.
Building 287 (UST-287-61)	#2 Fuel Oil	Removed 10-28-93. NJDEP closure NA.	Tank removed on 10-28-93; closure certification dated 2-20-95. Needs RI; groundwater contamination noted. Needs monitoring well sampling and analysis. RIR contracted to Tetra Tech, Inc. Additional information provided to NJDEP on April 14, 2015. NJDEP concurred on NFA on September 24, 2015.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 288 (UST-288-62)	#2 Fuel Oil	Removed 7-15-97. NJDEP closure approved 10-23-00.	UST was intact at time of removal. TPHC >3000 mg/kg next to building. Groundwater samples were all clean. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 289 (UST-289-63)	#2 Fuel Oil	Removed 9-1-94. NJDEP closure approved 10-23-00.	Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Former Building 290 (UST-290-193)	Waste Oil	Removed 12-17-91. NJDEP closure approved in 10-93.	UST removed on 12-17-91; no release noted. Closure report requesting NFA dated October 1993. NJDEP closure approval received in October 1993. NJDEP concurred on NFA in letter dated November 16, 2015.
Building 290 (UST-290-224)	Gasoline	Removed 9-2-94. NJDEP closure approved 1-10-03.	All soil sample results below NJDEP RDCSCC; water quality from two monitoring wells installed for UST 81533-64 suggested no impacts. Closure report requesting NFA submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.
Former Building 290 (UST-290-225)	Gasoline	Removed 9-2-94. NJDEP closure approved 1-10-03.	All soil sample results below NJDEP RDCSCC; water quality from two monitoring wells installed for UST 81533-64 suggested no impacts. Closure report requesting NFA submitted to NJDEP 1-2-02. NJDEP closure approval letter dated 1-10-03.
Former Building 290 (UST-290-64)	#2 Fuel Oil	Removed 9-12-94. NJDEP closure approved 8-29-00.	Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00. Additional information provided by the Army on January 31, 2015. Additional sampling to be performed to support closure.
Building 291 (UST-291-65)	#2 Fuel Oil	Removed 8-18-97. NJDEP closure approved 2-24-00.	UST removed, had several holes; 255 CY of potentially contaminated soil removed. Highest confirmatory sampling results for TPHC was 1,143 mg/kg, no detections in groundwater. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 292 (UST-292-66)	#2 Fuel Oil	Removed 9-7-94. NJDEP closure approved 10-23-00.	Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 293 (UST-293-67)	#2 Fuel Oil	Removed 9-2-94. NJDEP closure approved on 5-30-13.	No holes in tank and no evidence of soil contamination observed. Post-excavation soil samples below NJDEP soil criteria. Closure report requesting NFA submitted to NJDEP on 2-26-96. NJDEP closure approval letter dated 5-30-13.
Building 295 (UST-295-68	#2 Fuel Oil	Removed 9-15-94. NJDEP closure approved 8-29-00.	Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 296 (UST-296-69)	#2 Fuel Oil	Removed 11-16-93. NJDEP closure NA. Case closed.	No holes in tank and 8 CY of potentially contaminated soil removed. Post-excavation soil samples below NJDEP soil criteria. Closure report submitted to NJDEP on 2-26-96. Closure report not required. In November 16, 2015 letter from NJDEP, NJDEP indicates closure report not available and thus no comment on closure can be made.
Building 296 (UST-296-213)	Gasoline	Removed 11-4-93. NJDEP closure approved 1-10-03.	Numerous holes and soil staining were noted following tank removal; sheen was observed on groundwater. Post-excavation soil sample results were less than NJDEP RDCSCC. Groundwater concentrations exceeded NJDEP GWQC for benzene, methylene chloride, bis(2-ethylhexyl)phthalate, aluminum, iron, lead, manganese, silver, chromium and sodium. Negotiated with NJDEP for six rounds of clean analytical to close out. Further action recommended to be addressed in a RA Work Plan. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 296 (UST-296-214)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 296 (UST-296-215)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-216)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-217)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-218)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-219)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-220)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-221)	Gasoline	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-222)	Diesel	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 296 (UST-296-223)	Diesel	Removed 11-4-93. NJDEP closure approved on 1-10-03.	See UST-296-213.
Building 360 (UST-360-70)	#2 Fuel Oil	Removed 10-13-94. NJDEP closure NA. Case closed.	No release noted; highest soil TRPH=101 mg/kg. Residential UST with no contamination and no DICAR; no closure report required.
Building 361 (UST-361-71)	#2 Fuel Oil	Removed 5-27-94. NJDEP closure NA. Case closed.	No release noted. Since UST was non-regulated, closure report prepared and filed in DPW Environmental Office 10-21-97; no submission to NJDEP.
Building 362 (UST-362-72)	#2 Fuel Oil	Removed 5-26-94. NJDEP closure NA. Case closed.	No release noted. Since UST is non-regulated, closure report prepared and filed in DPW Environmental Office 10-21-97; no submission to NJDEP.
Building 363 (UST-363-73)	#2 Fuel Oil	Removed 7-2-94. NJDEP closure NA. Case closed.	No release noted. SRF sent to NJDEP but not required. Since UST is non-regulated, closure report prepared and filed in DPW Environmental Office 10-21-97; no submission to NJDEP.
Building 364 (UST-364-74)	#2 Fuel Oil	Removed 7-13-94. NJDEP closure NA. Case closed.	No release noted; highest soil TRPH=109 mg/kg. Residential UST with no contamination and no DICAR; no closure report required.
Former Building 400 (UST-400-70)	#2 Fuel Oil	Removed 5-7-98. NJDEP closure approved on 2-24-00.	Clean site. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Former Building 401 (UST-401-26)	#2 Fuel Oil	Removed 5-28-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. Recommended soil sampling for TPHC analysis to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Former Building 410 (UST-410-27)	#2 Fuel Oil	Removed 5-14-97. NJDEP closure approved 7-10-98.	UST in good shape--no visible discharge. Closure report submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Former Building 411 UST-411-28)	#2 Fuel Oil	Removed 7-21-94. NJDEP closure approved 5-30-13.	No holes in tank and no potentially contaminated soil observed. Post-excavation soil samples below NJDEP soil criteria. Closure report requesting NFA submitted to NJDEP on 2-26-96. NJDEP closure letter dated 5-30-13.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 412 (UST-412-29)	#2 Fuel Oil	Removed 1-7-97. NJDEP closure approved 8-29-00.	Oil removed from UST on 11-3-94; UST removed on 1-7-97. TPHC was 3,070 mg/kg in soil next to building. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 413 (UST-413-30)	#2 Fuel Oil	Removed 11-19-96. NJDEP closure approved 8-29-00.	UST and 47 CY of potentially contaminated soil removed. TPHC <1,000 mg/kg. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 414 (UST-414-31)	#2 Fuel Oil	Removed 10-17-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 11-1-94; UST removed on 10-17-96. No release noted. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 416 (UST-416-32)	#2 Fuel Oil	Removed 6-18-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. Recommended soil sampling for TPHC analysis to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Building 417 (UST-417-33)	#2 Fuel Oil	Removed 11-13-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 10-4-94; UST removed on 11-13-96. TPHC <1,000 mg/kg. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 418 (UST-418-34)	#2 Fuel Oil	Removed 2-11-97. NJDEP closure approved 7-10-98.	Oil removed from UST on 11-1-94; UST removed on 2-11-97. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 419 (UST-419-35)	#2 Fuel Oil	Removed 10-18-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 11-3-94; UST removed on 10-18-96. Closure report submitted to NJDEP on 7-27-98. NJDEP closure approval letter dated 8-29-00.
Building 420 (UST-420-36)	#2 Fuel Oil	Removed 10-23-96. NJDEP closure approved 7-10-98.	Oil removed from UST on 11-3-94. UST removed on 10-23-96. No release noted. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 421 (UST-421-37)	#2 Fuel Oil	Removed 7-27-94. NJDEP closure approved 5-30-13.	Oil removed from UST for reuse on 3-12-93. UST removed on 7-22-94; highest soil TPHC=2,025 mg/kg. Closure report submitted to NJDEP on 10-23-97. NJDEP closure letter dated 5-30-13.
Building 422 (UST-422-38)	#2 Fuel Oil	Removed 2-21-97. NJDEP closure approved 7-10-98.	Oil removed form UST on 11-3-94; UST removed on 2-21-97. Clean tank site. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 423 (UST-423-39)	#2 Fuel Oil	Removed 7-25-94. NJDEP closure approved 5-30-13.	UST removed on 7-25-94. No release noted. Closure report submitted to NJDEP on 2-26-96. NJDEP closure letter dated 5-30-13.
Building 426 (UST-426-40)	#2 Fuel Oil	Removed 5-1-97. NJDEP closure approved 1-10-03.	UST and contaminated soil (highest TPHC = 15,680 mg/kg) removed. All confirmatory soil samples below criteria and no detections in groundwater. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 427 (UST-427-41)	#2 Fuel Oil	Removed 12-5-96. NJDEP closure approved 7-10-98.	No evidence of contamination and soil sample results non-detect for TPHC. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 428 (UST-428-42)	#2 Fuel Oil	Removed 1-21-97. NJDEP closure approved 8-29-00.	Oil removed from UST on 11-3-94; UST removed on 1-21-97. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 429 (UST-429-43)	#2 Fuel Oil	Removed 12-13-96. NJDEP closure approved 10-23-00.	UST and 340 CY of contaminated soil removed. One location exceeded TPHC criteria of 10,000 mg/kg left in place because it was under the chimney. VOC results for this location were non-detect. Groundwater results were below GWQC. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 430 (UST-430-44)	#2 Fuel Oil	Removed 5-19-97. NJDEP closure approved 7-10-98.	UST in good shape--no discharge, clean excavation. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 430 (UST-430-45)	#2 Fuel Oil	Removed 7-26-94. NJDEP closure NA. Case closed.	UST removed on 7-26-94. Results of soil and groundwater samples below State criteria. Closure report submitted to NJDEP on 10-23-97. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Building 430 (UST-430-46)	#2 Fuel Oil	Removed 4-13-98. NJDEP closure approved 2-24-00.	UST in service until 4-1-98. UST removed on 4-13-98; site clean. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 434 (UST-434-47)	#2 Fuel Oil	Removed 10-31-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 10-20-94. UST removed on 10-31-96. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 437 (UST-437)	#2 Fuel Oil	Removed 4-16-10. Case open. RI on-going.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPH and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required..
Building 439 (UST-439-48)	#2 Fuel Oil	Removed 12-18-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 10-20-94; UST removed on 12-18-96. Closure report submitted to NJDEP on 7-27-98. NJDEP closure approval letter dated 8-29-00.
Former Building 440 (UST-440)	#2 Fuel Oil	Removed 1-29-10. Case open.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required..
Former Building 441 (UST-441)	#2 Fuel Oil	Removed 2-22-10. Case open. RI on-going.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required..
Former Building 443 (UST-443-49)	#2 Fuel Oil	Removed 7-14-94. NJDEP closure NA. Case closed.	UST removed on 7-14-94; no release noted. Closure report submitted to NJDEP on 2-26-96. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Former Building 444 (UST-444)	#2 Fuel Oil	Removed 1-19-10. Case open. RI on-going.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Former Building 445 (UST-445)	#2 Fuel Oil	Removed 3-11-10. Case closed.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12.
Former Building 448 (UST-448)	#2 Fuel Oil	Removed 1-27-10. Case open. RI on-going.	UHOT removed. Sheen on groundwater at 6 ft bgs. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Former Building 450 (UST-450)	#2 Fuel Oil	Removed 7-27-10. Case open. RI on-going.	UHOT removed. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Building 451 (UST-451)	#2 Fuel Oil	Removed 4-16-10. Case open. RI on-going.	UHOT removed. Contaminated soil and impact to groundwater at 5 ft bgs. Leak appeared to be from piping and UST fill port above UST. Visually contaminated soils excavated and post-excavation soil samples collected. TPHC and VOCs below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required..
Former Building 453 (UST-453-50)	#2 Fuel Oil	Removed 2-5-97. NJDEP closure approved 7-10-98.	UST removed on 2-5-97; no release noted. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 454 (UST-454-51)	#2 Fuel Oil	Removed 5-9-97. NJDEP closure approved 7-10-98.	UST removed on 5-9-97. No visible discharge. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 474	#2 Fuel Oil	Removed 12-9-10. NJDEP closure NA. Case closed.	Clean site, not contaminated. NJDEP case manager Larry Quinn onsite for UHOT removal. Additional information was submitted by the Army on April 22, 2015 and an NFA approved by NJDEP on August 25, 2015.
Building 475 (UST-475-52)	#2 Fuel Oil	Removed 2-19-97. NJDEP closure approved 10-23-00.	UST in good shape, but evidence of a discharge was noted. 60 CY of potentially contaminated soil removed, highest confirmatory soil sample concentration of TRPH = 401 mg/kg. Groundwater results were below NJDEP GWQC. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 480 (UST-480-53)	#2 Fuel Oil	Removed 2-12-97. NJDEP closure approved 7-10-98.	UST in good shape-excavation was clean. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 482 (UST-482-54)	#2 Fuel Oil	Removed 8-11-94. NJDEP closure approved 1-10-03.	UST and contaminated soil removed. Soil TPH concentrations below criteria, soil VOCs non-detect and groundwater results below GWQC. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03. Clarification on TPH results required by NJDEP.
Former Building 483 (UST-483-55)	#2 Fuel Oil	Removed 3-19-98. NJDEP closure approved 10-23-00.	UST removed on 3-19-98. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 484 (UST-484-56)	#2 Fuel Oil	Removed 10-13-95. NJDEP closure approved 8-29-00.	UST had two holes when removed --13 CY of potentially contaminated soil removed. Maximum TRPH = 720 mg/kg in confirmatory samples. Closure report submitted to NJDEP on 7-27-98. NJDEP closure approval letter dated 8-29-00.
Former Building 485 (UST-485-57)	#2 Fuel Oil	Removed 11-20-95. NJDEP closure approved 8-29-00.	UST had numerous holes--remediation stopped until building was removed; contaminated soil was remediated. Groundwater sampling completed and all samples were clean. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 490 (UST-490-58)	#2 Fuel Oil	Removed 5-25-90. NJDEP closure NA. Case closed.	UST removed on 5-25-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS sent to NJDEP on 11-22-91. Site closed by NJDEP. Additional information submitted to NJDEP on April 22, 2015. Per letter from NJDEP dated August 25, 2016 additional work still required.
Building 491 (UST-491-71)	Diesel	Removed 7-27-94. NJDEP closure approved 1-10-03.	UST and contaminated soil removed in July 1994. Highest remaining TPHC in soil=2, 012.75 mg/kg. All groundwater results below NJ GWQC. Closure report requesting NFA submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 492 (UST-492-59)	#2 Fuel Oil	Removed 5-15-97. NJDEP closure approved 8-29-00.	UST and 5 CY of potentially contaminated soil removed. Highest confirmatory TPHC detection was 263 mg/kg. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 500 (UST-500-75)	#2 Fuel Oil	Removed 7-8-97. NJDEP closure approved 10-23-00.	UST removed on 7-8-97; UST intact; stained soil near fill pipe. Soil remediation completed. Highest TPHC=975 mg/kg. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 501 (UST-501-76)	#2 Fuel Oil	Removed 6-30-97. NJDEP closure approved 5-30-13.	Oil removed from UST on 10-31-94; UST removed on 6-30-97. UST site is clean. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 5-30-13.
Building 502 (UST-502-77)	#2 Fuel Oil	Removed 10-11-96. NJDEP closure approved 8-29-00.	UST removed on 10-11-96; no release noted. Closure report submitted to NJDEP on 7-27-98. NJDEP closure approval letter dated 8-29-00.
Former Building 538 (UST-538)	#2 Fuel Oil	Removed 10-21-09. Case open. RI on-going.	UHOT removed on 10-21-09. Discharge noted. Contaminated soils subsequently excavated and post-excavation samples indicated TPHC below NJDEP soil cleanup criteria. Monitoring wells installed and samples indicate no groundwater impacts from USTs. Closure report submitted to NJDEP on 3-16-12. RI on-going.
Former Building 539 (UST-539)	#2 Fuel Oil	Removed 10-21-09. Case open. RI on-going.	UHOT removed on 10-21-09. Discharge noted. Contaminated soils subsequently excavated and post-excavation samples indicated TPHC below NJDEP soil cleanup criteria. Monitoring wells installed and samples indicate no groundwater impacts from USTs. Closure report submitted to NJDEP on 3-16-12. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Former Building 540 (UST-540)	#2 Fuel Oil	Removed 10-21-09. Case open.	UHOT removed on 10-21-09. No discharge noted. Site clean, all soil samples <5,100 ppm TPHC. Closure report submitted to NJDEP on 3-16-12. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Former Building 541 (UST-541)	#2 Fuel Oil	Removed 10-21-09. Case open. Remediation on-going.	UHOT removed on 10-21-09. Discharge noted. Contaminated soils subsequently excavated and post-excavation samples indicated TPHC below NJDEP soil cleanup criteria. Monitoring wells installed and samples indicate no groundwater impacts from USTs. Closure report submitted to NJDEP on 3-16-12. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Former Building 542 (UST-542)	#2 Fuel Oil	Removed 10-21-09. Case open. RI on-going.	UHOT removed on 10-21-09. Discharge noted. Contaminated soils subsequently excavated and post-excavation samples indicated TPHC below NJDEP soil cleanup criteria. Monitoring wells installed and samples indicate no groundwater impacts from USTs. Closure report submitted to NJDEP on 3-16-12. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.
Former Building 543 (UST-543)	#2 Fuel Oil	Removed 10-21-09. Case open. RI on-going.	UHOT removed on 10-21-09. Discharge noted. Contaminated soils subsequently excavated and post-excavation samples indicated TPHC below NJDEP soil cleanup criteria. Monitoring wells installed and samples indicate no groundwater impacts from USTs. Closure report submitted to NJDEP on 3-16-12. RI on-going.
Former Building 544 (UST-544)	#2 Fuel Oil	Removed 10-21-09. Case open.	UHOT removed on 10-21-09. No discharge noted. Site clean, all soil samples <5,100 ppm TPHC. Closure report was submitted by the Army on February 10, 2015. NJDEP provided NFA in letter dated August 31, 2015.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 545 (UST-545-78)	#2 Fuel Oil	Removed 12-6-94. Case closed.	Several holes noted in UST and evidence of potentially contaminated soil. Approximately 160 CY of contaminated soil removed during tank removal. Post-excavation soil samples below NJDEP soil criteria. Closure report submitted to NJDEP on 10-23-97. Closure report re-submitted on December 8, 2015. NJDEP approval pending.
Building 550 (UST-550-79)	#2 Fuel Oil	Removed 10-10-95. NJDEP closure approved 10-23-00.	UST removed, extensive contamination noted and remediation completed. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 551 (UST-551-80)	#2 Fuel Oil	Removed 4-14-98. NJDEP closure approved 8-29-00.	Oil removed from UST on 10-31-94; UST removed on 4-14-98. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 552 (UST-552-81)	#2 Fuel Oil	Removed 10-26-95. NJDEP closure approved 1-10-03.	UST had numerous holes when removed. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 1-10-03.
Building 563 (UST-563-82)	#2 Fuel Oil	Removed 9-26-94. Case closed.	On 3-9-93 oil removed from UST for reuse. UST removed on 9-26-94; no release noted. Post-excavation soil samples below NJDEP soil criteria. Closure report requesting NFA submitted to NJDEP on 2-26-96. Closure report re-submitted on December 8, 2015. NJDEP approval pending.
Building 600 (UST-600-212)	#2 Fuel Oil	Removed 11-8-93. NJDEP closure approved 1-10-03.	Two VOA+15 soil samples taken; highest TPHC>13,000 mg/kg. Investigated and remediated under the 600 Area Work Plan, which was approved by NJDEP. Groundwater results indicated no impact to groundwater. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 600 (UST-600-83)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	Investigated and removed under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 601 (UST-601-84)	#2 Fuel Oil	Removed 8-16-94. NJDEP closure approved 6-1-94.	UST removed on 8-16-94. 10 CY of potentially contaminated soil removed from piping trench. Post-excavation soil sample results were below NJDEP RDCSCC. Closure report submitted to NJDEP on 10-23-97. NJDEP approved closure on 6-1-94.
Former Building 601 (UST-601-85)	#2 Fuel Oil	Removed 8-17-94. NJDEP closure approved 1-10-03.	UST removed and water found in fuel. No groundwater results above NJDEP GWQC; highest soil TRPH=397 mg/kg. Closure report requesting NFA submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.
Building 605 (UST-605-85)	#2 Fuel Oil	Removed 8-17-94. NJDEP closure approved 1-10-03.	Water found in fuel and UST taken out of service. UST removed on 8-17-94. No groundwater results above NJDEP GWQC; highest soil TRPH=397 mg/kg. Closure report requesting NFA submitted to NJDEP 1-2-02. NJDEP closure approval letter dated 1-10-03.
Former Building 608 (UST-608-86)	#2 Fuel Oil	Removed 11-29-94. NJDEP closure NA. Case closed.	Oil removed from UST in September 1994. UST removed on 11-29-94: no release noted. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending.
Former Building 611 (UST-611-87)	#2 Fuel Oil	Removed 8-18-94. NJDEP closure approved 1-10-03.	UST removed on 8-18-94. Highest soil TRPH=57.8 mg/kg. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 614 (UST-614-88)	#2 Fuel Oil	Removed 6-14-90. NJDEP closure NA. Case closed.	UST removed on 6-14-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Closure report submitted on December 8, 2015. NFA requested – NJDEP approval pending.
Former Building 615 (UST-615-89)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	Potential soil and groundwater contamination investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 616 (UST-616-90)	#2 Fuel Oil	Removed 12-7-94. NJDEP closure approved 10-7-94.	Oil removed from UST on 8-25-94; UST and 198 CY of contaminated soil removed. Final confirmatory soil samples were below NJDEP RDCSCC. Groundwater samples were below NJDEP GWQC. Closure report submitted to NJDEP on 10-23-97. NJDEP approved closure on 10-7-94. Updated report submitted on December 8, 2015. TPH concentrations greater than 5100 ppm. Additional evaluation required.
Former Building 618 (UST-618-91)	#2 Fuel Oil	Removed 8-19-94. NJDEP closure approved 1-10-03.	Potential soil and groundwater contamination investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 619 (UST-619-92)	#2 Fuel Oil	Removed 8-23-94. NJDEP closure approved 1-10-03.	Holes noted in tank during removal; investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 620 (UST-620-93)	#2 Fuel Oil	Removed 12-7-94. NJDEP closure NA. Case closed.	Oil removed from UST on 9-20-94; UST removed on 12-7-94. No release noted upon removal. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending.
Former Building 621 (UST-621-94)	#2 Fuel Oil	Removed 8-25-94. NJDEP closure approved 1-10-03.	Holes noted in tank when removed, but soil was clean (highest TRPH=174 mg/kg). Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 622 (UST-622-95)	#2 Fuel Oil	Removed 5-28-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending.
Former Building 625 (UST-625-96)	#2 Fuel Oil	Removed 8-25-94. NJDEP closure NA. Case closed.	UST removed on 8-25-94; no release noted. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending.
Former Building 634 (UST-634)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	During UST removal contaminated debris identified. Soil TPHC=136,223 mg/kg. Investigated and remediated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 635 (UST-635)	#2 Fuel Oil	Removed 10-7-94. NJDEP closure approved 5-30-13.	Soil was removed from around the tank on 10-7-94. TPHC result for soil sample 1662.1 was 12.4 mg/kg TPHC. No contamination observed. Residential UST with no DICAR and no contamination; no closure report required. NJDEP closure approval letter dated 5-30-13.
Former Building 637 (UST-637)	#2 Fuel Oil	Removed 10-7-94. NJDEP closure NA.	Soil was removed from around tank on 10-7-94. No contamination observed. Residential UST with no DICAR and no contamination; no closure report required. Closure report submitted on December 8, 2015. NFA requested – NJDEP approval pending
Former Building 638 (UST-638)	#2 Fuel Oil	Removed 10-7-98. NJDEP closure approved 1-10-03.	10/7/94, Wove found, dirt removed from around tank, found suspected UST location. No UST found; found old tape reels for computer at 8 ft depth, Sample 1666.1 contained TPHC=6,823.9 mg/kg. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 639 (UST-639-a)	#2 Fuel Oil	Removed 10-21-94. NJDEP closure approved 1-10-03.	Potential soil and groundwater contamination investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 639 (UST-639-b)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	10-7-94, No UST; dirt removed from around tank, backfill. Found site based on old drawings and relationship to other sites, Sample1663.1 had TPHC=9,518.7 mg/kg. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5/15/02. NJDEP closure approval letter dated 1-10-03.
Former Building 640 (UST-640)	#2 Fuel Oil	Removed 10-21-94. NJDEP closure approved 1-10-03.	Soil was removed on 10-21-94. Sample 1660.1 was taken, and had TPHC=10,452.7 mg/kg. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 641 (UST-641)	#2 Fuel Oil	Removed 10-21-94. NJDEP closure approved 1-10-03.	UST removed; found contaminated debris. Soil TPHC = 2,361.2 mg/kg. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 642 (UST-642)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 5-30-13.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. NJDEP closure approval letter dated 5-30-13.
Former Building 643 (UST-643)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 5-30-13.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. All analytical results within NJDEP standards; highest soil TRPH=182 mg/kg. Tank was previously removed during building demolition and original excavations were filled with old construction material and were back-filled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. NJDEP closure approval letter dated 5-30-13.
Former Building 644 (UST-644)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	On 9-29-94, excavation visually observed to contain heavy organic material. Tank was previously removed during building demolition and original excavations were filled with old construction material. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 645 (UST-645)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean; highest soil TRPH=491 mg/kg. Tank was previously removed during building demolition and excavations were filled with old construction material. Residential UST with no contamination and no DICAR; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 646 (UST-646)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. All analytical results within NJDEP standards; highest soil TRPH=225 mg/kg. Tank was previously removed during building demolition and original excavations were filled with old construction material and were back-filled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 647 (UST-647)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 648 (UST-648)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 649 (UST-649)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 650 (UST-650)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 651 (UST-651)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-29-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. Tank was previously removed during building demolition and original excavations were filled with old construction materials and were backfilled on 9-29-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 652 (UST-652)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-30-94, excavation visually observed to contain heavy organic material. Soil in excavation was clean. All analytical results within NJDEP standards; highest soil TRPH=248 mg/kg. Tank was previously removed; excavation was backfilled on 9-30-94. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 653 (UST-653)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	On 9-30-94, excavation visually observed to contain heavy organic material. Site was clean; highest soil TRPH=373 mg/kg and soil VOCs=ND. Residential UST with no contamination and no DICAR; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 654 (UST-654)	#2 Fuel Oil	Removed 10-4-94. NJDEP closure NA. Case closed.	UST removed 08-09-94. Site is clean; highest soil TRPH=82.1 mg/kg. Residential UST with no contamination and no DICAR; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 655 (UST-655-97)	#2 Fuel Oil	Removed 8-16-94. NJDEP closure NA. Case closed.	Residential tank removed on 8-16-94. No contamination observed; highest soil TRPH=168 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 656 (UST-656-98)	#2 Fuel Oil	Removed 8-16-94. NJDEP closure NA. Case closed.	UST removed 8-16-94. No contamination observed; highest soil TRPH=183 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 657 (UST-657-99)	#2 Fuel Oil	Removed 8-11-94. NJDEP closure NA. Case closed.	UST removed 8-11-94. No contamination observed; highest soil TRPH=84.6 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 658 (UST-658-100)	#2 Fuel Oil	Removed 8-15-94. NJDEP closure NA. Case closed.	UST removed 8-15-94. No contamination observed; highest soil TRPH=171 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 659 (UST-659-101)	#2 Fuel Oil	Removed 8-21-94. NJDEP closure NA. Case closed.	UST removed 8-21-94; no release noted. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending
Former Building 660 (UST-660)	#2 Fuel Oil	Removed 10-13-94. NJDEP closure NA. Case closed.	UST removed 10-13-94. No contamination observed; highest soil TRPH=156 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 661 (UST-661)	#2 Fuel Oil	Removed 10-13-94. NJDEP closure NA. Case closed.	UST removed 10-13-94. No contamination observed; highest soil TRPH=739 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 662 (UST-662)	#2 Fuel Oil	Removed 10-11-94. NJDEP closure NA. Case closed.	UST removed 10-11-94. No contamination observed; highest soil TRPH=115 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 663 (UST-663)	#2 Fuel Oil	Removed 10-11-94. NJDEP closure NA. Case closed.	Residential tank removed. No contamination observed; highest soil TRPH=97.1 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 664 (UST-664)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	10-5-94 DPW investigated site, found no contamination. UST had been removed and the site backfilled at some unknown time. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 665 (UST-665)	#2 Fuel Oil	Removed 8-16-94. NJDEP closure NA. Case closed.	UST previously removed and clean fill added. No contamination observed. Residential UST with no DICAR and no contamination; no closure report required. UST closure review

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 666 (UST-666)	#2 Fuel Oil	Removal date unknown. NJDEP closure approved 1-10-03.	10-5-94, no tanks were found, UST was previously removed and clean fill added. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 667 (UST-667)	#2 Fuel Oil	Removed 10-12-94. NJDEP closure NA. Case closed.	UST removed 10-12-94. No contamination observed; highest soil TRPH=34.6 mg/kg. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Former Building 669 (UST-669-102)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA. Case closed.	9-22-98, Notified NJDEP that UST was residential and should be delisted. Residential UST with no DICAR and no contamination; no closure report required. UST closure review summary and data submitted December 8, 2015. NFA requested – NJDEP concurrence pending.
Building 670/671 (UST-671-103)	#2 Fuel Oil	Removed 8-19-97. NJDEP closure approved 2-24-00.	Soil remediation completed. Groundwater not encountered. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 676 (UST-676-104)	#2 Fuel Oil	Removed 6-13-1990. NJDEP closure NA. Case closed.	UST removed on 6-13-90; no contamination observed; no samples taken. Recommend soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11/22/91.
Building 678 (UST-678-105)	#2 Fuel Oil	Removed 8-29-94. NJDEP closure approved 1-10-03.	UST removed 8-29-94. Site investigation completed. All groundwater results below NJDEP GWQC; highest TRPH=545 mg/kg. Closure report requesting NFA submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.
Building 682 (UST-682-106)	#2 Fuel Oil	Removed 12-9-94. NJDEP closure NA. Case closed.	Oil removed from UST on 9-12-94; UST removed on 12-9-94. No release noted. Closure report submitted to NJDEP on 2-26-96.
Building 686 (UST-686-107)	#2 Fuel Oil	Removed 12-8-94. NJDEP closure approved 1-10-03.	Oil removed from UST on 8-29-94; UST removed on 12-8-94. Investigated under the 600 Area Work Plan, which was approved by NJDEP. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 689 (UST-689-108)	#2 Fuel Oil	Removed 11-9-93. NJDEP closure approved 8-29-00.	Soil samples below State criteria (highest TPHC=4,030 mg/kg). Groundwater samples collected and were clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 689 (UST-689-109)	#2 Fuel Oil	Removed 11-12-93. NJDEP closure approved 8-29-00.	Soil samples below State criteria (highest TPHC=1,140 mg/kg). Groundwater samples collected and were clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Former Building 692 (UST-692-110)	#2 Fuel Oil	Removed 6-1-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP.
Building 695 (UST-695-111)	#2 Fuel Oil	Removed 7-15-98. NJDEP closure approved 5-30-13.	UST removed on 7-15-98; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00. Subsequent NJDEP closure approval letter dated 5-30-13.
Former Building 697 (UST-697-194)	Waste Oil	Removed 6-1-90. NJDEP closure approved 1-10-03.	UST removed on 6-1-90. Highest soil TPHC=457.6 mg/kg. Closure report submitted to NJDEP on 2-26-96. Revised closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter received 1-10-03.
Former Building 697 (UST-697-195)	Waste Oil	Removed 6-1-90. NJDEP closure approved 1-10-03.	See UST-697-194.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 697 (UST-697-196)	Waste Oil	Removed 6-1-90. NJDEP closure approved 1-10-03.	See UST-697-194.
Building 699 (UST-699-112)	#2 Fuel Oil	Removed 6-9-98. NJDEP closure approved 1-10-03.	Oil removed from UST on 9-16-94. Tank changed from steel to fiberglass-reinforced plastic (FRP); FRP tank removed on 6-9-98. Clean site--highest soil TRPH=346 mg/kg. Closure report submitted to NJDEP 7-17-01. NJDEP closure approval letter dated 1-10-03.
Building 699 (UST-699-185)	Gasoline	Removed 4-6-07. Case open. RA on-going.	USTs replaced with ASTs. Groundwater recovery system online--carbon treatment and SVE with purge. 13 monitoring wells for site. USTs removed. Replaced with ASTs. RA on-going.
Building 699 (UST-699-186)	Gasoline	Removed 4-7-07. Case open. RA on-going.	See UST-699-185.
Building 699 (UST-699-187)	Gasoline	Removed 4-8-07. Case open. RA on-going.	See UST-699-185.
Building 699 (UST-699-188)	Gasoline	Removed 4-10-07. Case open. RA on-going.	See UST-699-185.
Building 699 (UST-699-189)	Gasoline	Removed 4-10-07. Case open. RA on-going.	See UST-699-185.
Building 699 (UST-699-190)	Gasoline	Removed 4-11-07. Case open. RA on-going.	See UST-699-185.
Building 699 (UST-699-197)	Waste Oil	Removed 1-6-92. NJDEP closure approved 1-1-94.	Closure report submitted to NJDEP on 12-23-93. NJDEP approval in telephone record dated January 1994.
Building 699 (UST-699-235)	Gasoline	Removed 9-1-99. NJDEP closure approved 1-10-03.	See Building 699 remediation. Closure report submitted to NJDEP 1-2-02. NJDEP closure approval letter dated 1-10-03.
Building 699 (UST-699-236)	Gasoline	Removed 9-1-99. NJDEP closure approved 1-10-03.	See UST-699-235.
Building 699 (UST-699-237)	Gasoline	Removed 9-1-99. NJDEP closure approved 1-10-03.	See UST-699-235.
Building 699 (UST-699-238)	Gasoline	Removed 9-1-99. NJDEP closure approved 1-10-03.	See UST-699-235.
Building 700 (UST-700-2, also referred to as UST-700-BI2)	#2 Fuel Oil	Removed 4-2-04. Case closed.	700 Area EUL project. Tank referred to as 700-BI2 in Tetra Tech 2005 report. UST removed. TPH non-detect in soil samples. Clean closure and Residential. No report required. Closure documentation submitted to NJDEP on May 21, 2015 requesting NFA. NJDEP provided concurrence on NFA on July 22, 2015.
Building 700 (UST-700-3, also referred to as UST-700-BI3)	#2 Fuel Oil	Removed 4-4-04. Case closed.	700 Area EUL project. Tank referred to as 700-BI3 in Tetra Tech 2005 report. UST removed. TPH non-detect in soil samples. Clean closure and Residential (old barracks). No report required. Closure documentation submitted to NJDEP on May 21, 2015 requesting NFA. NJDEP provided concurrence on NFA on July 22, 2015.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 700 (UST-700-5, also referred to as UST-700-T05)	#2 Fuel Oil	Removed 12-24-04. Case closed.	700 Area EUL project. Tank referred to as 700-T05 in Tetra Tech 2005 report. UST removed. TPH non-detect in soil samples. Clean closure and Residential (old barracks). No report required. Closure documentation submitted to NJDEP on May 21, 2015 requesting NFA. NJDEP provided concurrence on NFA on July 22, 2015.
Building 700 (UST-700-17, also referred to as UST-700-BI17)	#2 Fuel Oil	Removed 4-2-04. Case closed.	Tank removed as part of EUL project. Tank referred to as 700-BI17 in Tetra Tech 2005 report. Holes noted in tank upon removal and 10 CY of potentially contaminated soil were removed. Water table at about 11 ft bgs. TPH was non-detect in four post-excavation soil samples and one groundwater sample. Closure report dated April 2005 recommended NFA. Closure documentation submitted to NJDEP on May 21, 2015 requested NFA. NJDEP provided concurrence on NFA on July 22, 2015.
Building 700 (UST-700-18, also referred to as UST-700-BI18)	#2 Fuel Oil	Removed 4-12-04. Case closed.	Tank removed as part of EUL project. Tank referred to as 700-BI18 in Tetra Tech 2005 report. Holes noted in tank and 10 CY of potentially contaminated soil removed. TPH detected below regulatory criterion in three of four post-excavation soil samples. TPH detected in the south wall sample at 15,095 mg/kg. An additional 10 CY of potentially contaminated soil were excavated. TPH was non-detect in the south wall confirmatory sample. The closure report dated April 2005 recommended NFA. Closure documentation submitted to NJDEP on May 21, 2015 requested NFA. NJDEP provided concurrence on NFA on July 22, 2015.
Building 700 (UST-700-75)	#2 Fuel Oil	Removed 12-24-04. NJDEP closure NA.	700 Area EUL project. UST removed. Soil samples below criteria. Residential UST (old barracks) with no DICAR and no contamination; no closure report required.
Former Building 701 (UST-701-113)	#2 Fuel Oil	Removed 6-18-90. NJDEP closure NA. Case closed.	Tank removed on 6-18-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP.
Building 701 (UST-701-115)	#2 Fuel Oil	--	No UST present at this location; registered tank is an aboveground tank.
Building 702 (UST-702-114)	#2 Fuel Oil	Removed 5-11-94. Case closed.	No punctures or holes in tank and no evidence of soil contamination. Highest TPHC=45 mg/kg in post-excavation soil samples. Site appears clean. Concrete pad located below UST. Closure report requesting NFA submitted to NJDEP on 2-26-96.
Former Building 707 (UST-707-226)	#2 Fuel Oil	Removed 5-13-94. NJDEP closure approved 8-29-00.	Highest TPHC was 13,900 mg/kg, site remediated to highest TPHC location (sidewall) to 6 inches above groundwater. Confirmatory results for TPHC were 11.1 mg/kg. 2,400 gallons of groundwater vacuumed out of excavation. Groundwater samples were all clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Former Building 718 (UST-718-116)	#2 Fuel Oil	Removed 6-17-98. NJDEP closure approved 10-23-00.	UST removed on 6-17-98. Highest soil TRPH=208.69 mg/kg; Groundwater results are ND for VOCs and SVOCs. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Former Building 739 (UST-739-117)	#2 Fuel Oil	Removed 6-17-98. NJDEP closure approved 2-24-00.	Oil removed from UST on 9-20-94. UST removed on 6-17-98; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 744 (UST-744-118)	#2 Fuel Oil	Removed 7-17-98. NJDEP closure approved 2-24-00.	UST removed on 7-17-98; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 745 (UST-745-119)	#2 Fuel Oil	Removed 5-10-94. NJDEP closure approved 8-29-00.	Tank removed on 5-10-94, highest confirmatory (soil) = 545 mg/kg. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 746 (UST-746-120)	#2 Fuel Oil	Removed 10-3-97. NJDEP closure approved 8-29-00.	UST removed on 10-3-97; no release noted. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 746B (UST-746B)	#2 Fuel Oil	Removed 12-13-10. Case closed.	Tank was discovered during Building 746 demolition. TPH was non-detect in confirmatory soil samples. No additional sampling or remedial action warranted. Removal summary and data provided on May 21, 2015. NJDEP concurred on the NFA on July 22, 2015.
Former Building 747 (UST-747-121)	#2 Fuel Oil	Removed 10-8-97. NJDEP closure approved 2-24-00.	UST removed on 10-8-97; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 747B (UST-747B)	#2 Fuel Oil	Removed 12-9-10. Case closed.	Tank was discovered during Building 747 demolition. TPH was non-detect in confirmatory soil samples. No additional sampling or remedial action warranted. UHOT as per BRAC Legal Office determination. UST identified in Enviroscan TW-6 survey of the area. Clean site. Removal summary and data provided on May 21, 2015. NJDEP concurred on the NFA on July 22, 2015.
Former Building 748 (UST-748-122)	#2 Fuel Oil	Removed 4-8-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 9-20-94; UST removed on 4-8-96. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 749 (UST-749-123)	#2 Fuel Oil	Removed 10-8-97. NJDEP closure approved 8-29-00.	Oil removed from UST on 9-20-94. Removed UST 10-8-97; no release noted. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Building 750 (UST-750-191)	Diesel	Removed 2-9-05. Case open.	UST removed 2-9-05. System closed out. No contamination observed. Report submitted to NJDEP.
Building 750 (UST-750-192)	Gasoline	Removed 2-11-05. Case open.	Tank removed 2-11-05. No contamination observed. Report submitted to NJDEP.
Building 750 (UST-750-198)	Waste Oil	Removed 3-11-93. Case open.	No holes in tank and no evidence of potentially contaminated soil. Closure samples below NJDEP criteria. Closure report dated 10-28-93 recommended NFA. Site Assessment Summary sent to NJDEP on 11-16-93. Closure report (May 19, 2000) recommended conditional NFA with a CEA; monitoring ongoing. Report submitted to NJDEP.
Building 752 (UST-752-202)	Diesel	Removed 4-2-1998. NJDEP closure approved 10-23-00.	Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 787 (UST-787-124)	#2 Fuel Oil	Removed 10-14-97. NJDEP closure approved 2-24-00.	Oil removed from UST. UST removed on 10-14-97; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 788 (UST-788-125)	#2 Fuel Oil	Removed 10-16-97. NJDEP closure approved 2-24-00.	Oil removed from UST. Tank removed on 10-16-97; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 789 (UST-789-126)	#2 Fuel Oil	Removed 5-9-94. NJDEP closure NA. Case closed.	UST removed on 5-9-94. Highest TPHC (soil)=60.1 mg/kg. Site assessment is not mandatory; there was no release from the UST system. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending
Building 800 (UST-800-127)	#2 Fuel Oil	Removed 7-10-98. NJDEP closure approved 1-10-03.	UST and contaminated soils removed; final highest TPHC=550 mg/kg. Initial Geoprobe® groundwater results showed benzo[k] fluoranthene exceeded the NJDEP GWQC. Monitoring well installed in July 2000 and no compounds detected above NJDEP GWQC in four rounds of sampling. Closure report requesting NFA submitted to NJDEP on 7-17-01. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 800 (UST-800-21)	#2 Fuel Oil	Removed 7-4-04. Case open.	UST #21 in 800 Area removed and limited soil excavation performed. Closure soil samples all below NJDEP criteria. Report submitted to NJDEP. Required groundwater evaluation per letter dated November 10, 2015.
Building 800 (UST-800-1)	#2 Fuel Oil	Removed 7-22-03. Case open.	USTs found in 800 Area RCI footprint using geophysical survey. Two USTs #1 and #20 removed. Covered under one release report. Soil overexcavation performed. Closure soil samples below NJDEP criteria. Closure report submitted to NJDEP on June 12, 2015 and NFA requested. NJDEP required groundwater evaluation per letter dated November 10, 2015.
Building 800 (UST-800-9)	#2 Fuel Oil	Removed 10-8-03. Case open.	800 Area RCI project. UST removed. Overexcavation completed. Soil samples below criteria. Report submitted to NJDEP on June 12, 2015 and NFA requested. NJDEP required groundwater evaluation per letter dated November 10, 2015.
Building 800 (UST-800-12)	#2 Fuel Oil	Removed 10-9-03. Case open.	See UST-800-9.
Building 800 (UST-800-20)	#2 Fuel Oil	Removed 10-10-03. Case open.	Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP required groundwater evaluation per letter dated November 10, 2015.
Building 800 (UST-800-10)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	800 Area RCI project. UST removed. Soil samples below criteria. Clean closure. No report required. Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST-800-14)	#2 Fuel Oil	Removal date unknown. NJDEP closure NA.	800 Area RCI project. UST removed. Soil samples below criteria. Clean closure. No report required. Credit Union area. Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST-800-2)	#2 Fuel Oil	Removed 10-3-04. NJDEP closure NA.	Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015..
Building 800 (UST-800-15)	#2 Fuel Oil	Removed 10-4-04. NJDEP closure NA.	Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST-800-16)	#2 Fuel Oil	Removed 10-20-03. NJDEP closure NA.	800 Area RCI project. UST removed. Soil samples below criteria. Clean closure and Residential. No report required. Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST-800-22)	#2 Fuel Oil	Removed 10-21-03. NJDEP closure NA.	Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST-800-19)	#2 Fuel Oil	Removed 10-22-03. NJDEP closure NA.	Closure summary and data submitted on June 12, 2015 and NFA requested. NJDEP concurred on NFA per letter dated November 10, 2015.
Building 800 (UST 800-21)	#2 Fuel Oil	Removed 7-28-03	Closure report submitted on June 12, 2015. NFA requested – NJDEP concurrence pending.
Building 801 (UST-801-128)	#2 Fuel Oil	Removed 7-16-98. NJDEP closure approved 2-24-00.	Oil removed from tank 9-13-94. UST removed on 7-16-98; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 801 (UST-801-129)	#2 Fuel Oil	Removed 11-9-95. NJDEP closure approved 1-10-03.	Fill pipe was damaged; UST filled with water. Tank pumped dry; tank and soil excavated. Highest soil TPHC=2,190 mg/kg, no detections for VOCs or SVOCs in groundwater. Closure report submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.
Former Building 804 (UST-804-130)	#2 Fuel Oil	Removed 11-9-95. NJDEP closure approved 1-10-03.	UST removed on 11-9-95; highest soil TRPH=586 mg/kg. Closure report submitted to NJDEP on 1-2-02. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Former Building 804 (UST-804-228)	#2 Fuel Oil	Removed 6-17-96. NJDEP closure approved 7-10-98.	Removed UST and cleaned outside excavation. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 810 (UST-810-131) PARCEL 63	#2 Fuel Oil	Removed 4-21-98. NJDEP closure approved 8-29-00.	Visible contamination at time of removal, maximum TPHC detected=363 mg/kg. No detections in groundwater above NJDEP GWQC. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 811 (UST-811-132)	#2 Fuel Oil	Removed 11-5-97. NJDEP closure approved 8-29-00.	UST and 233 CY of soil removed. Highest confirmatory soil TPHC=233 mg/kg, groundwater concentrations below criteria. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00. Location not mapped.
Building 812 (UST-812-133)	#2 Fuel Oil	Removed 4-27-98. NJDEP closure approved 2-24-00.	Oil removed from tank, 9-21-94. 4-27-98 UST pulled; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 813	#2 Fuel Oil	Removed 12-17-10. Case open. RI on-going.	Holes in UHOT, groundwater impacted. Needs groundwater assessment. Soil remediation completed. NFA request from Army on June 12, 2015 and NJDEP indicated groundwater evaluation required in letter dated November 10, 2015.
Building 814	#2 Fuel Oil	Removed 5-16-90	Report and NFA request submitted in June 2015. NJDEP requires additional groundwater evaluation per letter dated November 10, 2015.
Building 826 (UST-826-134)	#2 Fuel Oil	Removed 10-18-95. NJDEP closure approved 7-10-98.	Oil removed from tank and put into Building 1220 oil tank. UST removed on 10-18-95; UST in good condition--no discharge. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Former Building 828 (UST-828-135)	#2 Fuel Oil	Removed 10-20-97. NJDEP closure approved 2-24-00.	Product removed 7-13-93 and redistributed. Tank removed on 10-20-97 in good condition; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 850	#2 Fuel Oil	Removed 2-15-11.	Removal summary and data submitted on June 12, 2015. NFA requested – NJDEP concurred on NFA per letter dated November 10, 2015.
Building 864 (UST-864-136)	#2 Fuel Oil	Removed 6-5-98. NJDEP closure approved 2-24-00.	Oil removed from UST on 9-21-94. UST removed on 6-5-98; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 866 (UST-866-137)	#2 Fuel Oil	Removed 6-4-98. NJDEP closure approved 2-24-00.	Oil removed from tank and put into Building 1220 oil tank. UST removed on 6-4-98; clean site, no visible discharge. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Former Building 875 (UST-875-234)	#2 Fuel Oil	Removed 5-11-98. NJDEP closure approved 1-10-03.	Holes in UST and staining of soils noted during removal. Highest soil TRPH=1,792.63 mg/kg; groundwater samples collected in 2000 were all below NJDEP GWQC. Closure report requesting NFA submitted to NJDEP on 7-17-01. NJDEP closure approval letter dated 1-10-03.
Former Building 876 (UST-876-138)	#2 Fuel Oil	Removed 6-2-98. NJDEP closure approved 2-24-00.	Oil removed from UST on 9-21-94. UST removed on 6-2-98; clean site. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Former Building 876 (UST-876-139)	#2 Fuel Oil	Removed 6-1-98. NJDEP closure approved 1-10-03.	UST removed on 6-1-98, holes observed in UST; contaminated soil removed 6-1-98. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Former Building 884 (UST-884)	#2 Fuel Oil	Removed 11-2-03. NJDEP closure pending.	UST found during cable installation. In front of Post Office. UST removed and soil overexcavation performed 11-2-03. Closure soil samples below NJDEP criteria. No groundwater encountered. Closure report being prepared. Removal summary and data

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
			submitted on June 12, 2015. NFA requested – NJDEP requires groundwater evaluation per letter dated November 10, 2015.
Building 886 (UST-886-140)	#2 Fuel Oil	Removed 4-21-98. NJDEP closure approved 1-10-03.	UST removed, visible contamination at time of removal; remediation completed. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 888 (UST-888)	#2 Fuel Oil	Removed 1-5-11. RI on-going.	Multiple holes in UST spline, oil in excavation. Depth to water approximately 6 ft within 200 ft of Husky Pond. Contaminated soil removed. NFA request from Army on June 12, 2015 and NJDEP indicated groundwater evaluation required in letter dated November 10, 2015.
Building 900 (UST-900-141)	#2 Fuel Oil	Removed 4-2-96. NJDEP closure approved 7-10-98.	UST had two small holes--no visible discharge. Excavation was clean. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 900A (UST-900-142)	#2 Fuel Oil	Removed 4-3-96. NJDEP closure approved 7-10-98.	Oil removed from UST on 9-22-94. UST removed on 4-3-96; UST in good shape--no discharge. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Building 901A (UST-901-143)	#2 Fuel Oil	Removed 4-17-96. NJDEP closure approved 8-29-00.	Oil removed from UST on 9-22-94. UST removed on 4-17-96; UST in good condition—no discharge. Closure report submitted to NJDEP on 7-27-98. NJDEP closure approval letter dated 8-29-00.
Former Building 902 (UST-902-144)	#2 Fuel Oil	Removed 10-19-95. NJDEP closure approved 7-10-98.	Oil removed and put it into Building 1220 oil tank. UST removed on 10-19-95; UST in good condition--no discharge. Closure report requesting NFA submitted to NJDEP on 3-27-98. NJDEP closure approval letter dated 7-10-98.
Former Building 905 (UST-905-145)	#2 Fuel Oil	Removed 6-24-97. NJDEP closure approved 1-10-03.	UST removed on 6-24-97; remediation completed following building demolition in October 1997. All groundwater results below NJDEP GWQC. Closure report requesting NFA submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.
Building 906 (UST-906-146)	#2 Fuel Oil	Removed 6-26-90. NJDEP closure NA. Case closed.	No contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP. Additional information submitted on April 14, 2015. NJDEP noted some soils still above criteria. Additional work to close out tank pending.
Building 906 (UST-906-232)	#2 Fuel Oil	Removed 3-6-98. NJDEP closure approved 8-29-00.	UST removed and limited soil removed on 3-6-98; immediately backfilled due to chimney. Clean site; no release noted. Closure report submitted to NJDEP on 8-3-00. NJDEP closure approval letter dated 8-29-00.
Former Building 907 (UST-907-231)	#2 Fuel Oil	Removed 3-9-98. NJDEP closure approved 2-24-00.	UST removed on 3-9-98; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 909 (UST-909-147)	#2 Fuel Oil	Removed 3-10-98. NJDEP closure approved 10-23-00.	UST removed on 3-10-98; oil observed on groundwater. Maximum soil TPHC=789 mg/kg; groundwater results below criteria for VOCs. Closure Report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 910 (UST-910-148)	#2 Fuel Oil	Removed 6-26-90. NJDEP closure NA. Case closed.	UST removed on 6-26-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP. Additional information submitted April 14, 2015. NJDEP provided concurrence on NFA on September 24, 2015.
Building 911 (UST-911-149)	#2 Fuel Oil	Removed 1-2-98. NJDEP closure approved 2-24-00.	Replaced with AST, includes spill report. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 912 (UST-912-150)	#2 Fuel Oil	Removed 12-29-97. NJDEP closure approved 2-24-00.	Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 913 (UST-913-151)	#2 Fuel Oil	Removed 12-10-97. NJDEP closure approved 2-24-00.	Oil pumped out of tank and put into Building 1220 oil tank. UST removed on 12-10-97. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 914 (UST-914-152)	#2 Fuel Oil	Removed 3-18-98. NJDEP closure approved 10-23-00.	Free product observed on groundwater; holes in tank during removal. 62 CY potentially contaminated soil removed, maximum confirmatory soil sample TPHC = 8,078 mg/kg next to a sewer line. No detections of VOCs in soil at the location of highest TPHC or in groundwater. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter received 10-23-00.
Building 915 (UST-915-153)	#2 Fuel Oil	Removed 3-23-98. NJDEP closure approved 10-23-00.	Oil pumped out of tank and put into Building 1220 oil tank. UST removed on 3-23-98. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 916 (UST-916-154)	#2 Fuel Oil	Removed 3-18-98. NJDEP closure approved 2-24-00.	Oil pumped out of tank and put it into Building 1220 oil tank. UST removed on 3-18-98; no contamination observed. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 917 (UST-917-155)	#2 Fuel Oil	Removed 3-16-98. NJDEP closure approved 2-24-00.	Oil pumped out of tank and put it into the Building 1220 oil tank. UST removed on 3-16-98; no release noted. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 918 (UST-918-156)	#2 Fuel Oil	Removed 4-7-98. NJDEP closure approved 2-24-00.	UST removed on 4-7-98; site clean. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 949 (UST-949-203)	Diesel	Removed 5-12-98. NJDEP closure approved 1-10-03.	UST removed on 5-12-98. Groundwater sampling completed in 1999 and showed PCE exceeded the NJDEP GWQC; highest soil TRPH=875.69 mg/kg. Monitoring well installation and additional quarterly sampling conducted. Quarterly samples from this well collected in 9-00, 10-00, 1-01 and 4-01 showed no compounds above NJDEP GWQC. Closure report requesting NFA submitted to NJDEP on 7-17-01. NJDEP closure approval letter dated 1-10-03.
Building 976 (UST-976-157)	#2 Fuel Oil	Case closed.	Tank is an aboveground storage tank. UST delisted and case closed by NJDEP.
Building 977 (UST-977-204)	Diesel	Removed 5-27-98. NJDEP closure approved 10-23-00.	UST removed on 5-27-98, highest soil TRPH=4,574.82 mg/kg; groundwater samples were clean. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter received 10-23-00.
Building 979 (UST-979-205)	Diesel	Removed 5-14-98. NJDEP closure approved 10-23-00.	UST removed on 5-14-98, site remediated. Closure report submitted to NJDEP on 09-11-00. NJDEP closure approval letter dated 10-23-00.
Former Building 1004 (UST-1004-158)	#2 Fuel Oil	Removed 6-26-90. NJDEP closure NA. Case closed.	UST removed on 6-26-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP. Location not mapped.
Building 1102 (UST-1102-162)	#2 Fuel Oil	Removed 8-94. NJDEP closure approved 1-10-03.	UST previously removed in August 1994. However, no documentation existed on soil condition. Soil and groundwater investigated in 2001. All soil TPHC=nondetect. Groundwater samples were below NJDEP GWQC. Closure report submitted to NJDEP on 5-15-02. NJDEP closure approval letter dated 1-10-03.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 1103 (UST-1103-163)	#2 Fuel Oil	Removed 6-26-90. NJDEP closure NA. Case closed.	UST removed on 6-26-90; no contamination observed; no samples taken. Recommended soil sampling for TPHC to confirm. SRF and SACS submitted to NJDEP on 11-22-91. Site closed by NJDEP. Closure report submitted on December 8, 2015 – NFA requested. NJDEP approval pending
Building 1104 (UST-1104-164)	#2 Fuel Oil	Removed 8-23-00. NJDEP closure approved 1-10-03.	UST was found during a water service repair, pumped out (water & oil) and removed tank. Highest soil TRPH=281 mg/kg; groundwater sample results exceed NJ GWQC for benzene, xylenes, and nitrosodiphenylamine. Closure report submitted to NJDEP on 5-15-02; report recommended NFA for soil and installation of monitoring wells and additional quarterly monitoring for groundwater. NJDEP closure approval letter dated 1-10-03.
Building 1105 (UST-1105-165)	#2 Fuel Oil	Removed 6-23-98. NJDEP closure approved 2-24-00.	UST removed and holes noted in UST during removal; small amount of oil on groundwater. Groundwater samples were collected and were clean. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 1106 (UST-1106-166)	#2 Fuel Oil	Removed 9-15-94. NJDEP closure NA. Case closed.	UST removed on 9-15-94: no release noted. Closure report submitted to NJDEP on 2-26-96. Closure report resubmitted on December 8, 2015 – NFA requested. NJDEP approval pending
Building 1107 (UST-1107-167)	#2 Fuel Oil	Removed 5-18-98. NJDEP closure approved 10-23-00.	Discharge noted from UST(B) - assumed rain filled abandoned UST and oil discharged. Spill contained and reported to NJDEP. UST removed on 5-18-98. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 1107 (UST-1107-233)	#2 Fuel Oil	Removed 5-12-98. NJDEP closure approved 10-23-00.	Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 1108 (UST-1108-168)	#2 Fuel Oil	Removed 5-11-94. NJDEP closure approved 8-29-00.	UST and potentially contaminated soil removed. One confirmatory soil sample TPHC concentration=10,400 mg/kg, but VOC results were below criteria. Groundwater vacuumed out of excavation. Groundwater samples were clean. Closure report submitted to NJDEP on 6-1-00. NJDEP closure approval letter dated 8-29-00.
Building 1109 (UST-1109-169)	#2 Fuel Oil	Removed 7-2-98. NJDEP closure approved 2-24-00.	UST removed on 7-2-98; no release noted; soil and groundwater samples were clean. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 1110 (UST-1110-170)	#2 Fuel Oil	Removed 6-30-98. NJDEP closure approved 2-24-00.	Oil removed from tank 10-4-94. UST removed on 6-30-98; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 1122 (UST-1122-171)	#2 Fuel Oil	Removed 6-21-94. Case open. Remediation on-going.	No holes in tank and no visible soil contamination. Post-excavation soil samples collected and TPHC below NJDEP soil cleanup criteria. 1996 – Groundwater contaminated – metals detected above groundwater criteria. Negotiated with NJDEP in February 1998 to conduct four rounds of sampling and close out with high background metals. Closure report submitted to NJDEP on 2-20-96. Currently, remediation is on-going.
Building 1122 (UST-1122-199)	Waste Oil	Removed 1-6-92. NJDEP closure approved 1-94.	Closure report submitted to NJDEP on 2-26-96. NJDEP approval from a telephone record dated 1-94.
Building 1123 (UST-1123-172)	#2 Fuel Oil	Removed 6-10-98. NJDEP closure approved 2-24-00.	UST removed on 6-10-98; clean site. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 1123 (UST-1123B)	#2 Fuel Oil	Removed 9-22-09. Case open. RI on-going.	UST removed on 9-22-09. Upon removal holes were noted and 12 CY of soil removed. Post excavation samples were collected and TPHC was below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 1123 (UST-1123C)	#2 Fuel Oil	Removed 9-22-09. Case open. RI on-going.	UST removed on 9-22-09. Upon removal holes were noted and 25 CY of soil removed. Post excavation samples were collected and TPHC was below NJDEP soil cleanup criteria. Closure report submitted to NJDEP on 3-16-12. RI on-going.
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1123 (UST ID Unknown)	#2 Fuel Oil	Removed 9-22-09. NJDEP closure pending.	March 16, 2012 US Army Response to Comments indicates total of 9 UHOTs were found and removed. Seven of these UHOTs were leakers and were investigated, remediated and backfilled with clean soil. Report only provides removal documentation for two UHOTs (UST-1123B and UST-1123C).
Building 1150 (UST-1150-207)	Diesel	Removed 6-20-98. NJDEP closure approved 2-24-00.	UST removed on 6-20-98; no release noted. Closure report submitted to NJDEP on 1-20-99. NJDEP closure approval letter dated 2-24-00.
Building 1213 (UST-1213-173)	#2 Fuel Oil	Removed 4-2-98. NJDEP closure approved 2-24-00.	UST removed on 4-2-98; no release noted. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Building 1213 (UST-1213-174)	#2 Fuel Oil	--	No UST ever existed at this location (Delisted).
Building 1220 (UST-1220-175)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	No release noted; all soil TRPH values are <1,000 mg/kg. Closure report submitted to NJDEP on 9-11-00. NJDEP closure approval letter dated 10-23-00.
Building 1220 (UST-1220-176)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 1220 (UST-1220-177)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-178)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-179)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-180)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-181)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-182)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-183)	#6 Fuel Oil	Removed 1-23-98. NJDEP closure approved 10-23-00.	See UST-1220-175.
Building 1220 (UST-1220-184)	#2 Fuel Oil	Removed 6-12-98. NJDEP closure approved 1-10-03.	Many holes in UST and soil staining observed during removal. Excavation of soil conducted and groundwater sampled. All groundwater sample results below NJDEP GWQC; soil results below criteria (TRPH=293 mg/kg). Closure report submitted to NJDEP on 7-17-01, NJDEP closure approval letter received 1-10-03.
Building 1220 (UST-1220-230)	Waste Oil	Removed 12-16-97. Case closed.	UST removed on 12-16-97. TPHC in soil below criteria. Groundwater samples were nondetect for VOCs and SVOCs. Closure report submitted in September 2001, although no report required.
Building 1221 (UST-1221-208)	Diesel	Removed 4-24-98. NJDEP closure approved 2-24-00.	UST removed on 4-24-98; no release noted. Closure report submitted to NJDEP on 3-29-99. NJDEP closure approval letter dated 2-24-00.
Aboveground Storage Tanks			
Building 121 (AST-121)	Waste Oil	Removed. Closured.	Tank installed per Aboveground Tank Replacement Project data sheet, Joe Fallon, 7-20-06 (Original ECP, Appendix G). Tank was decommissioned and disposed of by Veolia prior to BRAC closure.
Building 166	Diesel	Post-September 2011 - Present	AST moved from Building 1203 to Building 166 so that fuel left in tank at installation closure could be used by Base Support Operations (BASOPS) contractors currently using fuel.
Building 166	Diesel	Post-September 2011 - Present	AST moved from Building 2603, Charles Wood Area to Building 166 so that fuel left in tank at installation closure could be used by BASOPS contractors currently using fuel.
Building 200 (AST-200) Emergency Generator	Diesel	In use	In use
Building 257 (AST-257) Emergency Generator	Diesel	In use	In use
Building 273	Diesel	In use	500-gallon AST in use for fueling lawn maintenance equipment.

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 273	Gasoline	Tank inactive	Tank emptied and taken out of service. AST remains onsite.
Building 273 - Moved to Building 750	Diesel/Gasoline (split tank)	In Use	Tank emptied and taken out of service. AST was given to Monmouth County Highway Dept., taken to Building 750 where it is currently in use.
Building 282 Mobile Generator	Diesel	In use	In use
Building 286 Emergency Generator	Diesel	Out of service	Out-of-service, empty; aka Building 549 (formerly 548A)
Building 400 (AST-400) Emergency Generator	Diesel	In use	In use
Building 450 (AST-450)	Gasoline	Out of service	AST is empty and out of service.
Building 481 (AST-481)	Used Oil	Unknown - 2011	Removed prior to installation closure in 2011. Tank was decommissioned and disposed of by Veolia prior to BRAC closure.
Building 484 (AST-484-a)	Used Oil	In use	AST is in use for non-PCB transformer oil, currently empty.
Building 484 (AST-484-b)	Used Oil	In use.	AST is in use for used fuel oil collection.
Building 484 (AST-484-c)	Used Oil	Out of service	AST is on site, empty, out-of-service.
Building 491 (AST-491) Emergency Generator	Diesel	In use	In use
Building 699	Gasoline	Taken out of service in July 2011.	AST emptied and taken out of service. AST remains onsite.
Building 699	Gasoline	Taken out of service in July 2011.	AST emptied and taken out of service. AST remains onsite
Building 699	Gasoline	Taken out of service in July 2011.	AST emptied and taken out of service. AST remains onsite.
Building 699 (AST-699)	Used Oil	Tank removed. Case closed.	No discharge noted.
Building 750 Emergency Generator	Diesel	In use	In use
Building 750 (AST-750)	Used Oil	Unknown - 2011	Tank was decommissioned and disposed of by Veolia prior to BRAC closure.
Building 750 AST	Unknown	Unknown	One empty tank belonging to Monmouth County is located at Building 750. The AST has been taken out of service.
Building 752 (AST-752) Emergency Generator	Diesel	In use	In use
Building 753 (AST-753)	Used Oil	Unknown – 2011	Tank was decommissioned and disposed of by Veolia prior to BRAC closure

TABLE 1 SUMMARY OF PETROLEUM RELEASE, STORAGE, OR DISPOSAL (Continued)

Building Number	Name of Petroleum Product(s)	Date of Storage, Release, or Disposal	Remedial Actions
Building 753 AST	Unknown	Unknown	One empty tank belonging to Monmouth County is located at Building 753. The AST has been taken out of service.
Building 886, 250,000-gal bulk fuel storage AST	#2 Fuel Oil	Removed in 1970s.	See IRP Site FTMM-66.
Building 906 Emergency Generators (2)	Diesel	No tank present	Any emergency generators that may have been present at this site are no longer there-may have been removed/taken by the mission that was occupying the building.
Building 949 (AST-949) Emergency Generator	Diesel	In use	In use
Building 977 (AST-977) Emergency Generator	Diesel	In use	In use
Building 979 (AST-979) Emergency Generator	Diesel	In use	In use
Building 1150 (AST-1150) Emergency Generator	Diesel	Out of service	Tank is empty, disconnected from generator.
Building 1220 Emergency Generator	Diesel	Out of service	Tank is empty, generator not connected to any electrical.
Building 1221 (AST-1221) Emergency Generator	Diesel	In use	In use
Building 1227 (AST-1227) Emergency Generator	Diesel	Out of service	Emergency generator and AST removed from site.

TABLE 2 LEAD-BASED PAINT SAMPLE RESULTS

Table 2-6 – Lead-Based Paint Sample Results

Facility Number	Street Address	Evaluation Type	Maximum XRF Concentration (mg/cm^2)	Maximum Wipe Concentration ($\mu g/ft^2$)	Paint Condition	Exceeds HUD Screening Level for LBP	HUD Screening Level Exceeded
211	4 Russel Ave.	Re-Evaluation	NS	8.9	I, F(e)	No

		Y Y	Unit 29, Basement main room Unit 31 Attic	N N	Ceiling plaster Suspect blown-in insulation debris	ACM.	
265, Units 33,35,37&39, Russel Avenue	7/29/14	Y Y	Unit 33, Attic Unit 37, Attic	N N	Suspect blown-in insulation debris Suspect blown-in insulation debris, plaster-like debris	BVNA did not identify friable ACM in the building. Analytical results indicate that the sampled suspect friable materials are not ACM.	--
266 / Units 2,4,6&8, Carty Avenue	7/21/14	Y	Unit 8, Attic	N	Suspect blown-in insulation debris	BVNA did not identify friable ACM in the building. Analytical results indicate that the sampled suspect friable materials are not ACM.	4
267 / Units 10,12,14&16, Carty Avenue	7/21/14	Y	Unit 10, Attic	N	Suspect blown-in insulation debris, plaster-like debris	BVNA did not identify friable ACM in the building. Analytical results indicate that the sampled suspect friable materials are not ACM.	4
268 / Units 18,20,22&24, Carty Avenue	7/21/14	Y N	Unit 18, Attic Unit 18, Mechanical room crawl spaces	N U	Suspect blown-in insulation debris Unknown, no access	BVNA did not identify friable ACM in the building. Analytical results indicate that the sampled suspect friable materials are not ACM.	3
269 / Units 26,28,30&32, Carty Avenue	7/21/14	Y N Y Y Y	Unit 26, Attic Unit 26, Mechanical room crawl space Unit 28, Basement mechanical room Unit 30, Basement mechanical room Unit 32, Attic	N U N N N	Suspect blown-in insulation debris, plaster-like debris Unknown, no access Pipe insulation Pipe insulation Suspect blown-in insulation debris, plaster-like debris	BVNA did not identify friable ACM in the building. Analytical results indicate that the sampled suspect friable materials are not ACM.	 5 5

Notes:
ACM Asbestos-containing material
BVNA Bureau Veritas North America
lf linear feet
Y/N/U Yes/No/Unknown

1 Pipe elbows and/or pipe insulation associated with magblock pipe insulation in various basements: Although the samples of this material were reported to be less than 1% asbestos, BVNA recommended that this material be treated as ACM. BVNA suspected that the samples were collected from areas of the piping that may have been replaced and are not the original materials.
2 Cementitious plaster in walls and ceilings considered nonfriable suspect ACM in good condition. However, friable and damaged plaster-like debris found in this building did not contain asbestos fibers.

TABLE 4 SUMMARY OF ASBESTOS-CONTAINING MATERIALS (CONTINUED)

Building	Inspection Date	Samples Collected PACM (Y/N)	Sample Location	Friable ACM Present (Y/N)	Results (Material Detected With ACM)	Recommendations/ Comments	End Notes

3 The kitchen floor in Building 218, Units 24 and 26 was hardwood material. Unable to ascertain whether previously identified ACM floor tile remained beneath the wood floor.
4 Inspection included only accessible areas and did not include all possible spaces. Inspection and sampling did not include suspect non-friable materials.
5 Asbestos was not detected in brown paper pipe insulation; however, similar material found in buildings on Carty and Russel Avenues contained greater than 1% asbestos.

APPENDIX A

ECP PARCEL SUMMARY FOR THE MAIN POST, FORT MONMOUTH FROM ORIGINAL ECP

Main Post, Fort Monmouth, New Jersey
ECP Parcel Summary

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
36	(1)	HS/PS	1200 1201 1202 1203 1204 1205 1206 1207 1208 1209 1210 1211 1212 1230 1231 1152 170 200	Current use is administrative and government tenant activities, electrical substation (1231), Military Academy Prep School (1204, 1230), former Signal School (1200)	9, 97	Section 4.4.4.2 Section 5.3 Section 5.4	118.54	This parcel is the southeastern portion of Main Post. Batteries associated with UPSs are present in association with electrical substations and computer/mission activities throughout the area. Two ASTs, one located at Building 200 and one located at Bldg 127, are in use with secondary containment in place. One UST with leak detection and secondary containment in place is located at Building 1203. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas.
37	(2)	HS/PS/PR	1220	Boiler Plant	9	Section 4.4.4.5 Section 5.4 Appendix G	1.06	This parcel includes the boiler plant (Bldg 1220), small amounts of various chemicals utilized during operation of the facility, and associated current and former petroleum storage locations. Ten former fuel oil USTs and petroleum-contaminated soil were removed, and No Further Action approval letters were received from the NJDEP in 2000 and 2003.
38	(7)	HR(P)/PS	Former Outdoor Firing Range (1940-1955 Pistol Range)	Former Outdoor Small Arms Firing Range	17, 124	Section 4.3.4 Section 5.2.1.2 Section 5.2.2 Section 5.10	0.59	This parcel is the 1940-1955 Small Arms Training Range and is included in the Fort Monmouth Military Munitions Response Program (MMRP). The area has been a maintained grass-covered area for over 40 years. Due to the historic use of this site as a small arms firing range, metals contamination in soil is a potential REC that requires further evaluation.
39	(7)	HS/HR(P)	1150	Vail Hall - Communications back up and administrative offices	70, 97	Section 4.3.2.1.5 Section 4.4.4.2 Table 4-3	0.60	This parcel is the area between Building 1150 and Parkers Creek. Floor drains and a sump pump are present in the basement of 1150 for high water table intrusion and ultimately discharge to Parkers Creek via a basin behind the building. Building 1150 houses a large UPS room in the basement for communications backup and previous activities included film developing.
40	(5)	HR	FTMM-02	Former Landfill	124	Section 5.2.1.1 Table 5-9 Section 5.9 Table 5-17	5.53	This parcel was investigated under the Fort Monmouth Installation Restoration Program as Site FTMM-02. This is the location of former landfill M-2. An NFA recommendation was submitted to the NJDEP for near surface soil; no response has been received from the NJDEP. An equivalent to a Declaration of Environmental Restriction has been incorporated into the Fort Monmouth Master Plan for PCB contamination in below grade soil. A Groundwater CEA was established with the NJDEP. Volatile organic compounds present in groundwater at concentrations above NJDEP GW Quality Criteria are being remediated via enhanced bioremediation (ORC injection) through FY08. Long Term Monitoring of groundwater and surface water continues on a quarterly basis.
41	(5)	HR/PS/PR	FTMM-59	Groundwater in vicinity of Building 1122	50, 124, 147	Section 5.2.1.1 Table 5-9 Section 5.4.2	0.34	This parcel was investigated under the Fort Monmouth Installation Restoration Program as IRP Site FTMM-59. A Groundwater CEA was submitted to the NJDEP, awaiting response. Volatile organic compounds present in groundwater at concentrations above NJDEP GW Quality Criteria are being remediated via enhanced bioremediation (HRC injection) through FY08. Long Term Monitoring of groundwater and surface water continues on a quarterly basis. The identification of volatile organic compounds in the groundwater in excess of criteria and the potential for migration into overlying buildings qualifies vapor intrusion are a recognized environmental concern in this area.
42	(2)	PS/PR	UST-1122-171	Former UST	9	Section 5.2.1.1 Section 5.4 Appendix G	0.02	A fuel oil tank and potentially contaminated soil were removed in 1994. Metals were detected in groundwater above criteria. Agreement was reached with the NJDEP in 1998 to conduct 4 rounds of sampling and close out the groundwater monitoring due to high background metals. Report was submitted and no response has been received from the NJDEP; monitoring is ongoing.
43	(7)	HS/HR(P)/PS/PR(P)	1122	Do-it-Yourself Auto Repair and Craft Shop	37, 114	Section 4.3.2.1.2 Section 4.4.3.2 Section 5.1.1.2.1 Section 5.1.7.1 Table 5-5	1.54	This parcel encompasses Building 1122 (Do-it-yourself auto repairs) and Building 1124 (Car wash). Building 1122 is a hazardous waste generator and numerous areas of patched asphalt and old concrete pads have been noted. An oil/water separator (w/vessel) and floor drains confirmed to be connected to sanitary system per 1993 floor plans.
44	(5)	HR/PS/PR	Former Skeet Range FTMM-03, 04, 05, 06, and 08	Former Skeet Range and Former Landfills	17, 124	Section 1.2.13 Section 4.3.4 Section 5.2.1.1 Table 5-9 Section 5.2.1.2 Table 5-10 Section 5.2.2 Section 5.9 Table 5-17 Section 5.10	25.30	This parcel includes one MMRP site (1940-1955 Skeet Range) and IRP sites FTMM-03, 04, 05, 06, and 08. The IRP sites are former landfill areas (M-3, M-4, M-5, M-8) and a post burning area (M-6). Extensive soil evaluation has been conducted throughout this parcel, and a NFA determination has been requested from the NJDEP in relation to near surface soils throughout the parcel. No response has been received from the NJDEP. The DPW incorporated an equivalent to a Declaration of Environmental Restriction into the Fort Monmouth Master Plan for PCB below grade soil contamination at M-8. FTMM-03 - Groundwater - CEA currently being prepared for subsequent submission to the NJDEP. A Monitored Natural Attenuation program is approved by the NJDEP and is currently under way. Long Term Monitoring of groundwater and surface water continues on a quarterly basis. FTMM-05 - Groundwater - CEA currently being prepared for subsequent submission to the NJDEP. An HRC injection program is approved by the NJDEP and is currently under way through FY08 to address volatile organic compounds in groundwater. Long Term Monitoring of groundwater and surface water continues on a quarterly basis throughout the parcel.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
45	(2)	PS/PR	UST-697-194 UST-697-195 UST-697-195	Former USTs	9	Section 5.4 Appendix G	0.04	Three 1,000 gallon waste oil tanks were removed on June 1, 1990. No documentation existed on condition of tanks or adjacent soils during removal. A site assessment was initiated at the suspected locations of the former USTs in November 1992. Petroleum-related compounds were detected in soil samples below State criteria. Initial groundwater samples exceeded New Jersey Groundwater Quality Criteria (NJ GWQC) for chlorinated volatile organic compounds and pesticides. Closure Report submitted to NJDEP on 02/26/96 recommending additional groundwater sampling. Quarterly groundwater samples collected from August 1997 to December 2001. Groundwater concentrations in the 2001 samples were below the NJ GWQC. Revised Closure Report submitted to NJDEP on 5/15/02. NJDEP closure approval letter received 01/10/2003.
46	(4)	HR	FTMM-07	Former Incinerator	124	Section 5.2.1.2 Table 5-10	0.03	This parcel was investigated under the Fort Monmouth Installation Restoration Program as Site FTMM-07 (M-7 Burning Area). The M-7 burning area was a former incinerator located within Building 697. The incinerator was used until 1990 for burning classified documents. The Incinerator was dismantled in 1993; NFA determination approved by NJDEP in 1994.
47	(3)	HR	FTMM-19	Former Pistol Range	17, 124	Section 1.2.13 Section 4.3.4 Table 4-2 Section 4.4.2.2 Section 5.2.1.2 Table 5-10 Section 5.2.2 Section 5.9 Table 5-17 Section 5.10	2.23	This parcel includes a former pistol range and the former sanitary treatment plant (FTMM-19). The firing range was used from 1935 to 1940 for small arms. The sewage treatment plant closed in 1975. No compounds of concern detected above NJDEP criteria for soil or sediment. NFA approved by NJDEP in 1996.
48	(5)	HR/PR	FTMM-18	Former Training Area	124	Section 4.4.2.2 Section 5.2.1.1 Table 5-9 Section 5.9	3.33	This parcel was investigated under the Fort Monmouth Installation Restoration Program as Site FTMM-18 - Near Surface Soils (Cover Soil). A geophysical survey and subsequent trenching identified buried waste materials at the site. NFA recommendation submitted to the NJDEP regarding the cover soil, awaiting response. The remedial approach for site groundwater is Monitored Natural Attenuation. Classification Exemption Area request submitted to the NJDEP, awaiting response. Long Term Monitoring of groundwater and surface water continues on a quarterly basis until CEA approval.
49	(7)	HS/HR(P)/PS/PR(P)	283, 288, 291, 292, 293, 295	Former Squier Laboratory Complex, Museum, Battery Test Facility	22, 32, 33, 34, 35, 53, 59, 71, 72, 54, 110, 152	Section 3.3 Section 4.3.2.1.1 Section 4.3.2.1.2 Section 4.3.2.1.6 Section 4.4.4.2 Table 4-3 Section 4.4.4.3 Table 4-4 Section 4.6.2.7 Section 5.1.1.2.1 Section 5.8 Table 5-16 Section 5.13.3 Section 5.13.4 Section 5.13.6 Section 5.13.9	9.09	Bldg 283 is currently administrative space. Previous use included the Squier laboratory - primary R&D laboratory until 1954 (when the laboratory operations were transferred to Bldg 2700). Former repair/experimental work within this parcel included photographic equipment, a battery test facility (which was destroyed by fire in the 1980s and subsequently rebuilt), climatic testing lab, plastics research and development. Numerous former buildings existed in this parcel that were associated with Squier laboratory operations in the 1950s.
50	(2)	PS/PR	FTMM-54 Building 296) FTMM-55 (Building 290) FTMM-61 (Building 283)	Former fuel distribution facility, Former USTs	124, 149	Section 5.2.1.1 Table 5-10 Section 5.13.2 Appendix G	2.18	Three sites within this parcel are included in the Fort Monmouth Installation Restoration Program. Site FTMM-54 is a former abandoned fue distribution facility that was removed during a renovation project at Bldg. 296. Benzene and lead are present in groundwater above criteria and are being addressed through the implementation of Monitored Natural Attenuation (MNA), which includes quarterly groundwater monitoring. Site FTMM 55 is the site of a former UST system which was located at Building 290. Petroleum-contaminated soil has been removed; lead and arsenic detections in groundwater are being addressed through MNA (including quarterly GW monitoring), while a request for a NFA determination is under review by the NJDEP. FTMM-61 is a former 3,000 gallon UST site at which petroleum-contaminated soil was removed and petroleum-related contaminants are present in groundwater. In-situ bioremediation (ORC injection) is being conducted through FY08 to address groundwater, long term monitoring of groundwater is ongoing. In total within this parcel, 15 USTs that were removed had evidence of petroleum release during closur and were properly addressed via removal of contaminated soil, and No Further Action approval letters were received for all 15 USTs. Contaminated groundwater is addressed through the Fort Monmouth Installation Restoration Program as summarized above. The identification of volatile organic compounds in the groundwater in excess of criteria indicates vapor intrusion is a potential recognized environmental concern in this area.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
51	(2)	HS/PS/PR	750 Area 787, 788, 789 500 Area 600 Area 1100 former Barracks	Motor Pool Administrative Barracks Former USTs	9, 97, 114, 141	Section 4.4.3.2 Section 4.4.4.2 Section 4.4.4.3 Section 5.1.1.2.1 Section 5.2.1.1 Section 5.4 Section 5.4.2 Appendix G	87.00	This parcel includes the 750 motor pool; the area around Buildings 787, 788, and 789; the 600 Area Buildings; 500 Area Buildings; and former barracks along Semaphore Ave. Per communications with facility personnel involved with the 750 Motor Pool construction project in the 1980s, multiple former USTs associated with former barracks in the area were removed during construction. Extensive soil sampling and three UST removals were conducted in the area of Buildings 787, 788, and 789 as part of the U.S. Army's Residential Communities Initiative (RCI) and Enhanced Use Leasing (EUL) programs. Soil grid sampling was conducted throughout the area. Locations at which contaminated soil was identified above NJDEP residential cleanup criteria were excavated and disposed offsite. Numerous UST removals and extensive investigation of the 600 Area were conducted under the 600 Area Work Plan that was approved by the NJDEP. A petroleum release was documented to have potentially occurred at twenty four of the removed USTs in this parcel. A No Further Action approval letter was obtained from the NJDEP for all 24 locations where evidence of a petroleum release was identified. Current operations in the 600 Area include dry metal fabrication of vehicle equipment shelters (no solvents used). Small amounts of chemicals are utilized in this area, and lead acid batteries are present in association with emergency generators and UPSs.
52	(2)	HS/PS/PR	FTMM-53, Bldg 699	gasoline service station	9, 124	Section 5.2.1.1 Section 5.4 Section 5.13.2 Appendix G	1.38	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-53 (Building 699). Site FTMM-53 is an active gasoline service station operated by the Army/Air Force Exchange Services (AAFES) organization. On 5 November 1984, a tank tightness test identified a leak in two USTs. No action was taken until 1989 when a line leak was identified; subsequently, the piping was excavated and replaced Volatile organic compounds were identified in soil and groundwater at concentrations exceeding NJDEP cleanup criteria. Since that time, a groundwater treatment system (to recover free product and to control plume migration) has been operating in conjunction with a quarterly groundwater monitoring program. The cleanup strategy is to continue remedial action activities and monitoring efforts at the Building 699 site. Shut-down of the treatment system is expected in FY08 and quarterly groundwater monitoring of 13 wells will be performed for two years after shut-down A CEA is currently being prepared for subsequent submission to the NJDEP. The identification of volatile organic compounds in the soil and groundwater in excess of criteria indicates vapor intrusion is a potential recognized environmental concern in this area.
53	(4)	HR/PS/PR	700 Area	former housing	9, 141	Section 5.2.1.1 Section 5.2.4 Section 5.4 Appendix G	11.53	Extensive soil sampling and numerous UST removals were conducted as part of the U.S. Army's Residential Communities Initiative (RCI) and Enhanced Use Leasing (EUL) programs. Soil grid sampling was conducted throughout the area. Locations at which contaminated soil was identified above NJDEP residential cleanup criteria were excavated and disposed offsite.
54	(1)	HS/PS	700 Area 800 Area	Lane Hall (Social events and food service) Former Dental Clinic	48, 60, 62, 66, 67	Section 4.3.2.1.1 Section 4.3.2.1.4 Section 4.4.4.2 Table 4-3 Section 4.4.4.3 Table 4-4	44.74	This parcel includes a sewage lift station (Bldg 752) at which antifreeze is stored for an emergency generator, former dental clinic and photoprocessing facility currently utilized as a locker room (Bldg 814); and Lane Hall (Bldg 702) which is utilized for social events and food service. No release or disposal of hazardous substances or petroleum products has occurred.
55	(2)	HS/PS/PR	876	Former Motor Pool Former Medical and Veterinarian Laboratory	9, 141	Section 5.2.1.1 Section 5.2.4 Section 5.4 Appendix G	11.80	Medical and veterinarian laboratories were previously located in former Building 876 and a 1999 Chemical Inventory recorded storage of hazardous substances in this former building. A motor pool formerly existed within this parcel.
56	(4)	HS/HR/PS/PR	800 Area RCI Project	Former housing	9, 141	Section 5.2.1.1 Section 5.2.4 Section 5.4 Appendix G	15.18	Extensive soil sampling and numerous UST removals were conducted as part of the U.S. Army's Residential Communities Initiative (RCI) and Enhanced Use Leasing (EUL) programs. Soil grid sampling was conducted throughout the area. Locations at which contaminated soil was identified above NJDEP residential cleanup criteria were excavated and disposed offsite.
57	(7)	HS/HR(P)/PS/PR		Former Coal Storage and RR Unloading area	9, 26, 27	Section 3.3 Section 5.4 Section 5.13.1 Appendix G	8.71	Former coal storage and unloading area along former railroad in south central portion of Main Post.
58	(2)	PS/PR	UST-800-127 UST-801-129	Former #2 fuel oil USTs	9	Section 4.4.4.5 Section 5.4 Appendix G	1.04	Two #2 fuel oil USTs and associated petroleum-contaminated soil were removed. Initial groundwater results showed one semi-volatile organic compound exceeded the NJDEP GWQC. A monitoring well was installed and no compounds were detected above NJDEP GWQC in four rounds of sampling. Closure Reports requesting No Further Action were submitted to the NJDEP, and a NFA approval letter was received from the NJDEP on 1/10/2003.
59	(2)	PS/PR	UST-804-130	Former #2 fuel oil UST	9	Section 4.4.4.5 Section 5.4 Appendix G	1.22	A former #2 fuel oil UST was removed in 1995. Petroleum-related contaminants were detected in confirmatory soil samples at concentrations below the NJDEP cleanup criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2002, and a NFA approval letter was received from the NJDEP on 1/10/2003.
60	(1)		1077, 1078	Residential Housing			4.22	Residential housing area southwest of Patterson Army Health Clinic. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
61	(7)	HS/HR(P)/PS/PR	810, 1075, 1076	Medical Facility Veterinary Clinic	7, 51, 53, 54, 55, 56, 57, 58, 59, 61, 62, 63, 64, 66, 68, 69, 97, 114, 131	Section 4.3.2.1.3 Section 4.3.2.1.4 Section 4.4.4.2 Table 4-3 Section 4.4.4.3 Table 4-4 Section 5.1.1.2.1 Section 5.1.9.1 Section 5.12 Section 5.13.5	14.66	This parcel includes the veterinary clinic (Bldg 810), Patterson Army Health Clinic (Bldg 1075), and former Patterson Boiler Plant (former Bldg 1076). Former X-ray operations were conducted with film development at 1075; over the counter medicines stored on site; medical waste disposed through 1075. Based on extensive previous medical activities within this parcel, potential for historic release of developing chemicals and other waste associated with medical operations exists.
62	(4)	HR	FTMM-13	Former Pathogenic Waste Incinerator	124	Section 5.2.1.2 Table 5-10	0.13	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-13 (M-13 Pathogenic Waste Incinerator). The pathogenic waste incinerator formerly located on the west side of former Building 1076 was constructed in 1975. The pathogenic waste incinerator was taken out of service in December 1992. Site reconnaissance work revealed no ash or debris in or around the incinerator unit and the incinerator was dismantled in November 1993. An NFA determination was approved by the NJDEP in 1994.
63	(2)	PS/PR	UST-810-131	Former #2 fuel oil UST	9	Section 5.4 Appendix G	0.12	A former #2 fuel oil UST was removed in 1998. Visible petroleum contamination of soil was observed during the removal of the UST, and potentially contaminated soil was removed. No detections in groundwater or soil samples were above NJDEP criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2000, and a NFA approval letter was received from the NJDEP on 8/29/2000.
64	(5)	HR/PS/PR	FTMM-64 (Building 812)	former gasoline distribution area	124, 149	Section 5.2.1.1 Table 5-9 Section 5.3.2	3.18	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-64 (Bldg 812). This parcel is a former gasoline distribution area. Volatile organic compounds and metals are present in groundwater above the NJDEP GW Quality criteria; no contaminants identified in soil above criteria. Treatment of groundwater is underway via enhanced bioremediation (HRC/ORC injection) through FY 08. A CEA was submitted with the NJDEP, awaiting response. Long Term Monitoring of groundwater continues on a quarterly basis. The identification of volatile organic compounds in the groundwater in excess of criteria indicates vapor intrusion is a potential recognized environmental concern in this area.
65	(2)	PS/PR	FTMM-66 (Building 886)	former fuel oil storage area	124, 149	Section 5.2.1.1 Table 5-9 Section 5.3.2	3.15	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-66 (Bldg 886). Based upon historical records, Site FTMM-66 was identified as a former fuel oil storage area. Aerial photos indicate a former aboveground storage tank (AST) was located adjacent to Building 886, located off Murphy Drive on the Main Post. The AST had a storage capacity of 250,000 gallons and stored # 2 fuel oil. The AST was removed in the 1970s. Soil contamination was identified at the site during the removal of a 1,000-gallon steel, fuel oil UST located on the west side of Building 886. Soils contained petroleum contamination exceeding NJDEP residential direct contact soil cleanup criteria, and free product was observed in groundwater. 4,000 tons of soil were removed in Feb 2003. A CEA was filed with the NJDEP and monitored natural attenuation, including groundwater monitoring, was selected as the remedial approach. Long term groundwater monitoring continues on a quarterly basis.
66	(1)	HS/PS	900 Building Area	Electrical Substation General Storage Police Station	9, 97	Section 4.4.4.2 Section 4.4.4.3 Section 5.4	28.92	This parcel includes general storage (Bldgs 908, 975 and 976), the police station (977), and an electrical substation (Bldg 978). The electrical substation (Bldg 978) houses 18 lead acid batteries and non-PCB transformers, all contained within secondary containment. Building 977 houses lead acid batteries associated with an emergency generator. Building 901, currently used in an administrative capacity, formerly housed radar training. Chemicals utilized in this operation included alcohols and freon 113. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas.
67	(2)	PS/PR	UST-949-203	Former #2 fuel oil UST	9	Section 5.4 Appendix G	0.12	A former diesel UST and potentially contaminated soil were removed in 1998. One volatile organic compound was detected above the NJ GW Quality Criteria during the initial round of GW sampling. Subsequent quarterly samples collected in 9/2000, 10/2000, 1/2001, and 4/2001 showed no compounds above New Jersey GWQC. Closure Report requesting No Further Action submitted to NJDEP on 07/17/2001. NJDEP Closure Approval Letter received on 01/10/2003.
68	(2)	HS/PS/PR	900 Building Area former USTs	Former #2 fuel oil USTs	9	Section 5.4 Appendix G	4.74	This parcel includes 12 former USTs. Petroleum discharges were identified at five of the USTs and associated petroleum-contaminated soil was remediated. No Further Action approval letters were received in 2000 (UST-909-147, UST-914-152, UST-977-204, and UST-979-205) and 2003 (UST-905-145). Lead acid batteries associated with an emergency generator are present at Building 979.
69	(7)	HS(P)/HR(P)/PS/PR	900	Former vehicle repair/motor pool	9, 88	Section 4.3.2.1.7 Section 5.4 Section 5.4.2 Appendix G	0.31	This facility is a former vehicle repair/motor pool facility where solvent-based parts cleaners were previously utilized as part of routine vehicle maintenance activities. This building has been used as general storage for the past ten years.
70	(7)	HS/HR(P)	551	Classroom, former (early 1950s) photoprocessing	32, 34	Section 4.3.2.1.6 Section 5.13.6	1.73	Former industrial processes included the use of carbon tetrachloride, benzol, acids, and photographic chemicals in an adjacent Quonset hut in the early 1950s. This facility is currently used for administrative and classroom activities.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
71	(5)	HR	FTMM-12, FTMM-14	Former Landfill	124	Section 5.2.1.2 Table 5-10 Section 5.9	14.65	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-12 (M-12 Landfill) and FTMM-14 (M-14 Landfill). A remedial action that addressed soil erosion problems along Husky Brook was completed in June of 2001. A NFA recommendation for near surface soil was submitted to the NJDEP; no response has been received from the NJDEP. Metals and volatile organic compounds have been detected in groundwater slightly above the NJ Groundwater Quality Criteria. Long Term Monitoring of groundwater and surface water continues on a quarterly basis. A Classification Exception Area request has been submitted to the NJDEP for groundwater. A NFA recommendation was submitted to the NJDEP. No response has been received from the NJDEP.
72	(1)	HS/PS	200 Area 300 Area	Residential Housing Parade Grounds Administrative	9	Section 5.4 Appendix G	101.38	This parcel is located in the north central portion of Main Post and includes residential housing along Gosselin Ave., Sherrill Ave., Allen Ave., and Signal Ave.; the parade grounds; administrative offices in Building 286 (Russell Hall), and electronic research facilities in the northeastern portion o the parcel. Hospital facilities were formerly located in Bldg 209 prior to the construction of Patterson Army Health Clinic. Building 209 is now used for administrative purposes. No release or disposal of hazardous substances or petroleum products has occurred, and there has been no migration of such substances from adjacent areas. Forty-five former fuel oil USTs have been removed and no contamination was identified during closure. Approval of a No Further Action recommendation was received from the NJDEP for six USTs, the remaining 39 removed USTs were residential USTs for which no regulatory concurrence is required.
73	(2)	PS/PR	UST-286-60	Former #2 fuel oil UST	9	Section 5.4 Appendix G	0.12	A former #2 fuel oil UST and 3 cubic yards of petroleum-contaminated soil were removed. A closure report was submitted to the NJDEP requesting a No Further Action determination in 1999, and a NFA approval letter was received from the NJDEP on 2/24/2000.
74	(2)	HS/PS/PR	205, 206, 207, 208, 257, 282, 287	Residential Housing, Fire House, and former fuel oil USTs	9	Section 5.4 Appendix G	10.74	This parcel includes the fire house and existing housing southeast of Hidreth Avenue. Eight former residential fuel oil USTs and associated petroleum-contaminated soil have been removed. No regulatory concurrence is required for residential USTs. Despite no requirement for regulatory concurrence, a No Further Action approval letter was obtained for 7 of the 8 USTs.
75	(3)	HR	FTMM-20	Pre-1941 Sewage Treatment Plant	124	Section 5.2.1.2 Table 5-10	0.28	This parcel was investigated under the Fort Monmouth Installation Restoration Program as FTMM-20 (Pre-1941 Sewage Treatment Plant). Metals detected in sediment samples above criteria are consistent with background levels for nearby undisturbed locations. An RI report requesting an NFA determination from the NJDEP was submitted to the NJDEP in March of 2004. No response has been received from the NJDEP.
76	(2)	PS/PR	200 Area 300 Area	Residential Housing Former Barracks	22 March 1956 Main Post Gas Distribution, Gasoline and Fuel Storage Plan, 9	Section 5.4 Appendix G	12.06	This parcel includes the existing residential housing buildings north of Housing Avenue and the former 300 Area Barracks. Numerous USTs are illustrated on historic maps associated with the 300 Area Barracks that are not documented to have been removed. 13 residential USTs and associated petroleum-contaminated soil (for which no NJDEP closure approval is required) were removed in association with existing residential housing in this parcel as well.
77	(2)	PS/PR	UST-210-8	Former #2 fuel oil UST	9	Section 5.4 Appendix G	0.37	A former #2 fuel oil UST and 10 cubic yards of petroleum-contaminated soil were removed in 1994, and no contaminants were detected ir groundwater above NJDEP criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 1996. No response has been received from the NJDEP.
78	(4)	HR	FTMM-15	Elevated Water Tank	124	Section 5.2.1.2 Table 5-10	0.30	This parcel was included in the Fort Monmouth Installation Restoration Program under Site FTMM-15 (M-15 Water Tank). Two pesticides and three metals were identified above NJDEP direct contact soil cleanup criteria. A corrective action was implemented in 1999 involving the removal o the contaminated soil from the site. A Remedial Action report will be submitted to NJDEP with an NFA recommendation from the Army.
79	(2)	HS/PS/PR	142 494 Bldg 75 Former Tank Farm	Box/Crate Shop Marina Former Bulk Petroleum Storage Tanks	8, 9, 26, 50	Section 3.4.1.1 Table 3-3 Section 4.3.2.1.7 Section 5.4 Section 5.4.2 Section 5.9 Section 5.13.1 Section 5.17 Appendix G	43.64	This parcel includes the Box/Crate shop (all hazmat packaged and shipped through this bldg, but not stored at this location), the water supply treatment building (Building 494), former Building 75 Tank Area adjacent to the railroad, the marina, and the former 400 area housing. There were 38 USTs removed from this parcel. Eight of the tanks had leaked and soil removals were conducted. Some of the USTs were residential and did not require closure documentation. Twenty five approval letters for the UST removals were received from the NJDEP.
80	(7)	HS/HR(P)/PS/PR	Former Buildings 105 and 106				0.93	This parcel includes former Buildings 105 and 106 - former photoprocessing facilities located northeast of Oceanport Ave., directly southeast of the current credit union (Building 495). These building served as photoprocessing facilities from the 1940's until they were demolished in the 1980s.
81	(4)	HR	FTMM-16 (Bldg 498)	Former Pesticide Storage Area	11, 124, 132	Section 5.2.1.2 Table 5-10 Section 5.12	0.12	A former pesticide storage and mixing area was located at the M-16 site on Main Post. The facility (Building 498) is a brick structure and was constructed in 1939. Pesticide management practices were conducted at the site until the late 1950s. Remedial actions were completed in 1999 under the Fort Monmouth Installation Restoration Program to remove pesticide-contaminated soil. A Remedial Action report will be submitted to NJDEP with an NFA recommendation from the Army.
82	(4)	HR	400 Area RCI	Remediated soil contamination in 400 Area	68, 141	Section 1.2.4 Section 4.4.4.3 Table 4-4 Section 4.4.4.3 Section 4.4.4.4 Section 5.2.4	0.13	PCB-contaminated soil was excavated to below NJDEP cleanup criteria and disposed offsite in 2005 as part of the U.S. Army's Residential Communities Initiative (RCI) and Enhanced Use Leasing (EUL) programs.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
83	(7)	HS/HR(P)/PS/PR	109	Vehicle maintenance (current and former) Former photoprocessing Current and former maintenance shops (carpentry, plumbing, heating, HVAC, electrical) Former coal storage	8, 26, 32, 33, 34, 35, 36, 39, 41, 42, 44, 48, 50, 51, 53, 85, 91, 114	Section 3.3 Section 3.4.1.1 Table 3-3 Section 4.3.2.1.1 Section 4.3.2.1.2 Section 4.3.2.1.3 Section 4.3.2.1.7 Section 5.1.1 Section 5.1.1.2 Section 5.1.1.2.1 Section 5.1.1.2.3 Section 5.2.1 Section 5.4.2 Section 5.5.2 Section 5.8 Section 5.12 Section 5.13.1 Section 5.13.3 Section 5.13.8 Table 5-2 Table 5-5 Table 5-16 Appendix E Appendix G Appendix J	35.34	This parcel is located in the northeastern portion of the Main Post and is associated with numerous current and former industrial processes and vehicle operations including former vehicle wash platforms, former photoprocessing and printing plants, current and former vehicle maintenance areas, former heating plants, former refrigerant repair, former coal storage, and current and former carpentry, plumbing, and electrical shops. Three modern USTs are currently in use at Building 273 (Garrison Motor Pool), three waste oil ASTs are present at Bldg 484, one waste oil AST is present at Bldg 481, and one waste oil AST is present at Bldg 121. All existing USTs and ASTs have secondary containment in place. Numerous former USTs have been removed throughout this parcel, and petroleum-contaminated soil was addressed when encountered at each UST location
84	(5)	HR/PS/PR	FTMM-56 (Former Building 80)	Former #2 fuel oil UST	105, 124	Section 5.2.1.1 Table 5-9 Section 5.4.2	0.29	This parcel was investigated under the Fort Monmouth Installation Restoration Program as Site FTMM-56 (Building 80). A former #2 fuel oil UST and 56 cubic yards of petroleum-contaminated soil were removed in 1993. Although a discharge was identified during the UST closure, the discharge is believed to have come from activities prior to and not related to the UST removal (pre-1984). Gasoline-related constituents and one pesticide were detected at concentrations above the NJDEP Groundwater Quality Criteria. Monitored natural attenuation (which includes quarterly groundwater monitoring) has been implemented as the remedial approach for this parcel pending approval of a NFA recommendation by the NJDEP. A Remedial Investigation report requesting a No Further Action determination was submitted to the NJDEP in May 2005.
85	(2)	PS/PR	UST-116-9	Former #2 fuel oil UST	9	Section 5.4 Appendix G	0.13	A former #2 fuel oil UST and petroleum-contaminated soil were removed in 1994. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2000, and a No Further Action approval letter was received from the NJDEP on 10/23/00.
86	(2)	PS/PR	UST-117-72	#2 fuel oil UST	9	Section 5.4 Appendix G	0.13	A former #2 fuel oil UST was removed in 1994. Petroleum-related contaminants were detected in confirmatory soil samples at concentrations below the NJDEP cleanup criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 1998. No response has been received from the NJDEP.
87	(2)	PS/PR	UST-64-4 (#2 fuel oil) UST-65-5 (#2 fuel oil) UST-161-14 (#2 fuel oil) UST-161-68 (waste oil) UST-173-19 (#2 fuel oil)	5 former USTs	9	Section 5.4 Appendix G	0.45	This parcel includes 5 former USTs and associated petroleum-contaminated soil that were removed. Closure Reports requesting No Further Action have been submitted for all 5 USTs. No Further Action approval letters were received from NJDEP for UST-64-4 on 10/23/00, UST-65-5 on 8/29/2000, and UST-173-19 on 1/10/2003.
88	(4)	HR	FTMM-17 (Former Building 65)	Former Pesticide Storage Area	37, 38, 48, 124, 132, 133, 134, 136, 137, 142,	Section 4.3.2.1.3 Section 5.2.1.2 Table 5-10 Section 5.5.2 Section 5.12 Appendix N	0.27	This parcel was included in the Fort Monmouth Installation Restoration Program under Site FTMM-17 (M-17 Former Pesticide Storage Area, Bldg 65). Building 65 has been demolished; chlordane was detected in the soil 6-12 inches below grade consistent with termite control practices in the 1980s; no chlordane was detected in groundwater. An NFA determination was approved by the NJDEP in 1994.
89	(2)	PS/PR	UST-64-3 'UST-485-57	2 former #2 fuel oil USTs	9	Section 5.4 Appendix G	0.14	Two former #2 fuel oil tanks (UST-64-3, UST-485-57) and petroleum-contaminated soil were removed. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2000, and a No Further Action approval letter was received from the NJDEP on 8/29/2000.
90	(5)	HS/HR/PS/PR	FTMM-57 (Former Bldg 108 USTs)	5 former #2 fuel oil USTs	124	Section 5.2.1.1 Table 5-9 Section 5.4 Section 5.4.2 Appendix G	0.38	Five former USTs associated with former Building 108 were investigated under the Fort Monmouth Installation Restoration Program as Site FTMM-57. The 5 USTs were removed in 1993; volatile organic compounds and metals have been detected in groundwater above NJDEP GW Quality Criteria. A Classification Exception Area (CEA) for site groundwater, which restricts the use of groundwater within a defined area until such time that contaminants of concern achieve compliance with the NJDEP Ground Water Quality Criteria, was filed with the NJDEP. A Remedial Investigation report requesting a No Further Action determination has been submitted to the NJDEP. Currently, as part of a monitoring program, four (4) groundwater monitoring wells are sampled on a quarterly basis.
91	(2)	PS/PR	UST-280-25	Former #2 Fuel oil UST	9	Section 5.4 Appendix G	0.14	A former #2 fuel oil UST and petroleum-contaminated soil were removed in 1997. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2000, and a No Further Action approval letter was received from the NJDEP on 10/23/2000.

Parcel Number	ECP Category	ECP Label	Building No. / Site Name	Design Use Description	References	ECP Section Reference	Size of Parcel (Acres)	Basis/Remarks
92	(2)	PS/PR	UST-484-56	Former #2 Fuel oil UST	9	Section 5.4 Appendix G	0.04	A former #2 fuel oil UST and 13 cubic yards of petroleum-contaminated soil were removed in 1995. Petroleum-related contaminants were detected in confirmatory soil samples at concentrations below the NJDEP cleanup criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 1998, and a No Further Action approval letter was received from the NJDEP on 8/29/2000.
93	(2)	PS/PR	UST-482-54	Former #2 Fuel oil UST	9	Section 5.4 Appendix G	0.04	A former #2 fuel oil UST and petroleum-contaminated soil were removed in 1994. Petroleum-related contaminants were detected in confirmatory soil samples at concentrations below the NJDEP cleanup criteria and groundwater results were below the NJDEP Groundwater Quality Criteria. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2002, and a No Further Action approval letter was received from the NJDEP on 1/10/2003.
94	(2)	PS/PR	UST-164-15 UST-277-24	Former #2 Fuel oil USTs	9	Section 5.4 Appendix G	0.17	Two former #2 fuel oil tanks (UST-164-15, UST-277-24) and petroleum-contaminated soil were removed. A closure report was submitted to the NJDEP requesting a No Further Action determination in 2002, and a No Further Action approval letter was received from the NJDEP on 1/10/2003.
95	(4)	HR	PCB Transformer leak near Bldgs 454 and 456	Pole Mounted PCB Transformer leak	8	5.5.1	0.44	This parcel is located northeast of Oceanport Ave. in the vicinity of Buildings 454 and 456. Three pole-mounted 50 KVA transformers (PCB-contaminated class) were knocked to the ground as a result of a storm in 1992 and the contents of two of the transformers leaked onto the ground. The transformers were properly disposed of along with 50 CY of PCB-contaminated soil. Final post-excavation samples were non-detect for PCBs and showed levels of TPH below the NJDEP standard. An additional 20 surface soil samples were collected from the perimeter of the entire excavation. These samples were analyzed for TPH. None of these samples contained TPH in excess of the NJDEP soil standard.

APPENDIX B

COASTAL ZONE MANAGEMENT ACT CONSISTENCY DETERMINATION

Coastal Zone Management Act (CZMA) Federal Consistency Determination Fort Monmouth Proposed Implementation of BRAC 2005

The discussion in this Appendix provides the State of New Jersey with the Fort Monmouth Consistency Determination under CZMA section 307(c) (1) and 15 CFR Part 930, sub-part C, for the implementation of BRAC actions at the installation. The information in this Consistency Determination is provided pursuant to 15 CFR section 930.39. The Proposed Action involves those activities described in Section 1 through Section 3 of this Environmental Assessment (EA).

Consistency Determination

New Jersey's Coastal Management Program (CMP) contains applicable enforceable policies under the following:[1]

- Coastal Zone Management Rules (N.J.A.C. 7:7E), which represent the state's substantive standards for the use and development of resources in New Jersey's coastal zone; these rules implement three major state laws:
    - the Waterfront Development Law (N.J.S.A. 12:5-3),
    - the Wetlands Act of 1970 (N.J.A.C. 13:9A), and
    - the Coastal Area Facility Review Act (CAFRA) (N.J.S.A. 13:19)
- Coastal Permit Program Rules (N.J.A.C. 7:7), which establish the procedures by which the Department reviews permit applications and appeals from permit decisions under the three laws listed above
- Freshwater Wetlands Protection Act Rules (N.J.A.C. 7:7A), which implement the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B)
- Stormwater Management rules, (N.J.A.C. 7:8)
- New Jersey Pollutant Discharge Elimination Systems rules, (N.J.A.C. 7:14A, Subchapters 1, 2, 5, 6, 11, 12, 13, 15, 16, 18, 19, 20, 21, 24 and 25).

Two additional statutes that are part of the CMP's enforceable policies but are not applicable to the Proposed Action are the Hackensack Meadowlands Reclamation and Development Act, N.J.S.A. 13:17, and the Law concerning the transportation of dredged materials containing polychlorinated biphenyls (PCBs), N.J.S.A. 13:19-33.

The summary on the following pages presents the New Jersey CMP applicable enforceable policies and the Army's conclusions determining that the implementation of the BRAC Commission's recommendations would have no or minor effects on the land or water uses or natural resources of New Jersey.

Below is a summary analysis of the consistency of the proposed federal activity with the New Jersey Coastal Zone Management Program.

Table C-1
Fort Monmouth Coastal Zone Consistency Determination

Applicable Enforceable Policies	Effects of the Federally Proposed Action
Coastal Zone Management Rules (N.J.A.C. 7:7E)	
Subchapter 3: Special Areas	*Rules for the following Special Areas do not apply to the proposed federal activity; the proposed federal activity would not take place in these Special Areas and therefore would have no effect on these Special Areas:*
7:7E-3.2 Shellfish habitat 7:7E-3.3 Surf clam areas 7:7E-3.4 Prime fishing areas 7:7E-3.5 Finfish migratory pathways 7:7E-3.6 Submerged vegetation habitat 7:7E-3.7 Navigation channels 7:7E-3.8 Canals 7:7E-3.9 Inlets 7:7E-3.11 Ports 7:7E-3.12 Submerged infrastructure routes 7:7E-3.13 Shipwreck and artificial reef habitats 7:7E-3.14 Wet borrow pits 7:7E-3.15 Intertidal and subtidal shallows 7:7E-3.16 Dunes 7:7E-3.17 Overwash areas 7:7E-3.18 Coastal high hazard areas 7:7E-3.19 Erosion Hazard Areas 7:7E-3.20 Barrier island corridor 7:7E-3.21 Bay islands 7:7E-3.22 Beaches	7:7E-3.24 Existing lagoon edges 7:7E-3.31 Coastal Bluffs 7:7E-3.32 Intermittent stream corridors 7:7E-3.33 Farmland conservation areas 7:7E-3.34 Steep slopes 7:7E-3.35 Dry borrow pits 7:7E-3.37 Specimen trees 7:7E-3.38 Endangered or threatened wildlife or plant species habitats 7:7E-3.39 Critical wildlife habitats 7:7E-3.42 Excluded Federal lands 7:7E-3.43 Special Urban Areas 7:7E-3.44 Pinelands National Reserve and Pinelands Protection Area 7:7E-3.45 Hackensack Meadowlands District 7:7E-3.46 Wild and Scenic River Corridors 7:7E-3.47 Geodetic control reference marks 7:7E-3.48 Hudson River Waterfront Area 7:7E-3.49 Atlantic City 7:7E-3.50 Lands and waters subject to public trust rights
Subchapter 3: Special Areas (continued)	*Rules for the following special areas potentially apply to the proposed activity, and the proposed federal activity is consistent with the rules*
7:7E-3.10 Marina moorings and 7:7E-3.23 Filled water's edge	**No effect.** Under the federal action, site disposal preparation activities would not involve any development in the existing marina moorings or in any filled water's edge special areas that may exist at Fort Monmouth, primarily along Oceanport and Parkers Creeks. Under the secondary action, the Final Reuse Plan calls for the existing marina in the Oceanport Reuse Area to be improved and expanded to provide greater public access to the water. Consistency with coastal zone management rules for these Special Areas would be the responsibility of others after the federal property is conveyed to others.

Table C-1, *continued*
Fort Monmouth Coastal Zone Consistency Determination

Applicable Enforceable Policies	Effects of the Federally Proposed Action
Subchapter 3: Special Areas (continued)	*Rules for the following special areas potentially apply to the proposed activity, and the proposed federal activity is consistent with the rules*
7:7E-3.25 Flood Hazard Areas	**No effect.** Portions of Fort Monmouth property adjacent to Parkers Creek and Oceanport Creek lie within 100-year floodplain. Site disposal preparation activities would not involve any development or other activity within flood hazard areas. As stated in Section 3.2. 3 of the EA, Army property conveyance documents will notify property transferees of their obligations to adhere to applicable restrictions on the property imposed by federal, state, or local floodplain regulations.
7:7E-3.26 Riparian Zones, 7:7E-3.27 Wetlands, and 7:7E-3.28 Wetland buffers	**Minor adverse effects.** Site disposal preparation activities would be limited to not include sensitive regulated riparian zones, wetlands and wetland buffer areas. No dredging, filling or destruction of wetlands would occur in conjunction with the proposed federal action. Site disposal preparation activities could involve minor land disturbance that would have the potential to have minor adverse effects as a result of sediment runoff into these Sensitive Areas. The Army would comply with its existing storm water management plans and implement applicable BMPs so as to minimize any potential adverse effects. As stated in Section 3.2.3 of the EA, the Army would notify prospective transferees of their requirement to adhere to Section 404 permitting requirements for activities in or related to wetlands.
7:7E-3.36 Historical and archaeological resources	**No effect.** Site disposal preparation activities would preserve existing historical and archaeological resources as described in Section 4.9 of the EA. Transfer or conveyance would be subject to the Army's Memorandum of Agreement with the New Jersey SHPO and ACHP as described in Section 3.2.3 and Section 4.9.2 of the EA.
7:7E-3.40 Public Open Space	**No effect.** Federal activities in preparation for site disposal would not involve any development in or adjacent to existing public open space.
7:7E-3.41 Special Hazard Areas	**Minor beneficial effects.** Proposed federal action includes cleanup of contaminated sites as part of preparation for Army disposal, as described in Section 2.3.2 of the EA.
Subchapter 3A: Standards for Beach and Dune Activities	**No effect.** Rules in the Subchapter do not apply to the proposed federal activity; the proposed federal activity would not involve any beach and dune activities.
Subchapter 3B: Information Required in Tidal Wetland and Intertidal and Subtidal Shallows Mitigation Proposals	**No effect.** The proposed federal activity would be consistent with these rules pursuant to 7:7E-3.15 and 7:7E-3.27 discussed above.

Table C-1, *continued*
Fort Monmouth Coastal Zone Consistency Determination

Applicable Enforceable Policies	Effects of the Federally Proposed Action
Subchapter 3C: Standards for Conducting and Reporting the Results of an Endangered or Threatened Wildlife or Plant Species Habitat Impact Assessment and/or Endangered or Threatened Wildlife Species Habitat Evaluation	**No effect.** Rules in this Subchapter do not apply to the proposed federal activity. No Habitat Impact Assessment surveys are planned as part of the proposed federal activity subsequent to the previous planning level surveys discussed in Section 4.8.1.3 of the EA.
Subchapter 4: General Water Areas	*The following General Water Areas rules do not apply to the proposed federal activity; the proposed federal activity would not involve the activities regulated under these General Water Areas rules and therefore would have no effect relative to the listed areas or activities:* 7:7E-4.2 Aquaculture 7:7E-4.3 Boat ramps 7:7E-4.4 Boat docks and piers for cargo and commercial fisheries 7:7E-4.5 Recreational docks and piers 7:7E-4.7 New dredging 7:7E-4.9 Solid waste or sludge dumping 7:7E-4.10 Filling 7:7E-4.11 Mooring 7:7E-4.12 Sand and gravel mining 7:7E-4.13 Bridges 7:7E-4.14 Submerged pipelines 7:7E-4.15 Overhead transmission lines 7:7E-4.16 Dams and impoundments 7:7E-4.17 Outfalls and intakes 7:7E-4.18 Realignment of water areas 7:7E-4.19 Breakwaters 7:7E-4.20 Submerged cables 7:7E-4.21 Artificial reefs 7:7E-4.22 Miscellaneous uses
Subchapter 4: General Water Areas (continued)	*The following General Water Areas rules potentially apply to the proposed activity, and the proposed federal activity is consistent with the rules:*
7:7E-4.6 Maintenance dredging and 7.7E-4.8 Dredged material disposal	**No effect.** The proposed federal activity may include caretaking of property until disposal, as described in Section 2.3.1 of the EA, to include initial and long-term maintenance. Such maintenance may include continuation of periodic marina dredging along Oceanport Creek as described in Section 4.7.1.1 of the EA. Such dredging would be consistent with these General Water Areas rules.
Subchapter 5, 5A, and 5B: Requirements for Impervious Cover and Vegetative Cover for General Land Areas and Certain Special Areas; *and* ***Impervious Cover Limits and Vegetative Cover Percentages***	**Minor adverse effects.** Site disposal preparation activities under the proposed federal action, including caretaking and interim uses as described in Section 2.3 of the EA, would not appreciably change the existing impervious cover and vegetative cover at Fort Monmouth. Site disposal preparation activities could involve general land disturbance and vegetation removal and would be expected to be minor. All activities under the proposed federal activity would continue to be consistent with these rules.
Subchapter 6: General Location Rules	**No effect.** Rules in this Subchapter do not apply to the proposed federal activity; the proposed federal activity would not involve any development activities as described under these rules.

Table C-1, *continued*
Fort Monmouth Coastal Zone Consistency Determination

Applicable Enforceable Policies	Effects of the Federally Proposed Action
Subchapter 7: Use Rules	**No effect.** Site disposal preparation activities under the proposed federal action, including caretaking and interim uses as described in Section 2.3 of the EA, would not appreciably change the existing land uses at Fort Monmouth. All activities under the proposed federal activity would continue to be consistent with these rules.
Subchapter 8: Resource Rules	**No effect.** During site disposal preparation activities under the proposed federal action, including caretaking and interim uses as described in Section 2.3 of the EA, the Army would continue to manage Fort Monmouth under existing resource protection programs and practices, including its storm water pollution prevention plan and discharge permits. The proposed federal activity would comply with Resource Rules as described in this Subchapter.
Coastal Permit Program Rules (N.J.A.C. 7:7)	
All Subchapters	**No effect.** Proposed federal activities would comply with all provisions and procedures outlined in these rules for applicable permits required for activity in CAFRA, Wetlands, and Waterfront areas.
Freshwater Wetlands Protection Act rules, (N.J.A.C. 7:7A)	
All Subchapters	**No effect.** The proposed federal activities would be consistent with rules governing the implementation of the Freshwater Wetlands Protection Act, N.J.S.A. 13:9B-1 et seq., as outlined in these rules and as discussed above pursuant to N.J.A.C. 7:7E-3.15, 7:7E-3.27, and 7:7E-3B.
Stormwater Management rules, (N.J.A.C. 7:8)	
All Subchapters	**No effect.** During site disposal preparation activities under the proposed federal action, including caretaking and interim uses as described in Section 2.3 of the EA, the Army would continue to manage Fort Monmouth under existing resource protection programs and practices, including its approved storm water pollution prevention plan that is consistent with these rules.
New Jersey Pollutant Discharge Elimination Systems rules, (N.J.A.C. 7:14A, Subchapters 1, 2, 5, 6, 11, 12, 13, 15, 16, 18, 19, 20, 21, 24 and 25)	
All Subchapters	**No effect.** During site disposal preparation activities under the proposed federal action, including caretaking and interim uses as described in Section 2.3 of the EA, the Army would continue to manage Fort Monmouth under existing resource protection programs and practices, including its New Jersey Pollutant Discharge Elimination System (NPDES) permits and Public Complex General permits that are consistent with these rules.

Based upon the information, data, and analysis, as contained in the EA, the Army finds that the proposed action is consistent to the maximum extent practicable with the enforceable policies of the New Jersey CMP. Pursuant to 15 CFR Section 930.41, the New Jersey CMP has 60 days from receipt of this document in which to concur with or object to this Consistency Determination, or to request an extension under 15 CFR section 930.41(b). New Jersey's concurrence will be presumed if its response is not received by the Army on or before the 60th day from receipt of this determination. The State of New Jersey's response should be sent to Ms. Wanda Green, BRAC Environmental Coordinator, U.S. Army Fort Monmouth, 173 Riverside Drive, Fort Monmouth, NJ 07703.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List

(NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 3 CERC-NFRAP sites within the searched area.

Site	Address	Map ID
LITTLE SILVER CLEANERS	***601 BRANCH AVE***	***30-6***
US DEPT OF ARMY (ACSIM)	***121-123 EVANS AVE***	***144-12***
BENDIX CORP - ELECTRIC POWER D	***RTE 35***	***210-15***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 CORRACTS site within the searched area.

Site	Address	Map ID
BENDIX CORP - ELECTRIC POWER D	***RTE 35***	***210-15***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-TSDF site within the searched area.

Site	Address	Map ID
BENDIX CORP - ELECTRIC POWER D	***RTE 35***	***210-15***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-LQG site within the searched area.

Site	Address	Map ID
BENDIX CORP - ELECTRIC POWER D	***RTE 35***	***210-15***

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA-SQG site within the searched area.

Site	Address	Map ID
US DEPT OF ARMY (ACSIM)	***121-123 EVANS AVE***	***144-12***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 4 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there are 13 RCRA NonGen / NLR sites within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, and dated 10/23/2013 has revealed that there are 2 US AIRS sites within the searched area.

EXECUTIVE SUMMARY

NJ HIST HWS: The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

A review of the NJ HIST HWS list, as provided by EDR, and dated 05/09/2008 has revealed that there are 46 NJ HIST HWS sites within the searched area.

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 05/30/2014 has revealed that there are 7

EXECUTIVE SUMMARY

NJ ISRA sites within the searched area.

Site	Address	Map ID

NJ NPDES: The NJPDES contains the names, addresses and other information of all permitted New Jersey Pollutant Discharge Elimination Sytem dischargers.

A review of the NJ NPDES list, as provided by EDR, and dated 05/01/2014 has revealed that there are 2 NJ NPDES sites within the searched area.

Site	Address	Map ID
FORT MONMOUTH SLF	***SHERRILL AVE***	***168-11***
ALLIED SIGNAL AEROSPACE CO	***118 ROUTE 35***	***210-15***

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 6 NJ HWS RE-EVAL sites within the searched area.

EDR PROPRIETARY RECORDS

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 7 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within the searched area.

- Date form received by agency: 08/08/1980
- Facility name: SHORE CIRCUIT MANUFACTURERS
- Classification: Large Quantity Generator

Hazardous Waste Summary:
- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

- Waste code: F007
- Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

- Violation Status: No violations found

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004
Waste name: ARSENIC

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007

EPA Waste Code Addendum

SECTION 4 - EPA WASTE CODES

There are no epa codes to report for this search area.

Section 5

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 01/28/2014

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Last EDR Contact: 05/29/2014
Next Scheduled EDR Contact: 09/08/2014
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

STATE AND LOCAL RECORDS

SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

HIST HWS: Known Contaminated Sites Listing

The Known Contaminated Sites in New Jersey report is a municipal listing of sites where contamination of soil and/or ground water is confirmed at levels greater than the applicable cleanup criteria or standards. Remedial activities are underway or required at the sites with an on-site source(s) of contamination and at locations where the source(s) of contamination is unknown. Sites with completed remedial work that require engineering and/or institutional controls have reporting measures in place to ensure the effectiveness of past actions, and some include maintenance and/or monitoring

ISRA: ISRA Database
The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Center Listings
Source: Department of Human Services
Telephone: 609-292-1018

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 609-984-2243

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

APPENDIX D

ENVIRONMENTAL PROFESSIONAL RESUME
JOSEPH F. PEARSON

Resume
Joseph F. Pearson

Education: **Villanova University**, BS, 1979, Chemical Engineering

Experience:

Mar 2007 - Present ***CALIBRE,***
Senior Engineer

Mr. Pearson is a Professional Engineer with 36 years of management experience in environmental and hazardous waste programs. He has been responsible for directing all technical and administrative aspects of complex, multidisciplinary programs for Federal and state agencies addressing Resource Conservation and Recovery Act and the Comprehensive Environmental Response, Compensation and Liability Act. He provides communication/coordination, technical Quality Assurance (QA), implements program policy; evaluates subcontractor performance, and has responsibility for technical and logistical problem resolution to assure project/task completion on time and within budget. Mr. Pearson has extensive knowledge and expertise in regulatory analysis, remedial investigation, engineering analysis, cost estimation and DoD property transfer requirements.

Mr. Pearson is currently the BRAC Environmental Coordinator (BEC) at Lone Star Army Ammunition Plant and Red River Army Depot, providing environmental and program management at these sites.

Supported the U.S. Army throughout the entire closure process of Military Ocean Terminal, Bayonne (MOTBY). This was one of the initial early transfers and was accomplished under an Environmental Services Cooperative Agreement (ESCA). Supported the Army and worked closely with the Bayonne Local Redevelopment Authority (BLRA) to complete this model transfer. Supported the Army by leading the team that performed the initial environmental studies, including the Environmental Baseline Study, Remedial Investigation and Feasibility Studies, and Decision Documents. Once the property was transferred, provided QA, remedial action oversight and technical engineering support to evaluate remedial actions. Provided periodic inspection of ongoing remedial activities to ensure that actions were implemented appropriately and would function as designed. Responsible for monitoring the financial aspects of the cleanup privatization between the Army and the BLRA. Prepared various closeout and transfer documents including Proposed Plans, Decision Documents, the ESCA, and transfer deeds. Prepared a Finding of Suitability to Transfer (FOST) and a Finding of Suitability for Early Transfer (FOSET) for the MOTBY facility. Continued support of Army oversight of ongoing redevelopment work where it impacts the selected remedies. Worked with Army Environmental Law Division (ELD) to review changes to use restrictions (Deed Notices)

and also prepared draft Explanation of Significant Differences to document the BLRA changes to approved remedies.

As the BEC at Fort Monmouth (Evans Area), upon initially taking over the site as BEC, Mr. Pearson completed a Remedial Action Report (RAR) for a cleanup of soils that had been ongoing at various locations throughout the base for several years. The cleanup had been done by various entities (one for oversight, one for actual excavation, one for sampling and analysis). The BEC pulled all the pieces together and was able to get the RAR completed and a No Further Action (NFA) approval by the NJDEP. Mr. Pearson led a cleanup of PCB-contaminated soils in 2009 at Building 9053. This remediation project was originally estimated by a non-CALIBRE BEC at $2.2M. Through in-depth regulatory research and understanding, CALIBRE's BEC recognized that the PCB-contaminated soil levels could be disposed at alternative disposal locations. This approach resulted in a savings of approximately $1.1M for the project. For another site at Fort Monmouth (former septic tanks that received various wastes), Mr. Pearson was responsible for completing all phases of the project including completing a Remedial Investigation, Remedial Action Selection Report (FS Report), completing the removal of soils and completing the RAR and obtaining a NFA for the site. During the remedial action, the BEC worked with the removal contractor, reviewing post excavation sample results, directing additional excavation requirements and coordinated with the NJDEP when excavations encroached into adjacent wetlands. In addition to meeting the technical requirements for cleanup, the final cleanup allowed the site to have unrestricted use as the property is being transferred from the Army to the local reuse authority.

At the Evans Area, Mr. Pearson provided coordination on many other efforts at the site which restored the credibility of the Army. These efforts included working with the State Historical Preservation Office (SHPO) on maintenance items for the historic buildings at the site. Completed investigation at last contaminated site to be addressed so that the final acres can be transferred. As part of the 5-year review for the groundwater requirement, developed an approach to complete the soil vapor intrusion study to meet NJDEP regulations. Serves as the Restoration Advisory Board (RAB) co-chairman and conducts RAB meetings, prepares minutes and conducted effective outreach program with a very active RAB.

Mr. Pearson currently supports the BRAC 2005 closure of Fort Monmouth. Mr. Pearson has prepared a deed notice for a PCB cleanup area and is also finalizing Remedial Investigation Report Addendums and Remedial Action Progress Reports for four sites at the Charles Wood Area. Mr. Pearson is providing technical review support for all the environmental documentation

for closing out open sites in support of property transfer. Mr. Pearson worked with CALIBRE technical experts to develop an approach to evaluating metals in groundwater that enabled the Army to achieve NFA for metals at several sites throughout Fort Monmouth. These sites had previously been monitored quarterly for up to 15 years. Mr. Pearson's support at Fort Monmouth has included finalizing various reports and presenting other regulatory approaches that have enabled the Army to achieve "No Further Action" at various sites and enabled property to proceed to transfer.

Mr. Pearson has supported the Army's need to lease parts of Fort Monmouth by timely preparing the Reports of Availability and Finding of Suitability to Lease documents for 6 individual parcels. Mr. Pearson has also been the lead in preparing the FOSTs and ECP Update Reports that have been required to support the transfer of the initial properties at Fort Monmouth.

Mr. Pearson is also the BEC for Fort Ritchie where he is coordinating the implementation of MEC clearance at various portions of the former Fort Ritchie that are being redeveloped. Other actions at Fort Ritchie include long term monitoring of groundwater and the updating of a Record of Environmental Consideration.

Feb 2002 - Feb 2004 ***Strategic Management Initiatives, Inc. (SMI), Broomfield, CO***
Sr Analyst

Provided communication/coordination, technical Quality Assurance (QA), implemented program policy; evaluated subcontractor performance, and had responsibility for technical and logistical problem resolution to assure project/task completion on time and within budget. Supported the Army leading the team that performed the initial environmental studies, including the Environmental Baseline Study, Remedial Investigation and Feasibility Studies and Decision Documents. Once the property was transferred, Mr. Pearson provided QA and remedial action oversight and technical engineering support to evaluate remedial actions. Monitored the financial aspects of the cleanup privatization between the Army and the BLRA. In addition, technical oversight functions, prepared various closeout and transfer documents, including Proposed Plans (PPs), Decision Documents (DDs), ESCA and transfer deeds, FOST and a Finding of Suitability for Early Transfer (FOSET) for the MOTBY facility. As part of BEC duties, was responsible for the coordination of routine maintenance of the facilities. Set up a performance based agreement (PBA) for a major PCB soil cleanup that saved the Army approximately $1.2 million. All projects at Evans Area have required coordination with the State Historic Preservation Office (SHPO) for the maintenance on historic buildings at the site (windows,

doors, chimney, security fencing, and security). Historic building requirements were also included in transfer documents. The five year review for groundwater was drafted prior to Mr. Pearson's work and had CALIBRE redraft the five year review which included only continuing monitoring and the extension of the use restriction. The revised plan was accepted by the regulators. Mr. Pearson was also the Restoration Advisory Board (RAB) co-chairman and ran the RAB meetings and prepared the minutes and communicated effectively with a very involved RAB. Mr. Pearson prepared Independent Government Estimates (IGEs) and Scopes of Work (SOWs) for various remedial programs. The IGEs and SOWs were prepared for performance based contracts and required the development of remedial action strategies, evaluation of local and federal regulatory requirements, as well as facility operational and budgetary constraints. As part of the IGE process, Mr. Pearson performed Uncertainty Analysis to determine potential ranges of estimates as well as develop potential bid award points. Mr. Pearson supported the PBA initiative by conducting candidate selection and evaluation of acquisition strategies (including site visits associated with Installation Action Plan workshops), reviewing regulatory framework (including RCRA and CERCLA cleanup programs), reviewing long-term management (LTM) and remedial action operation (RAO) acquisition strategies, developing Performance Work Statements (PWSs), conducting document review and preparing comments, developing cost estimating strategies, and providing support to technical evaluation boards. For the Stratford Army Engine Plant (SAEP), Mr. Pearson prepared engineering analysis and cost estimates for various alternatives for the demolition and partial demolition of the Stratford Army Engine Plant. The engineering analysis included the evaluation of facility utilities (electrical, storm and sanitary sewers, HVAC, and potable and fire service water) and the ability to maintain certain portions of the facility in a ready or standby mode. The analysis culminated in the preparation of a facility laydown plan that supported the laydown of the facility and reduced both caretaker and utility costs.

Mar 1985 - Feb 2002

Ecology and Environment, Inc. (E&E), Philadelphia, PA
Regional Manager/Project Manager

As Program Manager for Environmental Services Program Support, provided program support to the Baltimore District of the U.S. Army Corps of Engineers. Support included providing multidisciplinary environmental assistance to the U.S. Army Environmental Center in its BRAC activities which encompassed environmental investigations, Remedial Investigation/Feasibility Studies (RI/FSs), compliance support, remedial engineering and design, database development, laboratory analysis and emergency disposal services at U.S. Army installations and formerly used defense sites. Managed the direction of BRAC support activities (RI/FS) at

the Military Ocean Terminal Bayonne by developing a comprehensive program to investigate and evaluate over 80 environmental concerns raised during the EBS. The RI/FS addressed a former landfill, multiple Underground Storage Tanks (USTs) and Above Ground Storage Tanks (ASTs), former storage areas, various historic spill sites, discharges to sediments surrounding the base and Polychlorinated Biphenyls (PCB) transformers and PCB spills. In addition, directed a lead-based paint study at base living quarters and addressed other environmental concerns from base operations (sewers, machinery pits, dry dock operations, etc.). Upon completion of the field investigations, led the preparation of a feasibility study (FS) to address necessary base-wide remedial actions. Key individual in the preparation of various transfer documents including a proposed plan, decision documents, findings of suitability to transfer and classification exception area (for groundwater). Provided engineering peer review and quality assurance (QA) for various environmental design projects for the U.S. Departments of Defense (DoD) and State clients. Projects included the replacement of sewer systems and lift stations at Langley Air Force Base, a slurry wall and groundwater treatment system at the Sweden Landfill site in New York State and the remediation of radioactive materials placed in a residential setting at the Welsbach/General Gas Mantle Site in New Jersey. As the Program Manager for E&E's Alternative Remedial Contracting Strategy (ARCS) program in Pennsylvania, Virginia, West Virginia, Maryland, Delaware and the District of Columbia, provided direct technical and financial direction for all program work assignments which totaled over $23 million. Also coordinated and managed multidisciplinary projects which encompassed the full range of services from RI/FS through remedial design, remedial action and construction management. The ARCS 3 program included a site discovery project, 44 Preliminary Assessments (PAs), 27 Environmental Priorities Initiative PAs, 19 screening Site Inspections (SIs), two expanded SIs, preparation of three Hazard Ranking System Site Scoring Packages, five RI/FSs, five remedial designs, seven remedial actions, five projects involving remedial design/remedial action oversight, and two five-year reviews. Assured implementation of all work was in accordance with contract terms and evaluated/ implemented all program procedural and contractual changes. Led E&E's preparation and updating of the program management plan covering both technical and financial aspects of contract implementation. Prepared updates and addenda to the ARCS 3 program management plan to assure that changing U.S. Environmental Protection Agency (EPA) requirements were met and that EPA continuously received cost-effective, quality service; and controlled program management costs while keeping the level of service and quality high. Established subcontracting procedures in accordance with Federal Acquisition Regulations (FAR) and regional needs. In addition, provided cost-effective management of Government-Furnished Property (GFP)

through application of cost-competitive procurements, cost/benefit analyses, acceptance of GFP from other EPA contractors and sharing of GFP with other EPA contractors on a temporary basis. Under the ARCS 3 program, provided QA and overall direction for the RI/FS for the H&H Incorporated site in Virginia, where E&E identified widely dispersed contamination; the RI/FS for the Saunders Supply Company wood-treating site, where the fast-track FS included evaluation/ recommendation of innovative techniques for chemical dehalogenation and thermal desorption, followed by treatability studies; and the RI/FS for the Strasburg mixed use landfill, where the FS resulted in recommendations to improve cap and leachate collection systems to reduce infiltration and leaching. To expedite the remedial action for two operable units at the Strasburg site, directed two fast-track, focused FSs addressing leachate collection and treatment of highly productive seeps. Directed E&E's third-party oversight for remedial design/remedial action activities at the Bendix Flight Systems and Middletown Airfield sites, as well as the five-year remedial action review for the Presque Isle site. As the Director, Berks Sand Pit, Pennsylvania, directed the design of a modular groundwater pump-and-treat system that could be expanded to increase capacity and treatment efficiency. Developed the initial system to collect detailed hydrogeologic data and extract/treat the most contaminated groundwater. When the well network was expanded to include air stripping/carbon adsorption, prepared plans, specifications and bid documents including piping and instrumentation diagrams, process drawings, electrical control schematics and design details for the air stripper; then directed its installation. Also as the Director of the Hellertown Site, Pennsylvania, directed the preparation of designs for placement of an impermeable cover and for a pump-and-treat system (air stripper with carbon adsorption). The strategy was to place the cap while additional groundwater system design data were being obtained, in order to expedite the overall site remediation. The cover design included both a liner and bituminous paving to promote impermeability and future use as a parking lot for the commercial/industrial area. As Director, Hebelka Site, Pennsylvania, directed the removal/disposal of lead-contaminated surface debris, primarily battery casings; followed by the removal, solidification and disposal of lead-contaminated soil. Both phases included excavation monitoring by use of x-ray fluorometers. As the Program Manager, Pennsylvania Department of Environmental Protection (PADEP) was program manager for the statewide, $1.8 million UST contract and the multi-site, $6 million Interim Response Service (IRS) program. Responsibilities encompassed the scoping of new assignments; preparation of work plans; implementation of removal actions; coordination with local, state and federal officials; and provision of community relations support. Projects under the two state programs included investigations and removal actions at drum sites, the cleanup of contaminated soil, design/installation of

water treatment systems for affected residences and stabilization of potentially dangerous conditions at tank farms and waste sites. Negotiated basic ordering agreement subcontracts with construction and disposal firms. Under the Pennsylvania Department of Environmental Resources (PADER) IRS contract, personally managed the $900,000 multisubstance drum categorization/removal project at the Autolife Products site. The site became publicly sensitive when about 400 drums containing unknown contents were discovered in an inner-city building near residences and an overhead rapid transit system. Developed the detailed work plan, health and safety plan, cost estimates and arranged for multiple subcontractor support within two days after notification of assignment. In addition to providing liaison with city fire, transit and police officials, coordinated closely with representatives of the Pennsylvania Attorney General and Pennsylvania/New Jersey water quality and hazardous material response task forces to arrange an effective and expeditious cleanup. Under the PADER IRS contract, provided overall direction and QA for the $1 million cleanup program for the Savage Industries site, which contained about 400 drums and eight ASTs. Developed a work plan and directed the interim response action, which included use of Level B personal protection (positive-pressure self-contained breathing apparatus with dermal protection) to complete a hazard categorization, waste profiling and analytical testing required for proper waste disposal. This site required an expedited cleanup. As IRS program manager, provided QA and coordinated E&E support for a $750,000 interim cleanup that involved the pumping of contaminated runoff, repair of leaking ASTs, maintenance of residential treatment (carbon adsorption) units and repair of an existing air stripper at the Industrial Solvents AST farm. As the FS Manager in support of E&E's Zone 2 Technical Assistance Team (TAT) contract with EPA, managed the FS for the Agricultural Street Landfill in New Orleans, Louisiana. The presence of low-income housing and a school on the 100 acre, abandoned former municipal landfill gave the site high public sensitivity and precedent-setting potential under the Federal Environmental Justice initiative. As FS manager, Mr. Pearson was responsible for the extremely short-turnaround evaluation of alternatives to meet the eight-month schedule. To address contaminants including metals and polynuclear aromatic hydrocarbons, the engineering options included site capping, installation of landfill gas collection systems, on-site solidification and groundwater collection/treatment. The FS team identified applicable or relevant and appropriate requirements (ARARs) and developed remedial action objectives. Led the identification/ screening of specific technologies for effectiveness, implementability and cost-effectiveness and the development of detailed cost estimates for technologies meeting the ARARs. Under the Zone 2 TAT program, was responsible for the fast-track remedial design for the Southern Shipbuilding Corporation site in Slidell, Louisiana. To meet EPA deadlines, the project

involved development of two concurrent designs for bioremediation and incineration based on the E&E-prepared engineering evaluation/ cost analysis. As the Project Planning/Design Engineer for the USACE Kansas City District, was responsible for project planning and preparation of the QA, health and safety and site sampling plans for E&E's full-scale remedial design and construction project at the Bridgeport Rental and Oil Services NPL site. Reviewed data from the RI and supplemental investigation to ensure that the information was comprehensive enough to provide a basis for the remedial design. Oversaw FS-related field investigations and developed plans and specifications to handle/treat waste from 95 USTs and ASTs and a 13-acre lagoon filled with approximately 2.5-million gallons of contaminated oil. The complex lagoon configuration required design and implementation of innovative logging and sampling equipment and methodologies. Among other items, the plans and specifications delineated the material handling and incineration systems needed to destroy the complex contaminants. As E&E RI/FS project manager for the Worcester hazardous waste site in Massachusetts, planned and implemented a multidisciplinary field investigation, evaluated all environmental and engineering data and prepared the RI and FS reports. Worked closely with representatives of the Massachusetts Department of Environmental Quality Engineering to address agency concerns. As Design Engineer, Illinois EPA, completed the detailed design plans and specifications for incineration of PCB-contaminated soil at the LaSalle Electrical Utilities Superfund site in Illinois. Developed prequalification specifications for selection of qualified bidders and developed detailed cost estimates to evaluate bidder cost proposals. As a Technical Reviewer, United Gas Pipe Line Company, conducted a technical review of RI/FS reports for a lead-contaminated facility in Flowood, Mississippi, then recommended alternative remediation designs for the cleanup of lead-contaminated groundwater and soil. As an International Project Manager for Israel Military Industries Ltd., managed E&E's RI/FS and design of a soil and groundwater cleanup program for a former military propellants and explosives facility in Nof-Yam, Israel. The 110-acre site was used for the production of various propellants containing nitrocellulose, nitroguanidine, nitroglycerin, nitric acid, TNT, DNT, diphenylamine, centralite, and sulfuric acids. As principal in charge, provided QA for E&E's evaluation of industrial waste abatement concerns as part of the integrated urban environmental management study for the Chembur and Thane Belapur industrial areas of Bombay, India. Also E&E project manager for several environmental audits of facilities undergoing client consideration for purchase, including a metal shop; a wood-treating facility and a food-processing plant; and asphalt facilities. For the audit of the metal shop, conducted a site visit to examine air emission rates, wastewater discharges, on-site storage practices and off-site disposal procedures for waste oil; and evaluated existing permits. Recommended

	further air testing, minimization techniques for wastewater and storage procedures to comply with state and Federal regulations.
Jan 1981 - Feb 1985	***Cargill, Inc./Namoco, Willow Grove, PA*** ***Project Engineer*** Was responsible for the cost estimation of new facilities designed for the storage of various chemicals and oil products. Designed plant modifications, held responsibility for equipment procurement and managed construction and installation activities from inception through project start-up. Responsible for facility compliance with applicable environmental and waste disposal standards and regulations.
Oct 1979 - Dec 1980	***General Public Utilities, Three Mile Island, Middletown, PA*** ***Unit II Recovery Project Engineer*** Responsible for the development of storage areas to contain dewatered radioactive resins and solidified and dry compacted wastes. In addition, administered, implemented and evaluated the facility groundwater monitoring program. Led the upgrading and relocation of a low-level waste processing system, including system conception, design, engineering, construction and start-up. Provided project engineering support for the procurement, installation and solution of problems encountered during the installation of the facility's $15M submerged demineralizer system.
Hardware/Software Experience:	*Crystal Ball; RACER* Crystal Ball is a program to perform Monte Carlo analysis used in developing uncertainty in estimates and bounding cost estimates. RACER is the Army's cost estimating program.
Security Clearance:	*SECRET, DISCO*
Certifications:	*DOD Environmental Liabilities Estimate Certification, February 2016, Army Environmental Command (AEC)* *Registered Professional Engineer* - States of Pennsylvania, Virginia, and Maryland
