Re: *Final Landfill Feasibility Study Work Plan*
Fort Monmouth
Oceanport, Monmouth County
PI G000000032

Dear Ms. Green:

The New Jersey Department of Environmental Protection (Department) has completed review of the referenced report, dated March 2015, generated by Parsons Government Services Inc (Parsons), on behalf of the U.S. Army Engineering and Support Center, Huntsville (USAESCH). As indicated in the report, activities are to be performed with the goal of Decision Document acceptance in compliance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), the National Contingency Plan (NCP), 40 CFR part 300, and “to the extent possible to meet the requirements of New Jersey Administrative Code (NJAC) 7:26E Technical Requirements for Site Remediation”.

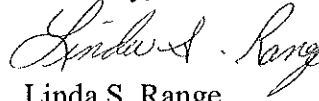

The submittal is approved with the following comments:

As acknowledged in the Army’s September 17, 2014 response letter, the Department has not at this time received sufficient information to confirm delineation has been completed at each of the nine landfills. It was agreed, as indicated in *Section 2.2*, an RI/FS report submittal for each landfill, including a compilation of data from all previous investigations and reports, and characterization of the nature and extent of contaminants at each site, is appropriate.

As indicated in the November 13, 2014 email sent to you, James Moore and Cris Grill at 1302 hours, the previously stated requirement for the performance of a methane gas survey at each of the landfills remains in effect.

Please contact this office with any questions.

Sincerely,

A handwritten signature in cursive script that reads "Linda S. Range".

Linda S. Range
