**Re: Request for Water Supply Information  
Fort Monmouth  
Site M-2 (FTMM02), Main Post Area, Fort Monmouth, NJ 07703  
(Eatontown Block 301, Lot 1)**

Dear Mr. Fallon:

In response to your request of January 4, 2011 directed to the Borough Clerk (which we were copied), be advised the Borough of Eatontown currently has wells in operation at 80 Acre Park for the irrigation of their recreational fields. The Borough would most likely investigate constructing additional wells to reduce their potable water consumption for irrigation at other park sites during the design phase. Currently, the Borough has one park in the planning stages; however, as far as a long term planning horizon is concerned, the only use of groundwater would most likely be park irrigation well construction.

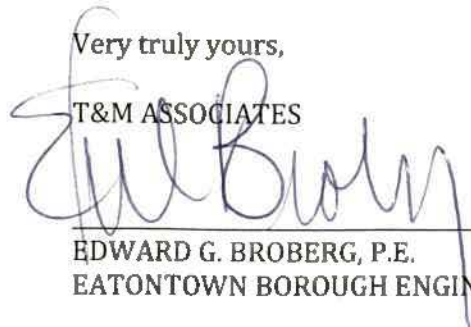

In addition, we have checked with the Borough and they currently do not have any rules or regulations regarding potable wells in their Code.

There may be some wells in the Borough being used for residential drinking water. Any records regarding this would have to be obtained from the Borough's Building Department.

If you need any additional information regarding your request, kindly contact me at (732) 671-6400 and I will assist in any way I can.

Very truly yours,

T&M ASSOCIATES
